

Task Two Engagement

The Plan's multi-faceted process has engaged a broad spectrum of residents, visitors and stakeholders. Plan consultants and core client organizations have reached out and connected to many partners, institutions and advocates already engaged in river reclamation as well as those that might benefit from more engagement. This effort has helped to ignite interest among those currently unaware of the river and harness the power of those already advocating. It has put words and pictures to shared ambitions, illuminated the areas of potential conflict, and strengthened capacity for future change.

Planning Process Summary

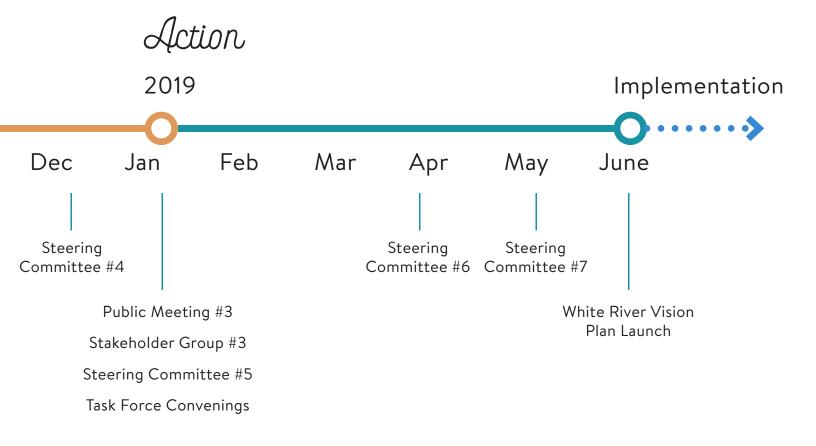

Embarking on a plan of this range and magnitude require the guidance, input, and support of many. Most importantly, community input drove the *outcomes* of the plan. The following section broadly summarizes each phase of the plan and major engagement milestones, which will be described in more detail later in this document. In the first phase (Discover) the team established plan priorities, reviewed past and ongoing plans/projects, and researched and analyzed the river and its many elements. History, existing conditions, needs, opportunities, strengths, and deficiencies of the study area were documented, and a public outreach strategy was developed to maximize

public participation throughout the process. As part of the data-gathering in this phase, www.mywhiteriver.com was launched and included several opportunities to participate in the plan online. The first public meetings were also held during this phase.

In the second phase (Envision) the team created a shared community vision and established a physical framework to achieve the vision based on input from surveys, the first public meetings, and existing events. Tasks included planning for programming, destinations, market research, and consideration of unique riverfront features and events. The team also highlighted destinations and future scenarios for preservation, enhancements, and/or expansion. Areas of unusual ecological, historical, cultural, scientific, or aesthetic significance were explored, and defined through character zones known as "reaches."

In the third and final phase, the planning team developed recommendations aligned with the vision and framework, and identified policy implications or changes. The team also worked with committees and the public to define priorities for implementation and phasing, and created an action-oriented plan to guide the next thirty years.

Engagement Goals & Objectives

The primary aims of stakeholder engagement for this project was to facilitate inclusive planning and decision-making and cultivate sustainable regional partnerships committed to implementing a shared vision for White River. The key outreach goals that the team identified early on in the plan process are described in more detail below:

- Educate and inspire stakeholders throughout the project timeline - The plan should be a learning experience for both the project team and those in the community who engage in the planning effort. The outreach process needs to promote a greater understanding of the changing environment of the river and what happens on its banks, the context of its greater watershed, the state and trends across the country.
- 2. Help build long-lasting relationships with stakeholders - The year-plus-long planning process will have long-term implementation implications. Casting the engagement net broadly and early will help to facilitate meaningful connections to keep momentum going as projects are identified and implementation commences.

- Public engagement should be fun -Ensure outreach tactics are interesting and digestible for audiences of all ages, abilities and backgrounds.
- 4. Disseminate project information to stakeholders - Use multiple methods to share information and encourage more participation in the planning effort. Continue to disseminate information about the plan well after the document is complete.

Outreach Brand

A distinct name and identity was developed during the Discovery Phase both for the plan and to create a clear and identifiable brand for the project in external communication. The goal was to develop a distinct name and identity to link together the different outreach events and provide a memorable theme to encourage participation and ensure engagement during and beyond the project timeline.

The kick-off in early May enabled the team greater exposure to the White River, which aided in discussions between team members as we brainstormed. The resulting branding concept evolved from discussions with the engagement team and client team and resulted in a color palette, fonts and abbreviated name for the plan. The Central Indiana White River Strategic Plan was rebranded to be called The White River Vision Plan. Fonts and colors capture the excitement and vibrance of different parts of the river as well as more natural or passive places.

Vision Plan Logo

To ensure legibility, reserve clear space on all four sides of the logo. The clear space measurement should equal at least 100% of the "h" height.

COLOR APPLICATION

In order to ensure the White River Vision Plan's graphic identity and brand are consistent and clear, it is important to preserve and use the same logo, font and colors for all internal and external communications. Full-color logo variations should predominantly be used. Solid inversion is also acceptable. One-color application may be used as illustrated, but only when full-color production is restricted.

Online and digital logos should appear only as full-color or solid inversion.

Types of Outreach

Overview

In all phases of the White River Vision Plan, stakeholders reflected on their experiences on and along the river, voiced concerns and shared ideas for its future. The public contributed to a comprehensive vision in the second phase and prioritized investments in the third phase of work. A wide variety of stakeholders from the two counties participated online and in person during the twelve-month period. The entire plan culminated in a comprehensive public engagement strategy which included the following types of events/methods:

- Key Partner Engagement
- Appointed Committee and Task Force Representation
- Public Meetings
- Communications (Media Outreach, Digital Tools)
- In-person Community Conversations, Popup Festivals, and Community Events
- Plan Kick-off Week

populations to ensure that the plan is inclusive and includes diverse perspectives from up and down the study area. Inclusive engagement is designed to ensure a diverse and broad range of perspectives and people are equitably represented in the plan. In order to ensure the team met its goal to engage a broad and representative constituency, the following tactics were deployed:

- . Meet people where they are by going to them, especially through existing events, organizations, and places people frequent.
- Create many ways to engage with the plan. The plan was present at over ninety-two public events, meetings, festivals, online, in the news and on social media.
- Share information through ethnic and community media venues. The team reached a vareity of organizations that represent populations of key importance to include as part of this planning effort and regaularly updated those organizations and communities with news about meetings or updates related to the plan.
- Communicate and market events and news to many age groups.
- Create opportunities for different . audiences to understand each other's perspectives through surveys and activities that cull from past responses and solicit reactions from various stakeholder groups.

Inclusive EngagementKey PartnerTeam members from Engaging Solutions
led the charge to engage underrepresentedEngagement

The primary aim of stakeholder engagement was to facilitate inclusive planning, decision making, and cultivate sustainable regional partnerships committed to implementing a shared vision for White River. Therefore, when the White River Vision Plan began, it was important to recognize the other organizations already working hard on their own goals for the White River. The project's primary partners - the City of Indianapolis' Department of Metropolitan Development, Hamilton County Tourism, and Visit Indy - have provided steady leadership, project management and engagement resources to making the project relevant and dynamic.

The goal of Partner Engagement was to establish relationships, exchange information, and draw upon experience to enrich the plan's findings and feedback. Members from many regional partner groups were invited to serve on the stakeholder committee for the WRVP. Groups such as the Nina Mason Pulliam Charitable Trust, Reconnecting to Our Waterways (ROW), White River Alliance and Friends of White River were made aware of the White River Vision Plan and additional opportunities for collaboration and engagement. Several times during the project, client and consultant team members attended and presented at ROW and White River Alliance meetings to ensure key stakeholders could provide input at key milestones during the process.

Appointed Gommittee and Task Force Representation

Early in Phase One, two committees and six task forces were developed. They were formed to educate and engage throughout the planning process, continue relationships in the long-term, consult with stakeholders to guide plan development, and disseminate project information to stakeholders.

The client team provided the foundation for the list by pulling from their knowledge of the river communities, current and past contacts and previous planning studies. The goal was to create an inclusive list with broad and balanced representation including business, government, health, arts and culture and more groups with interests that intersect with the river. Although the original list was diverse in the aspects of discipline, subject matter experts and industry; veterans, youth, seniors and the disabled were not represented. Additional participants were added during the plan process to help shape the conversation and include broad representation from those affected by this effort.

Steering Committee

The Steering Committee provided guidance to the White River Vision Plan as the plan evolved throughout the duration of this process. The committee metregularly during the length of this project to ensure planning remained on track and in line with the evolving goals and guiding principles. Their participation allowed for the inclusion of diverse perspectives and interests. The Committee met seven times throughout the planning process - in 2018 the Committee met on July 12, September 27, October 25 and December 10 and in 2019 the Committee met on January 30, April 12 and May 16. The members of this group are listed in the chart on the next page.

Stakeholder Committee

The Stakeholder Committee met periodically to provide input on plan developments and served as a sounding board for new ideas. The committee represented an array of diverse interests and to this day continue to serve as ambassadors for the plan. The Committee met four times throughout the planning process - in 2018 the Committee met on July 12 and October 25 and in 2019 the Committee met on January 30 and April 12. They helped to identify key opportunities and challenges during each phase of work and reviewed preliminary 'reach' and 'anchor' considerations and recommendations. The members of this group are listed in the chart on the next page.

Task Force Groups

The six topical Task Forces met in sync with the public meeting milestones and served to provide a wealth of technical information and expertise. These task forces also include many of the key members of the Stakeholder and Steering Committees, but focused on the following themes:

- Connectivity and Transportation
- Culture and Heritage
- Design and Programming
- Economic Development and Tourism
- Education and Institutions
- Environment and Water

Task Force groups met three times during the planning process, aligned with major public milestones - on July 11/12, October 24/25, and January 29/30. Members of each of the Task Force groups is identified in the table on the next page.

Public Meetings

Fun, entertaining community events created venues for celebration and helped reinvigorate the planning process for community stakeholders. The content development and implementation of these meetings were led by Engaging Solutions and Agency in close collaboration with Hamilton County Tourism, the Indianapolis Department of Metropolitan Development and Visit Indy. Public meetings were held four times (one of which was a make up session for cancelled meetings during inclement weather in January) at strategic milestones in the process. The meetings were held in three to four sessions in different geographic parts of the region to make them accessible to all communities.

Public meetings were open to everyone and broadcast widely to gain information from the community on the White River Vision Plan (WRVP), hear their feedback and create a setting for people to share their experiences. To ensure everyone who attended the public meetings will be kept informed of project progress, all attendees who provided their email address at public meetings were added to the communications list (an email listserv that was used to share news about the plan process including upcoming meeting dates and important resources).

Phase One

Outreach and communications were critical to garnering strong participation from residents within the study area. On July 10 and 11 of 2018, three public meetings were held over two days of engagement at Noblesville City Hall, Marian University, and Riverside Park. These locations were specifically chosen because they are situated along or near the White River and in different parts of the study area to make it easy for a variety of neighborhoods to attend. The meetings were intentionally held in both Indianapolis and Hamilton County to give residents an opportunity to attend a local meeting with people they recognized from their own community. Understanding that many people work during the day, two of the three meetings were held in the evenings. However, a midday public meeting was held to give people an alternative to the evening meetings.

This first round of meetings introduced the vision plan process and presented a draft of the analysis to the public. Each meeting was structured as an open house with a seven to ten minute presentation to introduce the client and consultant team, review the process, discuss scope and introduce the team's goals for engaging with the five analysis themes - Reveal History, Express Identity, Experience Nature, Connect Communities, and Get Outdoors. Informational, visual meeting boards were grouped together by theme around the room and stationed with a subject matter expert (SME) to explain what was displayed on the boards and to answer theme specific questions. Themed flags were also placed at each station for participants to write comments, memories or questions which they could place on a large map of the river alongside pins that identified where people live, work or go to school, and play.

Over 200 people attended and participated in the three meetings over two days and contributed 214 flag comments to the collaborative mapping activity. In Phase One public meetings, seventy-five percent of attendees identified as White, thirteen percent identified as Black or African-American, ten percent declined to answer and two percent identified as Hispanic or Latino. For a complete list of all feedback received in Phase One, please refer to section Community Feedback.

THANK YOU! Thanks for coming out to say hello and tell us your hopes and concerns for the White River! 8.000 visitors visited our website www.mywhiteriver.com 222 flags were stuck on along the White River map in public meetings

190 people attended our meetings held in three locations along the river

Phase Two

Public meetings were held during Phase Two to craft a vision and guiding principles for the plan and to discuss ideal locations for plan focus areas. Those meetings took place on October 23 and 24 of 2018 in Founders Park, Rhodius Park, and Edison School for the Arts in partnership with Reconnecting to Our Waterways (ROW).

The format of each community meeting began with a short presentation, followed by an open house, or "game night" with themed stations around the room. Subject matter experts from the consultant team were present at each station, where feedback was solicited from each participant and meaningful discussions about the plan's vision and inspiration from other places could take place. Findings about the analysis of the White River were portrayed on boards to provide information and solicit conversations between consultant team members and the public.

In terms of engagement, there were three stations soliciting feedback from the community. One station included a large eight-foot-long map of the river which was a central place for attendees to identify places for preserving, for leaving alone, or for activating using different colored tokens. Another station included cards with images of different places around the world. Participants were asked to weigh in on the cards that inspired them and relate why the image might be relevant to the future White River. The last station was a spinner activity which asked persons to play 'mayor for a day'. The person would spin the spinner which included categories raised by the public during Phase One. The person would then need to respond to the idea or concern with ways they might solve the challenge as mayor. The information solicited from the public was compiled and used to refine the vision and principles for the vision plan - while ideas about places for investment, activation or preservation were catalogued as the team honed in on specific focus areas.

Over 200 people attended and participated in the three meetings over two days. As in Phase One, participants were asked to voluntarily fill out demographic cards to understand plan reach. In all meetings and events in Phase Two which included events targeting outreach to persons of color, the median age of participants was forty-six to fifty-five years of age and sixty-five percent of participants identified as White, eighteen percent identified as Black or African-American, thirteen percent identified as Hispanic or Latino, two percent declined to answer, one percent identified as Asian, and one percent identified as multi-racial. For a complete list of all feedback received in Phase Two, please refer to section Community Feedback.

Phase Three

The final round of public meetings took place at the end of January 2019 when the community provided input on anchor projects for each of the river's reaches. The first and fourth meetings were held at Conner Prairie and Riverside High School on January 29 and 31. A state of emergency was declared due to dangerously cold temperatures on January 30, so the second and third meetings were held remotely via Facebook Live. The City of Indianapolis hosted two make-up Phase Three meetings at the Indianapolis Central Library and Holliday Park on February 13.

In total, Phase Three meetings hosted more than five-hundred and fifteen attendees of diverse backgrounds. An additional 400 people watched the public meeting via Facebook Live. In-person participants were asked to voluntarily fill out demographic cards. The median age of participants remained forty-six to fifty-five years of age, though more people between 25 and 35 years of age participated in person. and seventy-seven percent of participants identified as White, seventeen percent identified as Black or African-American, three percent identified as Hispanic or Latino, and three percent identified as American Indian. For a complete list of all feedback received in Phase Three, please refer to section Community Feedback.

Media Outreach

Team members from Porch Light led public relations and external communications with support from the engagement team and client team to contribute content and review statements or releases before sharing broadly with media. The public relations approach was phased and included the following outreach and press materials:

- Media advisories in collaboration with the Indianapolis Mayor's Office and Hamilton County Tourism for any press conferences or public releases.
- Press releases for the kick-off, all public meeting announcements, and the plan launch.
- A public relations plan in June and July of 2018 for campaigns during and after the first round of public meetings for the White River Vision Plan.
- A Fact Sheet detailing background information on the White River Vision Plan and addressing concerns from stakeholders and the public.
- Key messages and talking points for spokespeople who would give interviews and speak to press during the first round of public meetings and media outreach in June and July.

- Contributions to web content for the landing page mywhiteriver.com.
- Drafted, edited and finalized briefing book for public meetings July 11-12.
- Assistance with social media feedback and updates as needed.
- Long-lead outreach to print publications such as Indy Midtown magazine to garner coverage about the plan and the public meetings.
- Short-lead outreach to print publications such as The Current, The Towne Post, and the Indianapolis Star to cover the White River Vision Plan and the public meetings prior to event date.
- Contributions to segment ideas by phone and email with broadcast media such as FOX 59, NBC affiliate WTHR, and CBS affiliate WISH to cover the public meetings prior to event date.

Work Begins on White **River Master Plan**

Indy, Hamilton County hope to have "guick hits" to implement even before final report next spring

by: Dric Berman | May, 03, 2018

(INDIANAPOLIS) - The firm which oversaw the development of White River State Park is turning its attention to the rest of the river.

Cambridge, Massachusetts-based Agency Landscape and Planning has kicked off a yearlong look at ways to turn the river into a major selling point for Indianapolis and Hamilton County. They'll look at ideas ranging from retail to recreation to environmental restoration.

City and county officials announced the initiative last year, and picked Agency to lead the effort last fall. Indianapolis Mayor Joe Hogsett says the river is an underused asset. Hamilton County Commissioner Christine Altman says the river has the potential to be a signature attraction like San Antonio's Riverwalk.

Indy Metro Development director Emily Mack says the firm will look both at making better use of existing attractions along the river and at creating new ones. And she says the city and county want some "quick hits" that can be implemented even before the final plan.

Indianapolis Senator John Ruckelshaus says the river can connect Indianapolis and its northern suburbs - and offer an antwer to the often-repeated economic development lament that Indiana doesn't have mountains or oceans as a selling point to lure people here. on each side of the county line, but they'll deliver more proposals all along the river's length. (photo courtesy Agency Landscape + Planning) INDIANAPOLIS - Officials from throughout Central Indiana will Thursday kick off the White River Master Plan. Indianapolis Mayor Joe Hogsett's office says the plan aims to develop a comprehensive and coordinated regional vision to enhance and activate nearly 60 miles of the White River.

The city has selected Massachusetts-based consulting team Agency Landscape + Planning to lead a team of partners to develop the plan

Hogsett's office says the master plan will weave neighborhoods, institutions and destinations in central Indiana together and align the White River as a "defining element of Indianapolis.

The city says the plan will enhance quality of life, drive further investment and improve visitor experiences for decades to come, making it a cultural and recreational asset for central Indiana.

The White River Campground Bridge. (Image co Hamilton County Tourism Inc.) Officials from Marion and Hamilton counties are set to take a big step Thursday morning toward transforming the White River into a greater recreational asset for central Indiana.

They are slated to join regional leaders at 9 a.m. at the indianapolis Art Center to kick off the master plan process, aimed at revitalizing a 58-mile stretch of the river, spanning from northern Hamilton County to southern Marion County.

"We don't have mountains, we don't have oceans, but we have this amazing opportunity," said Emily Mack, director of the city's Department of Metropolitan Development.

Aminton County Tourism Inc. J The DMD and Hamilton County Tourism Inc. partnered in July to issue a request for qualifications to select a firm to lead master planning. A selection committee narrowed the nine respondents to three before selecting Boston-based architectural

Gina Ford, a landscape architect, and Brie Hensold, an urban planner, are leading the effort. They have since left Sasak to form Cambridge, Massachusetts-based Agency Landscape + Planning but have retained the White River contract.

The long-term goal of the project is to develop a comprehensive and coordinated regional effort to enhance the White River. Leaders of the effort will meet with the public during the next 12 months to formulate the plan.

Taking a ride on a pontoon boat or enjoying a concert along the river could be ways to enhance activity along the waterway, Mack said.

White River Vision Plan takes form

From: 344 15 Mind sticks Page

A packed room at Noblesville City Hall Wednesday right listened intently as plans to enhance 58 miles of the White River in Hamilton and Marion counties unfolded.

The White River Vision Plan (WRVP), a joint effort between the City of Indianapolis and Hamilton Courty Tourism, Inc., in partnership with Visit Indy's Tourism Tomorrow, Inc., formed in May with a pool to develop a "fiver city" similar to developments in cities such as Nashville, Cincinnati and Ohicago.

It's estimated to be a one-year project, and Wednesday's meeting served as the first of three public meetings in what the WRVP is calling the "discovery phase."

Hamilton County Tourism President/CEO Brenda Myers noted that the project is unique because of the way urban and suburban areas are joining forces to compliment each other.

"Whatever we do up here (in Hamilton County) affects them down there (in Marion County)," said Myers. "We are not here to think about how we can develop the river. We are here to talk about ... how we can make sure people have access to those amenities in a respectfully environmentally controllous way."

Brie Hensold, principal and co-founder of Massachusetts-based Agency Landscape + Planning, followed Myers with closing remarks that focused on the importance of the WRVP.

Several community members approached Hensold during the open-conversation portion of the meeting with concerns over privatizing the river, trails leading to closely to homes, the possible regulation of areas planned for development and, of course, funding.

After the three phases – discovery, envision and action – have been accomplished, the WRPV's goal is to identify the recreational, accessible and cultural aspects of the White River that nurtures a rare sense of community.

The next chance for the Hamilton County community to voice their opinion is scheduled for Aug. 3, at 5 p.m. at Nickel Plate Arts. 107 S. Eighth 51, Noblewills. Another public-input opportunity is set for Aug. 4, at 9 a.m. at the Art Pair on the Square, Hamilton County Artist Association term. Noblewills. Countrous Square.

The WRVP asks the public to attend, writing in a release that, "Community involvement and feedback is central to the development of this plan. As a nexus to connect Central indiana like never before, the White River Vision Plan will incorporate community ideas, feedback, and concerns to ensure that the transformation of the river is truly a community-wide destination for residents and visitors."

Myers knows there's still a lot of work to undertake, but she wants the community to view the WRVP as "your project."

*1 think it's one of the most unique project of its kind in the country to talk about an urban area and one of the fastest growing suburban areas in country working together on a vision for this river." Myers said, "I think we have a lot of people who are passionate ... who know what the river holds, tout we have a lot of people who just drive across the river every single day, and they don't know the opportunities that are there."

Landscape + Planning)

NOBLESVILLE and INDIANAPOLIS - Officials from the city of Indianapolis and Hamilton County Tourism Inc. will next month host the first round of public meetings regarding the White River Vision Plan. The effort aims to promote access to the river for central Indiana residents and visitors through attractions, entertainment venues, trails and neighborhoods.

The public meetings will feature community leaders and design team members presenting analysis findings and gathering feedback from community members regarding the plan. Progress on the effort will also be updated.

"Community involvement is central to the development of the White River Master Plan," said Emily Mack, director of the Indianapolis Department of Metropolitan Development. "As a nexus to connect Central Indiana like never before, the plan will incorporate community ideas, feedback, and concerns to ensure that the transformation of the White River becomes a genuine communitywide destination for all." The meetings will take place at the following dates and locations:

- · July 11: Noblesville City Hall from 6 8 p.m. 16 S. 10th St. Noblesville, 46060
- July 12: Marian University's Paul J. Norman Center from 12 2 p.m. 3200 Cold Spring Rd, Indianapolis, 46222

INDIANAPOLIS, Ind. - Officials in Indianapolis and Hamilton County are working on a plan to enhance 58 miles of the largest river in central Indiana—and they need community feedback.

The White River Vision Plan is a comprehensive strategy to promote access to the river for

residents and visitors. Organizers are exploring ways to connect the city to attractions, arts and entertainment venues, hiking and biking trails and neighborhoods. It will also propose recreational water attractions while keeping in mind the ecological and environmental impact.

The plan under development is designed to promote the following points:

- Access to the White River for residents and visitors our two largest, most important audiences
- The environmental value and ecological quality of the river corridor, including its water quality and natural habitats
- Connection to attractions, arts and entertainment venues, hiking and biking trails, and neighborhoods
- Experiences along the water that contribute to our shared cultural heritage and history

FOX 59 --- ---

First round of public meetings to begin July 11 regarding plan to enhance the White River

Central Indiana leaders have been hard at work to come up with preliminary ideas. They'll present their findings in a series of public meetings, with the first round beginning July 11. Here are the dates and times:

- Wednesday, July 11 at Noblesville City Hall from 6 8 p.m. 16 S. 10th St. Noblesville, 46060
- Thursday, July 12 at Marian University's Paul J. Norman Center from 12 2 p.m. The Center is located on the north end of the campus across from Allison Mansion. 3200 Cold Spring Rd, Indianapolis, 46222
- Thursday, July 12 at Riverside Park Family Center Auditorium from 6 8 p.m. 2420
 East Riverside Drive Indianapolis, 46208

In addition to the public meetings, the project team will hold focus groups, community surveys and other events for residents, property owners, neighborhood groups, businesses, elected officials, tourism officials, environmental advocacy organizations and regulatory agencies.

Once the 12-month planning period is complete, the final plan will be shared. You can keep up-to-date at this website or through Facebook, Twitter and Instagram.

INDIANAPOLIS, Ind. - Officials in Indianapolis and Hamilton County are working on a plan to enhance 58 miles of the largest river in central Indiana—and they need community feedback.

The White River Vision Plan is a comprehensive strategy to promote access to the river for

residents and visitors. Organizers are exploring ways to connect the city to attractions, arts and entertainment venues, hiking and biking trails and neighborhoods. It will also propose recreational water attractions while keeping in mind the ecological and environmental impact.

The plan under development is designed to promote the following points:

- Access to the White River for residents and visitors our two largest, most important audiences
- The environmental value and ecological quality of the river corridor, including its water quality and natural habitats
- Connection to attractions, arts and entertainment venues, hiking and biking trails, and neighborhoods
- Experiences along the water that contribute to our shared cultural heritage and history

First round of public meetings set for White River enhancement project

Central Indiana leaders have been hard at work to come up with preliminary ideas. They'll present their findings in a series of public meetings, with the first round beginning July 11. Here are the dates and times:

- Wednesday, July 11 at Noblesville City Hall from 6 8 p.m. 16 S. 10th St. Noblesville, 46060
- Thursday, July 12 at Marian University's Paul J. Norman Center from 12 2 p.m. The Center is located on the north end of the campus across from Allison Mansion. 3200 Cold Spring Rd, Indianapolis, 46222
- Thursday, July 12 at Riverside Park Family Center Auditorium from 6 8 p.m. 2420 East Riverside Drive Indianapolis, 46208

In addition to the public meetings, the project team will hold focus groups, community surveys and other events for residents, property owners, neighborhood groups, businesses, elected officials, tourism officials, environmental advocacy organizations and regulatory agencies.

Once the 12-month planning period is complete, the final plan will be shared. You can keep up-to-date at this website or through Facebook, Twitter and Instagram.

Leaders in Hamilton County, particularly in Noblesville, are working hard to ensure White River does more than serve as a geographic divider in the city.

The goal? Turn a S8-mile stretch of the river in Hamilton and Marion counties into a major asset that driv recreational programming, development and outure around the water.

In May, Hamilton County Tourism and the Hamilton County Commissioners, namely Commissioner Christine Altman, joined with the City of Indianapolis and Valt Indy's Tourism Tomorrow to kick of the 12-month initia Massachusettes based Agency Landscape + Planning has been hired to lead development. The company works solely on projects almed at cultural development and environmentalism.

Two more meetings will follow in Indianapolis the following day. At the meetings, design learn members will present analysis findings, gather feedback and input from community members, and discuss progress of the plan.

"Hamilton County is proud to be part of the plan to re-think how residents and visitors can connect with the White River," said Brenda Myers, president and CEO of Hamilton County Tourism. "We hold the river in high regard as a part of our heritage and look forward to hearing community feedback about the White River Vision Plan's progress."

More specifically, those involved with the plan say it's being developed for both residents and visitors to have a connector between city attractions. like arts and entertainment venues and trails, to housing in a larger effort to educate on the value of a having a river consider in the community.

Over a 12-month planning period, work will include planning and analysis of current conditions of the river and waterfront areas with a focus on connectivity and programming. Leaders said another key factor is destination development, which would include enhancement of existing places, activation of new spaces and identification of areas in need of significant ecological protection or restoration.

A final plan is expected in spring 2019. For more, visit mwiniterver.com

President and CEO of Hamilton County Tourism Brenda Myers, says their community partners identified the river as a possible point of improvement.

"We have so many organizations right now that are focusing on the river that it seemed like the appropriate time to bring everybody together for a broader vision," says Myers.

Myers says, the vision plan also aims to coordinate the Improvement plans by individual parks like Riverside and Broad Ripple Parks, and organizations like Friends of the White River.

"What we're hoping to do is to sort of gather everyone together under one comprehensive vision and one comprehensive umbreits to think more broadly about what the river can do for Central Indiana residents and visitors," says Myers.

Public input can be submitted during the upcoming meetings or at mywhiteriver.com throughout the six month review period.

Meetings will take place Wednesday at Noblesville City Hall from 6-8 p.m., Thursday at Marian University from 12-2 p.m., and at Riverside Park from 6-8 p.m.

Embracing a Treasure: White River

On May 3. Mayor loe Hogsett joined tourism ailles from Marion and Hamilton counties and Sen. Ruckeishaus at the Indianapolis Art Center to announce the selection of Cambridge, MA-based Agency Landscape + Planning as the lead firm for a year-long master planning effort for the 58 mile White River corridor from downtown Indianapolis to Noblesville. (PDF)

"We're no longer just thinking big about the White River," he said, "We're acting big." The assembled team of nationally recognized landscape design firms - such as DAVID RUBIN Land Collective, and local firm Ratio Architects - would collaborate with the public on crafting a blueprint for the White River's future. 'Their task will be to transform the White River from a natural asset to a true community asset for generations to come, creating an ideal destination for all people and enhancing the surrounding area's quality of life," he said.

Hogsett called the master planning effort, 'Our legacy. Because we are moving forward as a united front to guide our regional growth, Central Indiana will be defined as a healthy, inclusive, and connected community through the 21st century and beyond."

Along with the Nina Mason Pulliam Trust, Visit Hamilton County and the City of Indianapolis, Visit Indy, is helping to fund the master planning effort. Chris Gahl, Senior Vice President of Marketing & Communications said the city's tourism agency sees the White River corridor as being the kind of attraction that would get people to extend their stay. "Research shows that visitors want to interact with water and be on water," he said, "And we have this natural asset but it's not fully being utilized."

Gahl points to the recently completed Tourism Master Plan that describes where Indy tourism should be by 2025. "We spent two years asking key stakeholders their thoughts on how could indy tourism benefit by 2025. Armed with two years of research and feedback from 2,200 people, we emerged with a handful of key priorities that both tourism, philanthropic, government and non-profits thought we should steer in same direction. One of the handful was better activation of White River."

That's why the White River is a top priority for Visit Indy. "Our visitors spent on average 3 days and with better activation of White River year-round we could also increase the length of stay and the share visitors with counties north, south, east and west." Moving the White River from the background to the foreground of the city's efforts to improve local quality-of-life and attract both residents and visitors is not limited to downtown. "We don't want to set boundaries to activation of White River." Gahl said, "We want to inspire a better way to activate the River."

A series of public meetings will be scheduled to solicit public input. Details and updates are available at:

White River Vision Plan enters idea development phase

POSTED BY: THE REPORTER

The next phase of community meetings to collect feedback from residents for The White River Vision Plan kicks off Oct. 23.

The White River Vision Plan is a community-driven effort led by the City of Indianapolis, Visit Indy and Hamilton County Tourism, Inc. to enhance 58 miles of the White River in Indianapolis and Hamilton County. Community members also can provide thoughts and ideas directly using a survey posted on mywhiteriver.com.

Public meetings during the second "Envision" phase of the White River Vision Plan will involve discussions and ideation around the community-led vision for the plan. Participants will help prioritize potential focus areas for further study, including destinations, recreational opportunities and accessibility opportunities. Programming, market research and unique riverfront events and features all will be considered. New destinations and recreational assets will focus on areas with ecological, historical, cultural, significance and important neighborhood adjacencies.

"The second phase of the White River Vision Plan is very exciting because it gives the community a moment to think really big," said Emily Mack, director of the Department of Metropolitan Development for the City of Indianapolis. "Because access to the river is practically non-existent in a large part of the study area, how we transport ourselves by foot, car, or bicycle will be one of the largest points of discussion during this time."

White River revitalization group plans series of public meetings

A plan to revitalize 58 miles of the White River from Indianapolis to Hamilton County has entered its second phase.

Three public meetings are scheduled next week to give residents a chance to offer ideas to county and city officials for what they'd like to see along the White River.

Earlier this year. Visit lindy, the Indianapolis Department of Metropolitan Development and Visit Hamilton County kicked off an effort to create a master plan to enhance activity along the river. The White River Vision Plan calls for learning more about the river's condition, what it offers to the communities it runs through and what residents would like it to offer in the future.

Planners envision more restaurants, retail and recreational opportunities for the river's 58-mile stretch through Marion and Hamilton counties. And officials hope to couple such amenities with efforts to protect and preserve the waterway.

The long-term goal of the project is to develop a comprehensive and coordinated regional effort to enhance the White River. Leaders of the effort plan to meet with the public throughout the process.

The second phase, called the envision phase, involves discussions and forming ideas around the community-ied vision for the plan. Participants will help leaders prioritize potential focus areas for further study, including destinations, recreational opportunities and accessibility opportunities.

Community meetings start next week. Brad Beaubien from the indianapolis Department of Metropolitan Development, says they'll be more than open house formats.

"We'll have a series of timed presentations where you can stop in and learn about where we are at in the process and then we'll have a series of activities where you can start envisioning what you would like to see along the river," Beaubien says.

Participants will help prioritize potential focus areas for further study, including destinations, recreational opportunities and accessibility opportunities. Programming, market research, and unique rivertiont events and features all will be considered. New destinations and recreational assets will focus on areas with ecological, instancial, outlinut, significance and important neightporthood adjocencies.

Beaubien says they already collected public feedback.

We've heard that there are places where people want to leave alone that we want to restore and store their ecological function and kind of preserve them as wild places," Beaubien says. "We've also heard there are places where it's appropriate to heve more activity along them."

Phase two of White River Vision Plan begins

INDIANAPOLIS, Ind. – "I just figured it was a good day to come out," said Gerald Hardister, a fisherman enjoying a beautiful fall day on the White River.

"I enjoy a good fight. That's what I care about... the fight from the fish, I enjoy that."

Hardister says he's been fishing the White River for more than 60 years.

"Been fishing here in different spots all my life really," Hardister said. "Ever since I was a little kid."

He's seen how bad the White River was, and also how it's changed

"It's a lot better now," Hardister said. "I wouldn't say its great, I would say that it still needs a lot of cleaning up. But if I was gonna be the judge of where it was and where it is, it's totally different."

From fishing to boating, the White River has a lot of potential. Potential that caught the eye of officials in both Marion and Hamilton counties.

(INDIANAPOLIS) - Proponents of a plan to revitalize a 58-mile stretch of the White River in central Indiana are bringing their ideas to the people this week in three public meetings.

The White River Vision Plan's supporters envision more restaurants, retail and recreational opportunities along the river's course in Indianapolis and Hamilton County.

The plan that's being moved along by Visit Indy, the Indianapolis Department of Metropolitan Development and Visit Hamilton County would be coupled with efforts to protect and preserve the river.

The Indianapolis Business Journal reports the group is planning a Tuesday evening meeting at Founders Park in Carmel, followed Wednesday by an afternoon gathering at Indianapolis' Rhodius Park and an evening meeting at the city's Edison School of the Arts.

Public feedback can also be left through an online survey.

Elizabeth Mahoney has lived half a mile from the river for more than 20 years.

"What I'd love to see is a river that's clean," she says. "I'd love to see a river that is swimmable, that's enjoyable. But I think we're a long, long way from that."

Mahoney says, right now, swimming or eating the fish from the river isn't a good idea because of pollution from farm runoff and industrial waste. The plan's architects say though it didn't top the list, cleaning up the river will likely be necessary to achieve the community's other goals.

White River Vision Plan enters idea development phase

POSTED BY: THE REPORTER

The next phase of community meetings to collect feedback from residents for The White River Vision Plan kicks off Oct. 23.

The White River Vision Plan is a community-driven effort led by the City of Indianapolis, Visit Indy and Hamilton County Tourism, Inc. to enhance 58 miles of the White River in Indianapolis and Hamilton County. Community members also can provide thoughts and ideas directly using a survey posted on mywhiteriver.com.

Public meetings during the second "Envision" phase of the White River Vision Plan will involve discussions and ideation around the community-led vision for the plan. Participants will help prioritize potential focus areas for further study, including destinations, recreational opportunities and accessibility opportunities. Programming, market research and unique riverfront events and features all will be considered. New destinations and recreational assets will focus on areas with ecological, historical, cultural, significance and important neighborhood adjacencies.

"The second phase of the White River Vision Plan is very exciting because it gives the community a moment to think really big," said Emily Mack, director of the Department of Metropolitan Development for the City of Indianapolis. "Because access to the river is practically non-existent in a large part of the study area, how we transport ourselves by foot, car, or bicycle will be one of the largest points of discussion during this time."

White River Vision Plan unveiling kicks off weeklong celebration

POSTED BY: THE REPORTER MAY 26, 2019

The White River Vision Plan will be unveiled during a press conference at 9 a.m. on June 3, In the Indianapolis Art Center, followed by a week of celebratory events and activities along the White River in Indianapolis and Hamilton County. The final plan is a community-driven effort led by the <u>City of Indianapolis</u>, <u>Yisit Indy</u> and <u>Hamilton County Tourism</u>, <u>Inc</u>, along with many other partner organizations to determine enhancements for 58 miles of the White River.

The White River Vision Plan kicked off in May 2018 and included 12 months of research, discovery and development by core team members from Agency Landscape + Planning, RATIO Architects, DAVID RUBIN Land Collective, Applied Ecological Services, Engaging Solutions, Heritage Strategies, HR&A, Land Story and Christopher B. Barke Engineering.

Community members and residents also played an imperative role in shaping the plan by participating in interactive online surveys and attending nearly a dozen community feedback meetings.

The final plan will highlight areas along the river slated for new destinations, recreational assets, restoration and preservation. Areas were chosen based on ecological, economic, historical and cultural significance and important nearby neighborhoods.

To celebrate the release of the White River Vision Plan, a series of activities and events will take place June 3 through 7. Click here for a detailed list of events, including times, dates and locations.

"We are excited to unveil this historic plan which will include community feedback that has been genuinely included into the plan," said Emily Mack, director of the Department of Metropolitan Development for the City of Indianapolis. "The process has made the bond between Marion and Hamilton counties even stronger and has opened our eyes to the possibilities when communities come together for a common purpose."

Hamilton County Tourism Inc. Chief Executive Officer Brenda Myers says the goal of the project is to make the White River more prevalent in the eyes of central Indiana residents.

In an interview with Inside INdiana Business, Myers said the developers are using nine principles as a framework for the project.

"They range from protecting wildlife and the environment to protecting ownership along the river. Those nine principles are really focused on making the river first and foremost important in our lives so that we care enough about it to take care of it. One of the things we heard loud and clear from residents is they want access to the river, they want the river to be cleaner, (and) they want us to protect the river. Striking a balance between the health of the river and use of the river I think will be critically important as we move forward."

INDIANAPOLIS (WTHR) - The White River Vision Plan has been released.

Input from some 13,000 people was considered.

The plan covers cleanup, year-round activities and development. Projects include reworking dams to allow for outdoor recreation and adding a regional trail, play spaces and beach areas. There will also be a push to connect retail spaces to the river.

Cleanup events are already being planned for Tuesday with one in Indianapolis and one in Hamilton County. You need to signup to help.

Those events run from 10 a.m. until around noon.

White River plan focuses on water quality and recreation over several decades

INDIANAPOLIS, Ind. – A comprehensive plan to turn the White River into a regional attraction took another step forward Monday with the unveiling of the White River Vision Plan.

Area leaders from Marion and Hamilton counties were are on hand to show the images that aim to make the river a clean, natural, historic, connected, and active asset for Indianapolis and the surrounding area.

"The idea of a free flowing river that you can kayak or canoe from Noblesville to downtown Indianapolis, chains of destinations along the river so the parks and little rest areas, trails all sorts of ideas like that," Brad Beaubien with the Department of Metropolitan Development said.

The plan is a community-driven project to enhance 58 miles of the river between the two counties. It stretches from Strawtorn Koteewi Park in northern Hamilton County to Southwestway Park on the south side of Indianapolis. It calls for hundreds of millions of dollar to be spent over the next several decades to improve the water quality and add more parks and trails along the river.

INDIANAPOLIS (WISH) -- Area leaders on Monday released a long-term plan to change the look of the White River in downtown Indianapolis.

Officials with Indianapolis, Hamilton County tourism and other government sources spent three years developing a plan for 58 miles of the White River.

PDF: Read the White River Vision Plan

There are dozens of proposed areas for redevelopment along the White River. Officials mentioned the old General Motors stamping plant on East Washington Street as an example. There are also several bridges and other structures from Broad Ripple north to Hamilton County that have the potential for nearby retail and residential development.

Emily Mack, director of the Indianapolis Department of Metropolitan Development, said some areas are better left alone "where it is not appropriate to have development or even feasible." Some of those areas include privately owned farmland or areas that are difficult to access due to lack of or roads and trails.

The conservative price for this 30-year plan is in the billions. But, nothing will get done without a management structure, which officials hope to have in place before summer ends.

Indy, Hamilton Co. leaders unveil new plan for White River

Poetest: 405 PM, Jun 03, 2019 Updatest: 6:50 PM, Jun 03, 2019

INDIANAPOLIS -- Community leaders on Monday unveiled a regional plan to enhance 58 miles of the White River in Marion and Hamilton counties.

The White River Vision Plan is designed to provide a roadmap for making the White River a clean, natural, historic, connected and active asset for central Indiana to enjoy.

"Communities along the White River are experiencing a remaissance," Indianapolis Deputy Mayor Jeff Bennett said. "Downtown development is accelerating, arts and cultural institutions are expanding their visions, and parks and trails have contributed to a flourishing public realm. The White River is the next frontier."

White River Vision Plan released

Present law 94 2029 Oktob AM 2017 Monthly Jun 54, STOR DOCUMENT

INDIANAPOLIS (WISH) - It's taken three years to develop the White River Vision Plan.

On Monday, tourism and government leaders finally released their vision.

According to their website, the White River Vision Plan is a collaborative effort between Hamilton and Marion counties in order to develop the 58 miles of the White River in those two counties.

The director of the Department of Metropolitan Development for the city of Indianapolis, Emily Mack, and the president and CEO of Hamilton County Tourism, Inc., Brenda Myers, both stopped by Daybreak Tuesday.

They discussed why it took these years to develop the plan, plans to improve the water quality and how they are going to draw individuals to the White River.

The White River is about to get a major face lift, according to the new White River Vision Plan unveiled by Marion and Hamilton County officials Monday. That regional plan sets a course to enhance 58 miles of the White River over the coming years and decades.

The announcement culminates a 15-month process of studying the river and accepting more than 13,000 comments and ideas from community members on their dreams for the future of the waterway.

"Today is celebratory because it completes one phase and starts another," said Brenda Myer, CEO and President of Hamilton County Tourism, referring to putting the plan into action. "Not to make a pun, but we don't always know what will be around the river bend, it sometimes can be rough but it can also be really exciting."

Community Leaders Reveal Future Plans for the White River

NICAH YASON 🔽 🚺

Central Indiana leaders gathered Monday to reveal their plans to enhance 58 miles of the White River across Marion and Hamilton counties

The goals of these efforts are to improve water quality, increase public access, and foster a greater appreciation for the White River. This plan is led by a team at Agency Landscape and Planning.

Co-founders of the agency, Gina Ford and Brie Hensold, say that they want people to fall in love with the river like many of

those who spend their time on it. During the presentation at the Indianapolis Art Center, Brie Hensold read a comment they received at their thirst public meeting.

"Someone wrote down, "My daddy fished in the White River in the "30s and '40s. We'd catch fish and fly them and eat them on the bank. He requested his ashes be left at his favorite fishing spot." So, this is a place that is timeless," Hensold says. "This is a place that endures and this is a place that we want to continue to invest in, so it can create more memories for more generations in the future."

There are nine principles that the White River Vision Plan works under. They are restoring and adapting the river's surrounding environment, enhancing community stewardship of the river's health, increasing yearround activities, drawing people to the newr, building on the river's history, expanding the river's role to build regional economic strength, celebrating the diversity of the region's communities, balance community sentiments with existing owners and residents, and creating partnerships to collaboratively manage the White River system.

Hamilton County, Indy city officials unveil new vision for White River

POSTED BY: THE REPORTER 5.NE 5, 2019

Indianapolis Deputy Mayor Jeff Bennett, Hamilton County Commissioner Christine Altman and Jeaders from throughout Central Indiana gathered Monday to celebrate the unveiling of the White River Vision Plan – a comprehensive and community-driven regional plan to enhance 55 miles of the White River in Marion and Hamilton counties.

"Communities along the White River are experiencing a renaissance. Downtown development is accelerating, arts and cultural institutions are expanding their visions, and parks and trails have contributed to a flourishing public realm," said Bennett. "The White River is the next frontier."

Monday's event brought together civic and community partners and stakeholders from Marion and Hamilton counties to get a first look at the plan presented by Agency Landscape + Planning, the lead planners and architects on the project. Agency collaborated with a team of local Indiana and national experts including Applied Ecological Services, Christopher B. Burke Engineering, DAVID RUBIN Land Collective, Engaging Solutions, Fineline Graphics, Heritage Strategies, HR&A Advisors, Land Story, Porch Light Public Relations, Project Photo Docs, Ratio Architects, and Shrewsberry.

The plan describes a shared vision for the two-county river area and dives deep into nine principles that will guide decisions about environmental and ecological health, equity, public safety and activation.

From north to south, every area of the river corridor is considered and organized into "river reach" zones where new ideas respond to each community's distinct character. The plan details in-depth explorations of seven "anchor areas," such as commercial corridors, historic districts, cultural destinations and catalytic program opportunities along the 58-mile stretch of the White River. Each anchor has its-specific recommendations that all add to the varied nature of the White River experience.

INDIANAPOLIS RECORDER

The White River is getting a facelift, and you can help shape what it looks like

Clocking in at 220 pages, the White River Vision Plan Draft is the culmination of 15 months of community partners across Marion and Hamilton counties working together to reimagine what the White River can look like. But they're not quite done, and there's still time for you to get involved and share your ideas for the river.

The Indianapolis Department of Metropolitan Development and Visit Indy, along with other organizations, unveiled the plan's draft June 3. The plan affects a 58-mile stretch of the White River and includes specific zones to respect the character of each community along the path. The plan will be posted for 30 days on the White River website, **mywhiteriver.com**, where community members can submit public comments.

The committee will make any final edits to the plan and reveal a final version later in the summer. Through earlier phases of planning, the committee received more than 13,000 comments and ideas from community members.

"The work is just starting," said Brenda Myera, president and CEO of Hamilton County Tourism. "Today is celebratory because it doesn't just close one phase of planning; it opens another."

By Lisa Gauthier Mitchison

After more than a year of collaboration, officials from Hamilton and Marion counties unveiled the White River Vision Plan at a June 3 press conference in Indianapolis.

"It's not every day that indianapolis partners with Hamilton Courty, but it's been an absolute pleasure," said [lmily Mack, director of the indianapolis Dept. of Metropolitan Development. "It's been a wonderful collaboration."

The plan divides Sill miles of the White River into panes imanded to reflect the character of the surrounding community and identifies seven anchor areas for exploration. Propositiv within the anchor areas include a new trail from Noblesvilles' Potter's Bridge Park to Cioenc: a viewing tower at Strawtown Kotseen Park; enhanced new access in downtown Noblesville; improved pediestrian crossings at Allisonville Stretch near Conner Praise; and outdoor adventure atchiefes at Oliver; forossing near F465.

"Partners of the White River has three goals: Improving water quality, increasing public access and fostering a better appreciation of the value of the White River, all of which are embedded in the White River Plan," said. Gene D'Adamo, CEO and president of the Nina Mason Pulliam Charitable Trust, which provided grant money to Partners, of the White River.

Hamilton County Tourism President/CEO Brienda Myers said it's time to put the many months of planning into action.

"When we embarked 13 months ago, we had three phases to this endeaver: discover, envision and action. And I think I would remaine action to activate because now we are at the point where we need to think about activating all this planning." Myers said. "The planning team respected commonly and they respected ownership, and I think heyve formulate a gian this works for everyone and anyone. This is a neer that is an asset for everyone so enjoy."

Digital Tools

Supporting in-person engagement efforts, digital tools were deployed including a project website, social media platforms, and online feedback forms or surveys. The use and reach of these tools is described in detail below.

PROJECT WEBSITE

The project website is both a communication tool and a way to further engage the brand with a diverse and broad audience. The domain name, mywhiteriver.com, was selected specifically to emphasize the importance of connecting individual residents to the river and their personal responsibility in its future.

The website was designed to be clear and easy to use. With large font, photos and event postings, it provides visitors with background information for the plan, a timeline and various ways to keep in touch with what is going on including email updates, Twitter, Instagram and Facebook.

Overall website feedback has been positive. Most have stated how happy they are that a plan is finally being developed because it is long overdue. Others are excited because they believe it will provide more clean-up to the river as well as better opportunities for fishing. Some expressed concerns that, with increased development, there will be more pollution, destruction of the ecosystem, increased flooding and loss of land.

SOCIAL MEDIA

Throughout the development of the White River Vision Plan, social media outlets such as Twitter, Facebook and Instagram played a vital role within the communication strategy. The plan not only included methods of engaging the public, but also listening to responses from the public. It was intentionally used to:

- Introduce and promote the WRVP brand.
- Advertise public events and meetings.
- Highlight the river and its assets.
- Educate the public on its history, regional placement and position within the ecosystem.
- Share experiences and stories about the White River.
- Track public engagement and provide answers to simple questions or direct more complex questions to the proper resource.
- Monitor and address concerns by referring to current public relations messaging and responding as a team.

Throughout the process, social media platforms were continuously updated with news and events, including photos and videos. Additionally, public engagement on the platforms increased as participation built. As of July 2019, Twitter added 563 new followers and 2,189 profile visits. The WRVP Facebook page has also had successful participation; 10,706 users have been reached organically. Within that reach there have been 3,810 opportunities for engagement.

ONLINE SURVEYS

Three surveys and one interactive mapping activity were shared via the project website to solicit feedback from the public ahead of key milestones. The Maptionnaire interactive map asked respondents to identify where they live, work and relax or play along the river as well as to identify key areas of concern and areas of opportunity to inform the second phase of work. Respondents placed icons and added comments to their placed icons on a map of the study area. In total, 350 people participated in the online mapping activity, and 1,513 people responded to question and answer surveys. For more information about how people responded to online surveys, please visit the Community Feedback section.

In-person community conversations

Several additional community meetings were held and existing events attended to get feedback from local residents in the places they frequent. The City of Indianapolis held meetings with the residents of the Northwest Perry Neighborhood Association and Indy Hub, a young professionals segment of the Indy Chamber. Hamilton County Tourism, one of the White River Vision Plan Partners, also held two additional meetings with the Fishers Rotary and Southwest Quad neighborhood to gain their feedback and address concerns. Twenty-six residents attended and shared their concerns about their land, adding trails and possible rules for the for the access and use of the river.

The team facilitated a Versprille Home Meeting on the evening of July 25, 2018. Twenty-five residents and property owners attended, to voice their concerns. Collectively, one group of property owners holds roughly 945 acres of land adjacent to the river and five and a half miles of that land is along the White River riverbank. During the discussion, seven concerns were identified around economic development and local business support; connectivity and private property; crime and trespassing; regulations; maintenance and flooding; and stormwater management. Over eighty-four neighborhood associations, civic organizations, and community groups were also reached in a multitude of ways throughout the twelve-month process. Client and consultant teams attended, participated and presented to these organizations during regular meeting times and shared updates with organizations about the plan through the MyWhiteRiver listserv. Team members from Engaging Solutions also reached out to several community leaders representing underrepresented populations in Phase One of the planning effort. These populations included persons of color, youth, young professionals and populations who speak English as a second language.

Plan Kick-off Week

On June 3, 2019, a public unveiling of the White River Vision Plan began a week of public activities and events along the White River. The plan was revealed at a public press conference in the Indianapolis Art Center, the first in a series of events and activities taking place between June 3 and 7. The week long celebration of the plan included a raft float along a segment of the river, several riverfront clean-ups, drop-in art activities, waterfront dining specials, a series of short film screenings, a Canoe to Work Day, Yoga in the Park and several riverside concerts throughout Indianapolis and Hamilton County.

Building upon 12 months of research, discovery and development, the planning effort culminated in a document that was shared broadly online and in the media and shared through a printed executive summary that was formatted as a 'visitor's map' or brochure.

Community Feedback

The following section summarizes feedback from the public in each phase followed by complete tables of all feedback by phase and activity.

Phase One Feedback

Engagement Key Themes

All feedback from meetings and surveys are compiled into the following section charts. The comments and ideas covered many topics that impact the White River and the way people interact with the White River. The topics were organized as follows:

- Water access
- Water quality
- Recreation
- Healthy growth and development
- Nature
- Infrastructure (dams, levees)
- Transportation
- Events and attractions

Water access and transportation consistently ranked as the most discussed idea for the White River. Ideas ranged from opportunities for new trailheads to concerns about bridge construction impacts on bicyclists and places for parking during events. Participants also noted a need for more water access, both visual and physical, to the water – an idea rooted in the limited relationship between the communities along the river and reduced negative perceptions of the river. The community also asked to limit development and respect private property along the river.

I am thrilled to hear that the White River is becoming a priority for the city! It is a huge resource and if done right, can be another big draw to the city.

rights of riparian owners, especially farmers, be a priority in the plan?

Many happy memories canoeing and fishing, and my parents even got married on an island on the river. I look forward to seeing the river become a sought-after destination.

Enjoy nature, Personal/ individual fitness (running, etc), Would love to have the swim of a triathlon on the river.	Swimming access near IUPUI (1.2 miles)	Hosting an Ironman triathlon annually that would have over 2K participants	Triathlon! Event space, 100% pet friendly, Community (free) workout trail, Oak course	I look forward to taking advantage of it!	46205	46202
Personal/individual fitness (running, etc), Gathering with family or friends	water quality & accessibility	A destination with activities on the water; dining along the river; nightlife along the river.	Restaurants, bars, coffee shops, live entertainment venues.		46204	46204
Birdwatch, Enjoy nature, Picnicking, Gathering with family or friends	Water quality	I think it is important to keep natural spaces but if it is cleaned up, maybe a few more dining options and adventurous activities would be nice, closer to the downtown area.	Benches and picnic tables, sandwich shop, maybe some casual dining.	I would love to be able to kayak in the river. Right now it just seems too risky with the water quality.	46234	46278
	I would love for their to bridge over the White River to connect with the Monon Trail! We live at 71st and Keystone, and we have to bike about 20 minutes around Broad Ripple to meet up with trail.	I would love for the White River to be a destination. A nice place to sit outside and have dinner or coffee, especially north of Broad Ripple!	Restaurants, Coffee shops!		46240	46208
Farming. I make my living from land we purchased along the river	Removing the islands in the river from down trees	My dream is for my grandchildren to be able to help farm the land I now farm	No trespassing on our farms	I believe my family cares for our land in the best way we know to allow the next generation to continue farming these properties.	46060	46060
Personal/individual fitness (running, etc)	Water quality.	Make it clean enough to swim in.	Running trails, public restrooms, water fountains, art.		46205	46205
Shopping or dining	water quality	Would like a river taxi as a way to travel to/from downtown to noblesville. There could also be river boat excursions that focus on Indiana's history along the way. Would also love a river-focused extension of Conner Prairie as I trust them to develop in a way that preserves nature and the river.	Would love to see more bridges that cross the river that also have another function such as a gathering place, performance or classes, food, or retail space. Similar to the Rialto bridge in Venice. Various bridges could be used for specific thingsone has restaurants, one has performances either on the bridge or in the surrounding water; another bridge could have small retail shops available only to Indiana artists/craftsmen/businesses; another bridge could be a water- centric playground on it. All of the bridges could be involved in a city-wide Bridge Fair once a year. Stop thinking about only adding new things along the river's edge everyone does that. What can Indiana do that is unique and would become a tourist destination?	The most important thing is to clean it up and preserve nature.	46236

WHERE DO YOU ACCESS NATURE ON THE RIVER?
I live along or within a half mile of the river., I own property along the river.	Motorized boat		Broad Ripple Park, Central Canal Towpath Trail, Holliday Park, Indianapolis Zoo, Lucas Oil Stadium, White River State Park	Broad Ripple to Keystone at the Crossing	From my back yard (live on the river)
I visit the river.	Bicycle, Car	Programs or destinations are not interesting to me	Indianapolis Canal/Cultural Trail, Indianapolis Museum of Art, Indianapolis Zoo, Lucas Oil Stadium, NCAA Hall of Champions, Victory Field	The riverwalk downtown	I typically do not access nature on the river

We live in downtown INdy and would love to see the river developed.	Car, Walk/Run	The river is dirty	Broad Ripple Park, Central Canal Towpath Trail, Indianapolis Canal/Cultural Trail, Indianapolis Museum of Art, The Virginia B. Fairbanks Art Nature Walk, White River Gardens, White River State Park		Downtown - White River Park
I visit the river., I am not directly affiliated with the river, but I am interested in the plan., I used to visit river when I was younger to raft with friends	Bicycle, Car, Walk/Run, Kayak, tube, or canoe	Limited places to see the river, The river is dirty, The river was dirty or had a history so although we rafted it we avoided much contact with the water directly.	Hazel Landing Park, White River Canoe Company, We used to go to a park (I think Hazel Dell) that had an old concrete entry point and then would get off later before River Rd and 146th to a old wood fishing spot right before prarie trace/moffett farms and some old abandonded shack before they started working on river rd.	I think that area would be a great area because there is already a trail way near the golf course that partially goes through therethere are lots of neighborhoods with kids that likely would love to do that (I know I would have). Having a provided kayak or selected days with guides might be a good idea.	
l visit the river.	Car, Kayak, tube, or canoe		Forest Park Aquatic Center, Lake Indy Boat Ramp, Potter's Bridge Park		Not sure if I understand the question as stated. I wade fish and fish from a kayak. I have come across Deer, beaver, weasels, Largemouth bass, Smallmouth bass, catfish and various panfish.

l own property along the river.	Fishing guide on the White River from a drift boat	High muddy water from rain	Broad Ripple Park, Butler University and Athletic Fields, Central Canal Towpath Trail, Conner Prairie, Lafayette Trace Park, River Bend Campground, River Road Park, Strawtown Koteewi Park, White River Campgrounds, Perkensville boat launch	The whole stretch from Perkinsville to 116th street	Perkinsville, Lafayette Trace, White River Campgroud, 146th, and 116th streets

WHAT TYPES OF ACTIVITIES DO YOU PARTICIPATE IN ALONG THE RIVER?	IF YOU COULD FIX ONE THING ABOUT THE RIVER TODAY, WHAT WOULD IT BE?	IN 5 TO 10 YEARS, WHAT IS YOUR DREAM FOR THE WHITE RIVER? HOW SHOULD IT GROW AND CHANGE, OR WHAT IS IMPORTANT TO KEEP THE SAME?	WHAT KINDS OF ACTIVITIES OR AMENITIES SHOULD BE AVAILABLE ALONG THE RIVERFRONT?	IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
Personal/individual fitness (running, etc), Recreational boating (sailing, motoring)	Water quality	More navigable areas, more visibility - Broad Ripple backs up to it, yet there are no restaurants that have big decks overlooking the river. Would love to have a restaurant you can boat to.	A variety - anything that's appropriate for the area it passes through - trails, playground, coffee shop, restaurant	Love that the cities along the river are giving it more attention. It's a wonderful resource and beautiful area most people don't know exists.	46240	46220
Group fitness (classes, group sports), Shopping or dining, Picnicking, Gathering with family or friends	more food and bev options along the riverwalk. longer riverwalk.	see above. same desires	restaurants		46234	46032
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Shopping or dining, Recreational boating (sailing, motoring)	Dredge to make deeper	Boating access	Restaurants		46240	NA
Enjoy nature	Clean up the access to the river and make it navigable.	That we can make it a centerpiece for Indy like San Antonio or Cincinnati.	All of the above and more.	River development would be a wonderful addition to our great city.	46202	46202
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Water Quality is a huge ask, but if it could be done in select areas where it was very clean I would really appreciate that (reduced debris, cleaner water, faster moving water) Although water access is more likely.	Having grown up in Texas I have seen the River Walk and although my expectations are limited I know in part it could work in the right area because of the width of the river.	I would say coffee would do well downtown or maybe somewhere in the suburbs near Carmel or perhaps Fishers probably near a walkway or bridge where people run and maybe an access point with a bench for people to relax and cool down or warm up.	I think any improvement would be greatAn outdoor area in the suburbs or downtown maybe near the park with a small venue for music might be good. Dippin Dots or a local franchise of that sort might be a good draw.	46037	46037
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Stress and pain relief because being on the river keeps pain down	More boat ramps and remove all the trash	Clean, more ramps and people know that it's a great place to relax and learn about nature.	Boat ramps, kayak launch areas, recreation classes, benches, restrooms	Everyone needs to do their part in keeping the White River clean	46224	46224
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water access				46038	46278
Birdwatch, Enjoy nature, Fish or hunt	Water Quality and would like to see smallmouth catch & release expanded from the current slot limit	Focus on water quality, stock more fish, better accessibility, and limiting CAFO's & fertilizer runoff	recreation classes, canoe & kayak program like the scooters downtown	I would like to see it have one of the top smallmouth fisheries in the country!	46250	46250

l visit the river., l am not directly affiliated with the river, but l am interested in the plan.	Bicycle, Car	Too far from where I live or work, Feels unsafe at night, Feels unsafe during the day, Limited places to see the river, The downtown stretches of the river are comparatively barren, with so few trees.	Conner Prairie, Indianapolis Canal/Cultural Trail, White River State Park	The area on the Monon north of Broad Ripple is the prettiest and most natural section of the White River that I've seen.	The downtown section of the river feels barren and unnatural, so we have to drive out to Riverside Park or the IMA to access nature along the river.

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Water Ski	Speed at which rainwater diverted to the river/Water Quality.	Improve water quality (lessen intro of pollutants and farm/lawn nutrients); Slow the flow of storm runoff from paved surfaces to the river; Balance improved access with natural settings; Avoid "development" that detracts from natural beauty of the river.	When the riverfront passes through an already established commercial area I'd love to see places to buy coffee, get lunch/dinner, etc. Wherever there is a walkway along the river, benches are suitable, too. Playgrounds along the river invite bad outcomes for kids who can't swim or don't have caring and alert adults on hand. CAUTION! Not sure that "playgrounds" along the river are a good idea.		46220	46240
Enjoy nature, Gathering with family or friends	Restore native habitat along its full length.	Td like to see trees planted along the downtown stretches to restore habitst and create more functional recreation spaces where there are now barren lawns. I di like to see invasive species cleared and undergrowth thinned on the banks in Riverside Park and other areas to that you can actually see the river from the White River Trail (it would feel a lot safer, too). All the levees are a big challenge, since they cut off views of the river in so many areas; could we raise the grade behind them to turn these barriers into recreational space with a view of the water? I'd like to see a comprehensive trail system along the river connecting to Indy's other greenways, parkways, and trails. Water quality is a huge issue, and that will require state-level policita action to cut pollution and combined sever overflows. The stretch of the White River Trail along the Zoo is very nice. The Waterway Boulevard pumping station area was intended to be a park and could be a wonderful public space near downtown. Riverside Park was Indy's flagship park and, even though it has been neglected for 50 - years; it has great potential, particularly if the golf courses are turned over to a more functional (and less toxic) use. The Scioto River at Columbus, Ohio, went through a major restoration over the last free years, transforming it from a similarly sad, barren, and inaccessible flood-control channel into a beautiful riverfront with expansive public recreation space and habitat.	A comprehensive trail system, planned transit-oriented development nodes with commercial space and neighborhood services, actively-programmed recreational activities and partnerships that ensure that neighborhood and community groups actively use the riverfront and incorporate it into their identity.	The White River has great potential and we must work to give future generations a beautiful riverfront that is a part of a thriving urban forest, a comprehensive trail and park system, a clean watershed, and a healthy and nurturing habitat.	46204	46204
Enjoy nature, Gathering with family or friends	Restore native habitat along its full length.	I grew up near the Wabash and, by comparison, the White River in Indianapolis has always seemed abused, neglected, undervalued, easily-forgotten, and inaccessible. Much of this has to do with its location so far from downtown (1 mile through the dead west side of downtown and the barrier-like government and convention center district between Monument Circle and the White River versus 2 blocks to the Wabash from the core of Downtown Lafayette through well-used public spaces) and the status of near-Downtown riverside neighborhoods within a highly segregated metro area. The stretches of the river in the suburbs are much prettier and nicer, but they are also very far from downtown and most of the core neighborhoods. Development along the river could bring more population and thus more people using the river. "	A comprehensive trail system, planned transit-oriented development nodes with commercial space and neighborhood services, actively-programmed recreational activities and partnerships that ensure that neighborhood and community groups actively use the riverfront and incorporate it into their identity. Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	The river needs to be dredged in Noblesville between SR 32 and Field Drive. It is either so low that it seems like you can't pass through in a canoe, or it is so high that is floods SR 19.	I would love to see river development along downtown Noblesville to support restaurant and bars with outdoor seating.	Look at Indy's Canal walk. There's your answer.		46060	46032

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Group fitness (classes, group sports), Picnicking, Gathering with family or friends	Bridges that accentuate/invite. We drive over the river sometimes without even noticing it's there bc it's been designed as a car sewer w maximum car flow as the only consideration.	People in my neighborhood will ride a bike or walk to a canoe spot and hop in the river and enjoy it. Also - a linear park/ trail connections will further develop along the river corridor.	Places to put your feet on a hot day. Places to tour by bike - even for an overnight trip.	l would like for the river to take it's place as a destination/asset alongside the Fashion Mall, Lucas Oil Stadium, Eagle Creek Park, etc.	46240	46240

Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Picnicking, Gathering with family or friends	Access	I would like for there to be more places to get close to the river to enjoy the sights and sounds. It would be nice if there were a few benches, or stones, or someplace to sit and enjoy it. I don't do much canoeing any more, but I think that is important to preserve some undeveloped areas for those who do because paddling through untamed land allows a unique connection with nature.	While some amenities such as playgrounds and coffee shops would be nice to have nearby, close enough to walk over to, they should be strategically placed in more developed areas. I would like a wildlife viewing area similar to the bird and squirrel window at Holliday Park someplace that it would fit in. Trails that follow the river's path would increase accessibility and could be enhanced with information posts like plant, tree, or bird ID; even geological features; also fitness stations. If you wanted to get really creative some sort of underwater viewing area would be unique. Possibly if a spillway such as the one along Westfield Blvd. were reconstructed it could be engineered as a tunnel with windows under the water. But maybe that's just a pipe dreamsorry couldn't resist.	Making improvements to make the White River a more attractive feature of Indianapolis and the surrounding area is a great idea!	46228	46240
Kayak, tube, or canoe, Enjoy nature, Gathering with family or friends	water quality, play spaces	hmmmm	benches and picnic areas	Bring on the community. Lets clean up the water quality and enjoy the river	46062	46074
Birdwatch, Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality. It's coming though! Less trash.	More accessible and noticeable from the street.	Walkways, benches, parks, launches.		46240	46220

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Water quality so that I feel comfortable if we want to wade in the water.	The fish and wildlife should be given utmost respect and consideration. I would not want to have so much growth and so many people accessing the water that the wildlife and the peacefulness is displaced.	We have a bench in Noblesville along the Riverwalk, but I'd like to see a few more because people do enjoy just sitting and gazing out over the river. I think a coffee house or restaurant with lots of windows and outdoor seating might be a nice addition near Conner or Logan Streets.	Hopefully there can be something done about the low head dams. There are a lot of canoeists and kyakers on the river, so safety is a real concern. I think we have a valuable resource in the White River, but I would hope that as we look toward the future we can be respectful and conservative regarding any development.	46060	46202
Kayak, tube, or canoe, Enjoy nature, Gathering with family or friends	Add more well-marked public access points with parking	Clean it up! Many people thinks it is full of sewage and that's why it's brown. People will be more apt to interact with the river if it looks like a "normal" river or stream. Make White River a part of Indianapolis, rather than a "thing" to have to cross	Increased number of boat ramps, overnight docking/restaurants/overnight accommodations	Make it a much bigger part of the Indianapolis landscape/culture!	46240	46204
Group fitness (classes, group sports), water skiing				I am am member of Indy Skiers, a local waterski club, that has a special permit with the city to water ski on the "Lake Indy" portion of the river. Besides hosting regular water ski nights for members, our club provides "Learn To Ski" days for the local public, and also caters to the disabled community with an access ramp behind Indy Municipal gardens, specialized equipment and instruction for those paralyzed below the waiste. In these ways, the ski club gives back to the local community, is great to be a part of, and is a great way to stay in shape while on the water. Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Picnicking, Gathering with family or friends, Painting, Indian culture study around Koteewi, photography, animals	More ongoing and intensive clean-up of river including trash, log jams, restrooms	Protect, maintain and showcase the natural beauty of the river, expand events and classes on the history (geologic, pioneers, Indians, etc.) of the river, keeping everything up-river from Noblesville in a natural setting. Developing tasteful and interesting shopping, dining, and cultural events and structures from Noblesville to Indianapolis.	More maintained and accessible restrooms along the river! A few more small , canoe, etc. boat landings and access to river. Outdoor concerts at Koteewi or similar places such as bluegrass and other music festivals.	Appreciate White River for what it has been throughout history and what it can continue to be as a natural resource. White River continually changes in its natural state fro good reason - appreciate those and live with them. Clearly separate a more developed river from the natural state of the river and maintain it thusly. Keep the natural state from getting crowded and not properly used.	46034	46034

Enjoy nature, Personal/ individual fitness (running, etc), Bicycling	Clean the water up (I know that's in the works with DigIndy), create active spaces close to the water (i.e. Tampa's Riverwalk or Austin's Boardwalk), an improved Riverside Park, and development along the water near Downtown (i.e. Tampa, Cincinnati, Columbus, and Milwaukee).	I would like to see dense, walkable, active development along the river in Downtown between Washington & 16th Street and in Broad Ripple Village (example: Cincinnati). I would also like to see some of the lowhead dams removed between Hamilton County and Washington Street for safety purposes and to improve the availability of other activities (i.e. boat tours or water taxis).	Quality parks (Riverside Park), kayak and canoe rentals, mixed-use developments, safe places to swim, an improved Old Washington Street pedestrian bridge, and overall safer bike and pedestrian access.	We should really look to our peers for funding strategies and how to bring timelines in a relatively short frame for implementation. Columbus, Milwaukee, and Cincinnati have much to offer as it relates to revitalizing waterfronts and seizing opportunity, even along non-navigable and/or muddy rivers. Long-term, when bridges reach the ends of their useful life cycles, we should seek out something that is more amenable to pedestrians and bicyclists as well as something that is aesthetically pleasing/ architecturally significant. The 16th Street bridge was, at one time, a stunning example of City Beautiful-era architecture and sandstone, with a grand archway on the western banks. This was, sadly, demolished and replaced with a standard, highway-grade bridge. Cities and their natural features should be engaging and interesting to look at. The river can and should serve as both a destination and transportation amenity and something that Indianapolitans can take pride in.	46202	46222
Mountain Bike	Trail connectivity	Interconnected natural and paved trail systems	Parks along river seem to lack facilities.		46038	46219

Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	Water quality	Anything north of the town of Noblesville should remain the same except water quality.	Walking trails within city limits of Noblesville.	I believe it is dangerous to do any public ramps north of the town of Noblesville because of the dam. There is access if people want to but the dam is an easy way for an inexperienced boater to be injured and the less access we have the better. Anything south of Noblesville already has public boat launches that are well used and maintained. It would be nice to focus on public walkways along the river going into Indy.	46062	trvl

None.	I'd imagine the White River would become a visual focal point in the region, almost like a front door to Indy. Offering something more than just passive recreational space and wooded berms.	The river needs to be programmed and activated. Water-related events or activities promoted and accessed throughout the community (through the seasons) will help shift focus back to the river as a viable place in the community. I would offer Fort Wayne's programming efforts in recent years as a case study.	I think the most impactful thing we can do to river is utilize it as the blank canvas it is, whether through watersports activities/events, public art shows/ installations, light shows (like the Canal a couple of years back), etc. These are relatively low-cost, short-term projects that can have a major impact on the public's perception of what the White River is and can be.	I would love to see the White River become an activated front door to Indianapolis, something as identifiable as the Indy 500 or the Soldiers' and Sailors' Monument. Something people can touch, view, and experience, truly unique to Central Indiana.	46201	46204

WHERE DO YOU ACCESS NATURE ON THE RIVER?
I visit the river., I am not directly affiliated with the river, but I am interested in the plan.	Car, Walk/Run, Kayak, tube, or canoe	Feels unsafe at night, The river is dirty	Conner Prairie, Holliday Park, Indianapolis Museum of Art, Municipal Gardens Family Center, Potter's Bridge Park, White River Canoe Company, White River State Park		
I live along or within a half mile of the river., I work along or within a half mile of the river., I visit the river.	Bicycle, Walk/ Run	Limited places to see the river, The river is dirty	Broad Ripple Park, Butler University and Athletic Fields, Carroll Stadium, Central Canal Towpath Trail, Edison School of the Arts/Riley Park, Holliday Park, Indianapolis Canal/Cultural Trail, Indianapolis Museum of Art, Indianapolis Zoo, Southside Landfill/ Crossroads Greenhouse, White River State Park	White River State Park, Canal Tow Path	Holliday's park
I live along or within a half mile of the river., I work along or within a half mile of the river., I visit the river.	Bicycle, Car, Electric scooter or electric bicycle, Walk/ Run	Feels unsafe at night, Limited places to see the river, The river is dirty, Programs or destinations are not interesting to me	Edge Adventure Park, Holliday Park, Indianapolis Canal/Cultural Trail, Indianapolis Museum of Art, Lucas Oil Stadium, Riverside Regional Park, Victory Field, White River State Park		
I live along or within a half mile of the river., I visit the river., I travel the river in my kayak	Kayak, tube, or canoe	Feels unsafe at night, Limited places to see the river, The river is dirty, We cut our city off from the river with our levys. Other cities embrace their rivers, we pushed ours away for fear of it.	Brickman Educational Trail Park, Broad Ripple Park, Central Canal Towpath Trail, Holliday Park, Indianapolis Canal/Cultural Trail, Indianapolis Museum of Art, Indianapolis Zoo, Lake Sullivan/Sports Complex, Lilly Recreation Park, Lucas Oil Stadium, Marott Park, Municipal Gardens Family Center, Riverside Regional Park, Riverwood Canoe Landing, Southwestway Park, Town Run Trail Park, Victory Field, White River Canoe Company, White River State Park	Municipal Gardens. Its such a beautiful parks with a beautiful history and it feels so distant from the river until you're inside the building. I wish the river was more navigable also. The White River built Indianapolis and the White, Blue, and Wabash Rivers built Indiana. We as a people need better access to these vital resources!	In parks. On the side of the river. North and South of Indianapolis. Especially south though, because of the way the river flows.
I live along or within a half mile of the river., I own property along the river.	Motorized boat		Broad Ripple Park, Indianapolis Canal/Cultural Trail, Indianapolis Museum of Art, Lucas Oil Stadium, NCAA Hall of Champions, Riverwood Canoe Landing	Broad Ripple to Keystone Crossing area. I live along there. It is Beautiful!!	Same as above
l live along or within a half mile of the river., l visit the river.	Walk/Run	Feels unsafe at night, Limited places to see the river	Conner Prairie, Indianapolis Museum of Art, Potter's Bridge Park		From afar. There isn't a place around here where I can walk right up to it.
l visit the river.	Kayak, tube, or canoe	Lack of transportation, Limited places to see the river	Canoe trip from Mounds state park in Anderson IN to Mt Carmel IL.	Mounds park ,	Watch for returning Bald Eagles each year , the change in the river , the pleasure of canoeing .

WHAT TYPES OF ACTIVITIES DO YOU PARTICIPATE IN ALONG THE RIVER?	IF YOU COULD FIX ONE THING ABOUT THE RIVER TODAY, WHAT WOULD IT BE?	IN 5 TO 10 YEARS, WHAT IS YOUR DREAM FOR THE WHITE RIVER? HOW SHOULD IT GROW AND CHANGE, OR WHAT IS IMPORTANT TO KEEP THE SAME?	WHAT KINDS OF ACTIVITIES OR AMENITIES SHOULD BE AVAILABLE ALONG THE RIVERFRONT?	IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water quality	I would love to see the White River cleaned up, but it's important to me that the river isn't overdeveloped and still feels like a hidden natural getaway.			46037	46037
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking	Clean it!	Recreation on the river: kayaking, paddle boarding, etc	Restaurants, recreation stands/rentals		46204	46202
Kayak, tube, or canoe, Enjoy nature, Gathering with family or friends	Access. There just aren't many places to access the river downtown, that are within walking distance from me. Fall creek runs though the park near my neighborhood, but it doesn't have safe access.	It would be cleaner, and slightly more developed with access points, playgrounds, art, etc	All of the above mentioned would be great		46202	46222
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Water quality along the entire length of the river.	I want to see people enjoy the river. I want Indianapolis to be a community with boats because its only logical because we're on a river.	I want canoe and kayak rental companies. Enough to have healthy competition. When people paddle a river they learn it intimately. I want people to know the White River intimately.	Thank you guys for everything I know what a big undertaking this is. I want the rover to be more navigable. I want to see people on the river in boats. I want our city to embrace its river.	46202	46204
Enjoy nature, Gathering with family or friends, Recreational boating (sailing, motoring)	Make it deeper. So shallow it is dangerous at times. That would increase our water supply as well to the BR canal and thus drinking water.	More restaurants, cultural events, festivals etc. in Broad Ripple.	Same as above	Keep it clean.	46240	46240
Enjoy nature	Water quality is surely the most important, but personally I wish I had scenic river access, preferable with benches available.	I hope there are more events utilizing the river in Noblesville, like canoe races, a Labor Day boat parade (but it would need big viewing areas), fishing contests, rides for two or more down the river, etc.	Lots of garbage cans and someone who's in charge of checking them daily! Mostly good paths and occasional seating. It'd be a while, I think, till any business would profit by selling soft drinks and coffee, but maybe we could have food trucks or drink stands for special events.	I wish I lived on the river!	46060	
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends	Water acesss , for most people they only travel approx 7 miles a day. The removal of dams .	The nature flow of the river , and quality of water	All the above and camping available	Teach people it a gift not a right	46017	FF

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Better facilities to allow safer entry/exit from canoe/kayak.	Mostly I would like you to leave it as it is, I would hate to see it over developed like so much of Hamilton Co.	Natural beauty, maybe picnic areas, play areas, fishing access. Definitely Not coffee house, bring your own thermos,	People need to pick up their trash. It's a shame to see what people allow to polite our Rivers & creeks.	46033	46033
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Water quality	That the water is clean and clear and it flows freely	Kayak/canoe access points, rest rooms and trash cans, walking/biking paths where appropriate, amenities near population centers but many untouched wilderness areas free from development	It is important to me that much of the river, both the East and West Forks, remain free flowing and natural. It would be great to enlist the aid and advice of farmers and land owners along the river about how to reduce runoff of agricultural by-products into the river.	46220	46220
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends, Walking/hiking	Access	Honestly I kind of like that not a lot of people use the area. I don't want to see it crowded			46222	N/a
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water quality	More public access and water recreation activities, ie personal watercraft rental and paddle boards	Liveries, camping, food cart vendors, beach	Eventually the 4th of july fireworks need to be launched from the white river. Or have labor day fireworks on the river. I imagine something like the riverfest that is held in Cincinnati or Thunder over Louisville.	46202	46202
Personal/individual fitness (running, etc)	A block of bars/ restaurants on the river near downtown would be cool		Near downtown, there aren't many spaces to sit close to the water. It's just a hill that leads down to the sidewalk that drops into the water.		46203	
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	Cleaned up and more access options/ highlighted areas	Coffee, boat rental, restaurant	Glad there is interest in making this more of a showcase in Indiana and preserving he health	46220	46220
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Add more access. Keep it clean!	Grow, more natural development that's minimally damaging to environment	Like so many idea for development from recreational to restaurants	KEEP IT CLEAN and good for animals	46062	46256
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality, more activities, play areas, access to river in more locations	Make it a destination for activities shopping and dining while cleaning the river and maintaining the nature around it.	Shopping, restaurants, parks, kayak canoe rental spots, hiking and running trails.	make the river a destination in the downtown area.	46220	46260

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Picnicking, Gathering with family or friends	Water qucleaality	Clean it up so we cam have a safe place to enjoy water sports	All you mentioned plus small boat rental	Good water quality so we can eat fish we catch	46220	46220
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	Slow down the growth, the river has become too busy and high speed boats have made it noisy and uncomfortable to sit and fish in my own back yard.	Need to keep it clean, all the rental boats and traffic on the river have been trowing trash and beer bottles out along my river bank.		Keep it natural and quiet	46062	46062
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Cleanliness, sanitation	Less commercialization, less pollution	None	Don't add all the commercial stuff in Hamilton County	46037	46037

Enjoy nature	Water quality		Any or all —would really love safe place to wade or swim for older adults	Please provide something for adults who like to swim. And a place to rent small boat!canoes for short paddles between Field Drive and Logan Street in Noblesville	46060	46060
	More ways for people to use the river. Boating, canoeing, kyaking, aquatic events.	Lots of river based activities and events. Look to Providence RI with the events for their river.	All of the above. Especially waterfront restaurants.		46216	46202
Enjoy nature	No pollution				46205	46205
Enjoy nature, Shopping or dining	Stop pumping raw sewage into it.	I'd love to see restauraunts and breweries with outdoor seating along the river.	Restauraunts, breweries, playgrounds, coffee shops, local stores.		46205	
Kayak, tube, or canoe, Fish or hunt, Gathering with family or friends	Nothing. Less people	Clean it up and have the sediments dredged.	The riverfront should not be altered. It is the home to many wildlife.	Don't infringe or try to infringe in landowner rights.	46060	46060
None	Water quality	Broad walk!	Coffee, benches, bike racks, boardwalk,		46202	46032
Kayak, tube, or canoe, Picnicking, "Cabrewing" and "booze tubing"	Cleaning the river	Denser more walkable/bike friendly neighborhoods develop along the river	Water taxis from downtown Indianapolis to Broad Ripple and possibly Keystone at the Crossing and as far as Noblesville.	The white river has potential to be a great amenity to the metro and it's really exciting to see there will likely be a bright future for the riverfront	46204	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Activate river downtown	Downtown is filled with kayaks and paddle boarders; name changed back to Wapahani	Coffee, restaurants, a 'beach', boat rentals	Once tunnel is complete and river starts to clean out, rename to Wapahani. People have a terrible view of the White River (dirty, dead bodies, etc). They have NO view of the Wapahani. Elegant marketing solution.	46220	46204
Birdwatch, Enjoy nature, Fish or hunt, Work	Stop all development	Rivers don't grow.	Stop all development	Gold dredging	46060	46060

Birdwatch, Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Water quality	Increased awareness and improved parks on the river. Easily accessible	Coffee shops and playgrounds		46205	46220
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality, keep it clean	Keeping it a great place to see nature	Keep it natural	Natural access is the best way to go	46060	46060
Occasional walk at Potter's Bridge	I would dredge it so properties along the east side of the river and just north of Field drive would have potential flooding.	That my property does not flood.	NA	Keeping a good flow of water during heavy rains.	46060	46060
Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends	Beach or some sort of access to downtown river area, making the trails down by the river less sketchy and more open to families.	Having cleaner water and opening access and riverbanks to the public	Playgrounds, benches, shops, green spaces, beaches		46202	46226
Personal/individual fitness (running, etc)	Connection of a trail system along the river for the length of the entire city	"More development along the river. Trail system running the length of the river in the city. Clean up water. Dam river south of the zoo and create a beach area down by the zoo/white river state park. Make the trail running along the river south of the zoo safer, less homeless camps and trash. "	Playground. Beach. Trails. Space for restaurants and coffee shops. House oppurtunities for all income levels.		46202	46202
	CLean up the fallen trees and sandbars that cause the river to flood so badly after heavy rains	Protect our family's farming livelihood. Allieviate trespassing! Especially destructive trespassing	Limit these activities to areas already owned by City or parks - do not take our land by eminent domain!	Do NOT take by eminent domain!	46060	46060
Enjoy nature, Personal/ individual fitness (running, etc)	water quality	Add beaches, or areas that allow people to enjoy the water and skyline, but make riverside more appealing for recreational activities.	Coffee shop, boat rental, docks, shops along the banks	It would be neat to copy off of Paris' river beaches. Also, having ferry rides along the river would be awesome.	46163	46204
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Better access for boats	To still be able to hunt and fish it. It's important to limit the number of parks and keep nature. Don't destroy the woods and wildlife to please more people that will trash it.	Playgrounds at the parks.	I have enjoyed duck hunting and fishing the white river for 10+yrs. My fear is, it will be built up and that habitat will be ruined.	46040	46040
Enjoy nature	More places like parks and restaurants to sit and enjoy	It must become central to our identity			46250

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water access. And get rid of low head damns.	Remove low head damns. They no longer serve a purpose. Make navigation hard. Are dangerous.	More facilities such as bathrooms would be good		46202	47809
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining	People's negative attitudes toward and neglect of the river, specifically in regards to illegal dumping of trash.	More people accessing, more people caring.	All of the above; anything that allows people to enjoy the river.	Keep it beautiful, keep it wet. Develop a whitewater play park at Chevy Dam downtown. Develop a kayak share program at various nodes, including Broad Ripple, Holliday & Riverside Parks. Build a good portage around Broad Ripple Dam.	46220	46220
Kayak, tube, or canoe, Paddle board	Water quality	That it is recognized as one of the cleanest rivers in the nation	Nature preserves, world class parks, trails linking parks and river	Maintain a clean waterway and everything else will follow	46240	46220

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Water quality	Development along river (shops, restaurants, etc.) should be limited to certain areas where river travelers can stop to refresh. Need to leave most of it as sustainable for wildlife. Need to figure out how to keep tubers (tend to be drunk & loud groups) separate from kayakers/ canoers who tend to be there for quiet & wildlife.	Places for river travelers to eat, camp, use restroom/shower, load/unload kayaks/ canoes, park.	Keep cleaning it up. Bike trails all along the river would be great too, with occasional bike/ped bridge. Bikers could also use the "rest stop" areas for river travelers. Not interested in swimming in it until it is cleaner & no longer surging with e-coli, but that could be a future option.	46062	46278
Enjoy nature, Personal/ individual fitness (running, etc)	I'd love there to be a way to get from one park to the next without driving.	I'd love to see a true bike park.			46240	46250
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Group fitness (classes, group sports), golfing	safer locale; less costly sewer rates	natural state; no development	golf courses	do not increase taxes for cleanup or development (TIF)	46202	46202
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Picnicking, Gathering with family or friends	More put in areas and easier to understand information about the types of activities that are safe and when.	I'd love to see it become so accessible that it's rare to be on it alone.	Classes would be amazing. Shuttles for water activities would be nice.	I simply look forward to getting to know it.	46222	46201
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Shopping or dining, Gathering with family or friends, Recreational boating (sailing, motoring)	Eradication of Eurasian Mil-foil, safer low head dams, cleaner runoff water	Same as above. Eradication of Eurasian Mil-foil, safer low head dams, cleaner runoff water, dredging of river from Board Ripple dam to the dam in Clare to make a larger section of the river more usable for power boats and paddlers.	Overlooks up high enough to be out of the flood way. Warning signs to discourage paddlers from getting on the river in high water conditions.	"Educate the public about river safely, teach boating ""rules of the road"" and teach respect for wildlife."	46240	46240
Enjoy nature, Personal/ individual fitness (running, etc), Recreational boating (sailing, motoring), Water Skiing	Water Access	People are using the river as much as they are using the Monon and other paved trails today.	Water craft rental from Broad Ripple south to down town. Restaurants. Better, ie deeper boat ramps.		46220	46204
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Water access - I know of one canoeing company in Noblesville, but I don't know of any others north or south of here	I've loved seeing places like Branson that have embraced the river and made it a gathering spot! It would be great to have more people kayaking, canoeing, and fishing in it and dining/shopping beside it.	Benches, nature trails, shops, restaurants, all sustainably-focused	I grew up in Mishawaka, which is similar to Noblesville in population, having a historic downtown, and having the city divided by a river. I would suggest a visit there to see what they've done along the river - there's a nice blend of historical attractions by the river as well as new, vibrant development.	46060	46060

I work along or within a half mile of the river., By "work" I mean I volunteer with a 501c3 nonprofit all-volunteer arts organization, Hamilton County Artists' Association	Car, I don't live near the river, so I drive to Hamilton County Artists' Association, or other river-proximate locations	Nothing keeps me from the river	Broad Ripple Park, Central Canal Towpath Trail, Conner Prairie, Indianapolis Canal/ Cultural Trail, Indianapolis Museum of Art, Potter's Bridge Park, River Bend Campground, River Road Park, Riverwood Canoe Landing, White River Greenway Trail, I hardly ever leave Noblesville, so I have not been to many of the listed places.	The trail along the White River between Field Drive and Potter's Bridge, and the part that is along Noblesville behind Riverside Cemetery/Hamilton County Artists' Association up to Courtney's Kitchen.	I don't understand the question? What do you mean by "access nature"? Nature is just THERE, along the river, when I am on the paved track ~ from the track, I can photograph "nature"/the river/ plants, etc. I can enjoy "nature" (see it/smell it, whatever) as I walk or skate on the paved track.

Kayak, tube, or canoe	water quality and activities	cleaner and activation	art, activities, active living programs		46077	46032
Kayak, tube, or canoe, Enjoy nature, Gathering with family or friends	water quality and access	Swimmable!	more stuff for kids		46220	
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Picnicking	Safe portage infrastructure or paths around low head dams AND remove the ones that can be removed.	Keep the natural beauty but add quality of life components where the general masses can spend time doing all kinds of healthy lifestyle things.	All the above based on location and zoning take the best of Broadripple, Fountain Square and Mass Ave and put those parts in clusters here and there along the river and connect them with trails and various connectors within the limits of the landscape and other constraints.	Public Education signage as an integral part of the plan at each and every location possible to encourage good stewardship and change personal habits.	46011	46060
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring), stop in the Birdie Gallery ~ art gallery at Hamilton County Artists' Association (be nice to see it on this list!)	Encourage more cost-friendly river businesses. If you don't own your own canoe or kayak, for example, then the river is too expensive for a lot of families to appreciate.	My dream would be to have direct access from the riverwalk to the Birdie Gallery (Hamilton Count Artists' Association), and a few more public stops along the walk ~ especially more picnic areas (free chairs/tables/benches), free public boat access spots, and maybe a few restaurants and bars.	See above answer.	I hope it becomes a real tourist destination, but I think the community residents need to be the focus of the White River Vision Plan ~ they need to feel connected and be involved in river-activities to have best access/personal investment in success of the river as a tourist attraction.	46060	46060

Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quality and ability to use safely	Become a destination of note for residents and visitors. Keep the river as natural as possible while using adjunct areas like the canals etc for commercial use. Perhaps a relationship with the zoo, park service or one of the museums to create nature education areas.	Use the natural areas for education (STEM). Create areas for quiet viewing. Utilize the Washington Street bridge for festivals and art/craft events. Complement the current trail system with walking trails that follow the river's path beyond the metro area.	The river is a natural asset that should be better utilized but not over run by commercialization. A collaboration with the surrounding counties on a common vision for the river usage would helpful. Once we let the "developer out of the bag" there will be no going back. This is an opportunity to improve education, health and quality of life! We cannot waste it.	46250	46250
Enjoy nature, Personal/ individual fitness (running, etc)	visual appearances attention to details along banks and water quality	an attractive asset in central downtown to be proud to show off in the city	bicycle/walking access		46217	
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quality	Building along the river would capitalize on the river view. This is finally beginning in BR. There are still dumpsters behind buildings on the canal	Dining, more living spaces		46220	
Kayak, tube, or canoe, Birdwatch, Personal/individual fitness (running, etc)					46062	46240
Enjoy nature, Gathering with family or friends	Water quality, invasive plants	Focus on water quality, bringing back native plants and species, access for all including people with disabilities and those without cars and low-income people	places to buy coffee, benches, playgrounds all good (if not disrupting too much of the natural beauty)		46202	46208
Enjoy nature, Hiking	Water quality	I don't have a dream for the river.	Accessibility.		46260	46260
Kayak, tube, or canoe, Enjoy nature, Fetch with the pup	Access. I'm in Broad Ripple and I'm blessed with Marott and Holliday but I don't know of many other spots that offer nice wooded access. I would also like more spots to get to kayak. We lack a lot of topography in Indiana, the small valley the river creates has more elevation in and offers unique hiking for the area.	That there is enough acreage on both sides that allow for hiking along and up and down near the river for it's entire journey through the city. This would create a great park and add to our much needed canopy.	Maybe a few spots like that near downtown areas but nature should be the focus.	Thank you for taking committing your self to this project, it will make for a better future!	46205	46240
Kayak, tube, or canoe, Recreational boating (sailing, motoring)	Water quality	More appealing and clean water	Restaurants, parks		46240	46240

Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Picnicking	Water quality and ability to easily rent boats from various locations along the river for a quick canoe or kayak trip.	More use of the actual water - boating, docks, fishing, tubing, dining along it	Restaurants, workout zones (yoga gardens), places to rent boats	Clean and easy to walk or ride a bike along it.	46202	46225
Enjoy nature, Fish or hunt, Picnicking, Gathering with family or friends					46038	46038
Birdwatch, Enjoy nature, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality & accessibility	Keeping areas as natural as possible while allowing better access. More people using river will help in bringing attention to the condition of water quality and pollution,	Coffee would be wonderful	To bring water quality to higher standards and in turn higher quality of life for local wild life	46060	46207
	Water Quality				46202	46240
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Eliminating the combined sewer overflow into the river which causes raw sewage to be released during periods of heavy rain.	A cleaner stream is always the place to start. Outside of that, expansion of safe public access sites along the river.	Parks and playgrounds are a good idea. I'd also like to see more focus put on providing trash/recycling receptacles at public access sites along the river. Too many times at canoe/kayak launches & other areas where people fish I notice a lot of garbage. I leave them mostly on the individuals because you should be able to haul out everything that you brought in, but at the same time, I've noticed a lack of trash cans, recycling bins, and dumpsters at many of these sites. Maybe that would encourage people not to leave their trash along the river banks.	Being an avid outdoorsman stuck in the city, this river means a lot to me. It is the lifeblood of our city and offers many great opportunities for people to enjoy the outdoors. We've come a long way in rehabilitating the river over the last couple of decades, but there's still plenty of work to be done. I think one of the biggest things that can be done is better education of the importance of our river to the citizens who live in its watershed. As someone who likes to fish and kayak the river, I constantly get the comment of "that river is nasty" and "are there really fish in there?" I think those false and negative beliefs cause people to ignore the river and are less apt to helping it change for the better.	46220	46220
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water quality	No damn dam!!!!!!	Just keep to Nature	Keep it natural - and no dam!!!	46280	46060
Enjoy nature	remove Riverwood Dam to restore natural flow	restore the river to it's natural state	canoe glamping on the old Conner Prairie farm would be an assest		46062	ame

Continued water quality improvement. Better signage. I strongly believe people who do not live on the river or frequent it often are not aware of the dangers when the river level is up. Recently new signage has appeared for the dams which is a positive step. However, there are numerous places to drop kayaks/canoes and some type of educational signage would be a helpful to educate and warn people of higher waters.	More dining options available by boat. Or public boat slips in close proximity to Broad Ripple that could be used.		46240	46220

Enjoy nature, Personal/ individual fitness (running, etc.), Shopping or dining, Picnicking, Gathering with family or friends	Clean water and access points.	Have a nice mix of some nature preserve and some some shops which are relevant to the area (restaurants, rental places) Keep the lands public but the businesses are private which lease from the city/ state. This way, the store owner will take better care of the area rather than relying on government workers.	Bike path along the entire length, sporadic swings or gliders to sit on, Kiosks or carts for drinks and snacks with only biodegradable utensils, fishing tackle shop, restaurants again using biodegradable utensils or eco-efficiently operated, upscale Italian and Polish delis, craft beer pubs, boat or SUP rental, Pop-Up ice-skating rink with BYOskates, small outdoor theater pavilion, skateboard course, art club house, golf course, putt-putt course, Ninja obstacle course, gardening club greenhouse and outdoor, book store, large walking meditation labyrinth, dog parks, composting center. How about a fun river boat race like Red Bull Flutag or the CHIditarod event with the best crafted boats?	Consider a diversified think-tank team. The planning groups that fail are ones which only have linear thinkers. A variety of individuals are needed to have diversified and creative problem-solving team. We need global thinkers, those who are well-traveled and have seen what other parts of the world have done with their rivers, artists as well as the engineers (dreamers and pragmatists), city-dwellers and suburbanites. Think about how an Ad agency works they have the creative side and then they have the account side. You need both to funnel into a success. Also, what if you tapped into the minds of elementary or high school children and see what they thought. Sometimes the more attainable. And in your advertising campaign, reach out to the high school and college radio and tv stations for "Public Service Announcements". Start with the young.They are eager to have PSAs in their rotation. The people that listen to those stations are parents and grandparents of these kids and that is the target audience families who we are trying to get out to the White River.	46250	46226

Kayak, tube, or canoe, Enjoy nature, Picnicking, Gathering with family or friends	Water access	I would personally love more development along the river in broad ripple so that we can sit along the river and enjoy its beauty. I'd also love to have more entry points to the river, be it for kayaking or just wading around with our dog. I'd love to open up access to the river like broad ripple Park originally had in the early 1900s, and connect with nature and bring an element of fun. I would love to use the river to connect the neighborhood together and increase physical activity! Farm activities	Help folks to understand that above the low water mark the farm fields along White River are private property	The river under bridges spanning White River need to be maintained so that the water capacity flowing under the bridges now is the same as when the bridge was built. That is state law but no one is addressing the damage done to the river as well as the bridges by not keeping the debris, fallen trees, etc., cleared from the river around the bridges.	Floating down the river can be relaxing as well as exciting. The view from the river is very different from our view from above the banks of White River. The fallen trees and debris needs to be addressed before White River can become a safe and enjoyable recreational corridor.		46060	46060
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Less litter, more access	Restaurants taking advantage of sites along river. More points of access.	Cafes, more rec areas, paddle boats , tubing etc		46062	46060
Kayak, tube, or canoe, Birdwatch, Enjoy nature	water quality, AND water access	That it will be cleaner with better drainage management. You won't build any plan with a river that floods frequently and stormwater system overwhelmed frequently. That HAS to be the first step.	Kayak/canoe inputs		46062	
Fish or hunt	Cleaner water, no trash	No trail	Keep it natural	No. Stay off my land!	46060	46060

I would like to have a sidewalk to run along the river		46202	46037
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality, no contest	Clean enough to swim in, fish in, boat in	Playgrounds, boathouses (for rowing), places to buy coffee or snacks, restaurants overlooking the river	CSOs should NEVER dump into the river (not even .1% of the time or whatever is planned after the DigIndy project) - otherwise it will never be clean enough for the general public.	46208	46204
Enjoy nature	Water quality	Urban Wilderness Trail should be kept out of government hands. Take that group's vision and build off it with local nonprofits/corporate sponsorships. Let the people use the river how they want. Plenty of natural spaces. Very few commercialized uses on the riverkeep those very concentrated and few/far between.	Trails. Educational nature signage. Benches.	Look at Eagle Creek Park and Southwestway Park. Clean up the river so it truly becomes an amazing place for nature/wildlife. No other cities I know of would have an attraction like this DOWNTOWN.	46234	46234
Enjoy nature, Shopping or dining, Gathering with family or friends, Recreational boating (sailing, motoring)	clean it up, get the silt and pollution out green scum on the water	right now one needs a map to know where it is save to pontoon. clean out the silt	18 years ago people would water ski from Broadripple to the bay at Sandy Point. It is not longer safe to do that	clean it up. clean it up. get it dredged.	46240	46240
Enjoy nature, Picnicking		Being able to swim in it	Playgrounds, places to picnic closer to the river		46205	46205
Enjoy nature, Personal/ individual fitness (running, etc), Group fitness (classes, group sports), Picnicking, Gathering with family or friends	Water quality	The river is cleaned up, invasive species removed, and people are able to recreate along and in it. I DO NOT want to see a bunch of riverfront condos/apartments and shopping/restaurants. The river should be enjoyed for its natural value.	Outdoor recreation - paths, bike rentals, kayak rentals, tubing down the river, etc. Maybe a few food carts or trucks, but no permanent structures.	Prioritize the river for its natural value and as a way to connect Hoosiers to nature. Please don't develop the property right around it.	46228	46202
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Access	Trails along river	As natural as possible	Not now	46038	46204

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Recreational boating (sailing, motoring)	Water Quality	I would love to see more opportunities for people to kayak along the river with more access/drop off points.	Docks along areas where businesses are along the river would be fun. The river runs right along the back side of Harry & Izzy's/Giordano's. It would be fun to either kayak there and stop in for a meal or take a pontoon boat there. It would also be nice to see more kayak/canoe rental oppurtunities along the river in the upper Marion county/Carmel/Fishers area.	I would love to see more efforts put into the water quality and clean up of the river. And more opportunities for people to kayak/canoe along the river as well.	46268	46204
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water quality and access	I think access to the river from downtown is important. The city now is a "city with a river" when I believe it should be a river city. Very few places have such a valuable resource and I believe the river is not being tapped for its full potential. I think that the riverfront downtown to grow to incorporate local restaurants, coffee shops, etc. We could grow downtown recreation along the river by adding boat access points. We could add a boardwalk.	restaurants, trails/hiking, dog parks, information about the river, riparian and history posted along high foot traffic area.	Not only do I believe the river has value for humans to use, I think we are truly undervaluing it's ability to mitigate flood damage caused by climate change. Indianapolis is a commuter city with a lot of pavement, but creating natural wetlands and places for city storm water to run off we can add natural filtration systems before it even enters into the white river, cutting down on pollution from both the streets and the combined sewage overflows that occur. I envision a place where it is safe to swim and safe to be around in general.	46204	46204

Enjoy nature, Gathering with family or friends	water access	I would love to be able to kayak to multiple park, shopping, educational, and dining destinations. I would also love an accurate historical accounting of First Nations peoples who lived in this area prior to their colonization, forced removal, and genocide. Their culture should shape the development of the White River even if their voices are no longer present.	Playgrounds, family dining w/ alcoholic beverages, interactive art installments, affordable & public housing		46201	46222
Personal/individual fitness (running, etc), Gathering with family or friends	more activities		coffee shops, exercise/yoga classes, playgrounds and benches, restaurants, rental boats and kayaks.		46208	46208
Kayak, tube, or canoe, Enjoy nature, bicycling	Increased water access				46062	46254
bike	Adding general public/play spaces and walkways along its banks, which are almost non-existent	Be a centerpiece of public life on a warm sunny day where you go to just hang out with your fellow citizens. Right now the city seems to turn its back on the river. Also you should be able to bike/ run all along the river banks for miles through Indy.	playgrounds, green spaces, walkways, bike paths, rec classes, benches, food trucks, coffee shops, art, canoeing, tubing	I just want to see the city embrace the river. The fact that it is not a navigable river for commerce should make it even more valuable as a public asset for the city.	46204	47907
Enjoy nature, Gathering with family or friends	Water quality	More access in all areas with dock locations to fish or watch birdsp	Brewery, access to recreation on river	Stretch from The canal to speedway for more artisanal venues and to bridge the city	46222	46268
Enjoy nature, Personal/ individual fitness (running, etc)	Play spaces. It would be fun to have a bar district on the banks of the river downtown. Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Picnicking, Gathering with family or friends	I wouldn't - my concern is over- development and the ruination of nature!!!	Keeping it the same or with more access points for the public to enjoy. Not at all interested in over development or privatization	"More access points for viewing of nature, kayaking, drop ins - but these should be worked in seamlessly no destroying of nature to achieve this. "	As previously stated - i do not care for the over development and ruination of the White River. Let nature be!	46060	46060
Kayak, tube, or canoe, Fish or hunt	Water access	More free public access and DNR fish introduction	N/A	N/A	46031	46256
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water access (kayaking, that sort of thing). Having more paths to walk along it and feel safe.	Definitely make it a place to be. It's an asset to the city, but hardly anyone is on/ around it. There's no programming or way to enjoy it.	Benches, for sure. Some sort of place where you can stop after a walk or run a place with coffee, food, etc. Playspaces for kids/families would be nice. I know we have a lot of breweries, but there's really nothing better than a cold brew along the river, watching the sunset. Chicago has their riverwalk, and Fort Wayne is working on their river district. It would be great if we could turn ours into something, too.	I would love to do more on the river! I recently started running along the Towpath (Toepath?). Forgive my spelling. Holliday Park is one of my favorite places to access the river, too. There's just something about having a connection to nature in the heart of the city.	46203	46202
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Get junk ofc river. Not let people i Riverwood use riverbank as storage and parking for cars.	Hamilton County is notorious for turning a blind eye to our natural resources. I would like to see increased plantings to attract wildlife and maintain and create wildlife corridors. I would like to see this done without citing and wanting an increase in revenue, but to do it correctly to protect our vital natural resources, by conserving existing native vegetation and planting more. The mor river corridor native plantingsm the cleaner the river. Ic the county actually did this right, we would have a healthy environment for now and in the future. And with the projected growth, we will need a professional natural resource focus to clean the air, the water we drink, and aquatic wildlife. Without efforts like this, development will run rampant with loss of water quality and habitat	Trails, benchez		46034	46034

Birdwatch, Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Water quality	Clean water, better access points for canoeing and nature observance	Play areas, seating and various small eateries.	Excited you're planning to improve it	46062	46069
Birdwatch, Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Water quality	Clean water, better access points for canoeing and nature observance	Play areas, seating and various small eateries.	Excited you're planning to improve it	46062	46069
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Enhance natural habitat, attract wildlife, clean water	A place for city and suburban people to experience nature and easily access to walk, bike, or canoe/kayak	Playgrounds, some coffee/lunch shops but not too much, benches, bike rentals	I would like to see us use the river to better educate us about the native people who first used and cared for it. Only having this at Strawtown contributes to our forgetting that we were not the first people to use and love the river, and could help emphasize the need to protect this resource for future people too.	46060	46202
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	Access for fishing	State park south of Indianapolis for canoe and fishing	Biking trails and fishing piers		46113	46278
Enjoy nature, Gathering with family or friends	Water quality	Water quality, public access areas to enjoy nature not activities	Parks	Protect and oreserve the resource	46250	
Kayak, tube, or canoe, Group fitness (classes, group sports)	I like the new path along the river near the Zoo and Lilly. It would be nice to have easier access from the trail to Lilly LTC campus and other business in this area. I think this would enable more folks biking to work. Or making use of this outdoor space on their lunch breaks during nice weather.				46203	46221
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining	Water quality, enhanced access.	Water with no use restrictions.	Generally soft access, educational spots.		46219	46204

IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
	Make the banks and shoreline more aesthetically appealling	Look at "Riversport" in Oklahoma City	Picnic, recreational and a hub for shoreline restaurants		46237	
Enjoy nature, Picnicking, Gathering with family or friends	Clean up the water and the river banks	l would like to see it become a clean; beautiful nature pedestrian way.	All those things.	Why has it taken so long for those responsible to explore the potential that a clean waterway can provide to the local economy as well as the quality of life? Waterways are scarce here in Indianapolis They should be focal points that make living here attractive.	46254	46202
Kayak, tube, or canoe, Birdwatch, Enjoy nature	improve water quality	free-flowing, swimmable and fishable, and able to be enjoyed by all who live in the watershed	trails, access points, low-impact businesses that cater to river & trail users		47448	46208
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking	Water quality and addition to more activities on the river that are offered in other cities. This includes paddle- boarding, kayaking, canoeing, and tubing.	For the water way to change by being cleaner and have the activities available, as listed above.	"More places to dine and have coffee at the canal downtown especially. Bathrooms available in this area too. Along the main river downtown, canoeing, paddle-boarding, tubing, and kayaking."	Having it become more of a focus point and main attraction to the city. I feel this can be accomplished by clean waterways, more activities along the downtown river, and more drinking, dining, and restroom stops along the downtown canal.	46203	46203
Birdwatch, Enjoy nature, Cycling.	Water quality (would like to fish and canoe).	Water quality and a trail that allows one to walk or ride along most of the river.	Toilets as well as fishing and canoe access.	Indy is really lucky to have a large river snaking through downtown and the suburbs. I hope to see it more respected by citizens and one way to do so is draw more interest and functionality to the river.	46077	46254
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), going for a walk	water quality	Our society learns to live with the river giving it room for the inevitable periodic floods and meandering and protecting it from harm	land immediately adjacent to the river should be in parks and hiking trails so less infrastructure is at risk when the river floods		46256	46208
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	water quality	easy access from downtown Indy/IUPUI campus to a clean river with attractive riverbank paths on both sides of the river and access to the water	canoe rental, cafes, benches, bike paths,	Have a long enough stretch to row crew shells (i.e. the kind that currently row at Eagle Creek) so we could have a head race on the White River.	46228	46202

Personal/individual fitness (running, etc), Fish or hunt	Water quality	My dream for the river is that it be restored as a place where those who enjoy it as a source for recreation can once again do so. Additionally, full navigability is also important for recreation as well as commerce and economic development. Finally, as the river is restored, I hope that it will done in an equitable way, maintaining unlimited access to those who enjoy it.	Boat ramps, fishing docs, retail shops, hotels, apartments, schools all have a place along the riverfront.	Establishing Indianapolis as a port city would help to steer this collective effort in a sustainable way.	46205	46208
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Turtles	Water quality	Cleaner, and with more things to do (i.e. restaurants, etc), preserve natural areas.	Coffee shops, restaurants, mosquito-free places to sit, river-art.	l'd like a downtown river section that was more like Cincinnati's downtown river park.	46202	none
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Water quality (because it seems other things would trickle down from this).		Greater access linking neighborhoods around the river to downtown with pathways. Adding small parks and playgrounds where appropriate.		46225	46225
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Dig sediment out to make the river deeper	I hope to be able to enjoy the river as I do now.	l like it the way it is .	Please don't ruin it with a bunch of yuppies.	46060	46060
	Clean it up. Create focal points of public interest. Li	Beautiful riverwalk in downtown Indy!	Walkable shopping, restaurants, new housing; homes & apartments, bike trail, public boat activities.	Indy has so much to potential to tap into along the White River! The Chicago River has so many great ideas to find inspiration from.	46032	46204
Enjoy nature	Water quality	Healthy water/ecosystem from which many things can prosper.	Everything - including quiet spaces for peace & undisturbed/managed spaces for nature to live.	I wish it could still be seen when driving on its' bridges! The newer bridges block the river's view & I want to see it, like I used to be able to do when driving over it.	46240	46240
Kayak, tube, or canoe, Fish or hunt, Gathering with family or friends	Water access	Grow	Parks, development for rec		46033	46033
Birdwatch, Enjoy nature, Gathering with family or friends, Recreational boating (sailing, motoring)	water quality	I would love to see high intensity places of development and recreational programming to increase access (I love the Banks in Cincy!), but much of it I would like to keep natural with passive walking trails, liveries, and enhanced habitat creation for wildlife viewing	playgrounds, places to buy coffee, dining, places to rest/contemplate, hammocks/ swings, recreation classes, a mulit-use path, places to rent canoes/kayaks, places to rent bikes, places for concerts		46219	46204
Enjoy nature	water quality	It is important to keep the areas as natural as possible.	I haven't thought about this.	No.	46217	None

Personal/individual fitness (running, etc), Group fitness (classes, group sports)	Water quality and more activities on the River	White River would have several attractions for individuals and families to participate in.	Playgrounds, water tours, historical markers and signs, water activities.	I would like to see it restored and cleaned as a river since it is a major source of water to the city.	46226	46225
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends	Indianapolis west side of river between 16th st. and Oliver ave.	There will be dining, night life, community events, canoe rentals	Adult recreation, shops etc.		46222	46222
	"All of the above "		Similar to the Potomac River in DC - access to kayaking, tubing, etc & also restaurants, bike paths, play areas (splash park maybe), etc.		46037	
Enjoy nature, Gathering with family or friends	Access	I think it should become part of the city, not a separate entity. I think we should find ways to create better access and use the beauty of the river while preserving and respecting nature	Playgrounds, coffee huts, restrooms, benches, tanning areas,	I recommend looking at how Berlin has approached its river and canal system. I think it'd be a great avenue for Indianapolis to explore	46220	46220
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Water quality; recreation (water and land sports) offered and vicinity	Maintain green space! / more accessible to enjoy the nature	Places to buy coffee; places to sit and be quiet		46202	46222
Enjoy nature, Personal/ individual fitness (running, etc), Very little. There no activities near my home.	Dredge and clean!	The White River is s long stretch! It must be cleaned. A beach would be great near IUPUI. The horrible hominy plant raised. Maintenance on existing features. Some commercial dvlp on the banks. Reopen the cafe north of 30th St. Lighting. Make Riverside Park a hub of civic activity like Garfield is. There no festivals or large group activities like concerts	Yes! See above answer.		46222	46204
Enjoy nature					46062	46062
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Increase riparian areas to improve water quality. Eliminate nutrients running into the river from farming and CAFOs. White River is filthy and ruined by pollution and sediment from runoff.	Rewild the banks of the White River. Create naturalized corridors on both sides for wildlife corridors and riparian environment to help improve water quality and prevent sediment in the river.	Natural parks/recreational areas. Don't need consumerism, shops, dining etc. Indy has enough of that. Indy needs respite, rewilding not more concrete, development and consumerism.	I love my white river. I long for a clean and more pristine river devoid of concrete and asphalt	46240	46240
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality		Recreation, homes, businesses, shopping		46236	46256

Enjoy nature, Shopping or dining, Gathering with family or friends	Water quality (in order to swim and play in the the river)	Recreation destination at multiple points along the river, touching multiple neighborhoods.	Recreation classes, recreation rentals, boat rentals, nature programs and education, natural resources education, seating areas, coffee and food shops.	It's a community asset that I would like to be able to enjoy and use, not just something to look at.	46219	46201
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Picnicking, Gathering with family or friends	Water quality for sure. Then, access points. I only kayak north of the city because the water gets pretty gross near where I live downtown.	The more large mature trees, the better. A river front walk with small restaurants could be a nice addition as long as it doesn't become towering housing structures that effectively block the view of the river.	Canoe/kayak outfitter offering trips down the river. Small cafe's/restaurants, playgrounds, tree's.	I love having the river so close. It is a valuable resource and should be respected as such. Sadly, too many people see it as a filthy old toilet and not much more. I would love to see the water cleaned up and the banks become more well kept and accessible. I sincerely hope that we see this through and the White River finally receives the love and respect that it deserves.	46202	46202
Enjoy nature, Shopping or dining	Easy access and trails along the river.	Big dream - think San Antonio Riverwalk. Smaller dream - Louisville and Jeffersonville developments along the river.	Trails, easy access and many access points, areas to picnic	Indy needs this so badly. Jay Ruckelshaus' article hits the nail on the head.	46220	46220
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Clean water	Be a sanctuary for wildlife	Trail to connect cities	Just clean and healthy with wildlife	46225	46201
Birdwatch, Enjoy nature, Walking	Safe, natural trails along the river	Clean, natural, safe places to walk, sit, observe, listen, gather, dine, celebrate, kayak, canoe, row, tour by boat	Not large playgrounds, lots of natural places to walk, sit, etc. Some dining, coffee. Not private developments that deprive others of access.	It is a wonderful community asset. Please keep it clean, natural and accessible.	46234	46204
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Picnicking	Water quality and access	I would love to be able to take my kids to a beach and swim in the water or have the ability to rent a kayak or tube and float downstream.	Kayaks and canoes should be available for rent at various locations from Hamilton County to White River State Park similar to bike share or scooters. Beaches and dog friendly areas should be made to entice wading, swimming, and activity.	n/a	46205	46204
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Water quality! Also, there aren't any places in the metro Indy area where you can go on a real hike aka several miles long or feel like you are in nature. These areas exist, there's just no public access or trails.	I want to eat the fish I catch, and be able to swim without fear of my skin melting off. It doesn't feel like anybody polices the river. There is so much trash, even sunken cars.	All of the above.	Remove all the invasives and poison ivy. Plant native plants.	46205	46240

WHAT TYPES OF ACTIVITIES DO YOU PARTICIPATE IN ALONG THE RIVER?	IF YOU COULD FIX ONE THING ABOUT THE RIVER TODAY, WHAT WOULD IT BE?	IN 5 TO 10 YEARS, WHAT IS YOUR DREAM FOR THE WHITE RIVER? HOW SHOULD IT GROW AND CHANGE, OR WHAT IS IMPORTANT TO KEEP THE SAME?	WHAT KINDS OF ACTIVITIES OR AMENITIES SHOULD BE AVAILABLE ALONG THE RIVERFRONT?	IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
Personal/individual fitness (running, etc)	More places along the river to hangout / eat / drink	Instead of going to bripp or downtown, I can go somewhere along the white river and get the same experience	Restaurants, bars, coffee shops, working spaces		46202	46204
Would LOVE to, but do not know how/where to do these near 16th st	Cleanliness, ease of accessibility	River walk with businesses, well maintained trails with connections to other trails	Businesses, boardwalk, park space		46224	46224
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	water quality; open pipes with wastewater pouring into the river creeps me out; ALSO, thinking about older Hoosiers, good, safe launching ramps for kayaks and canoes are essential. Muddy, slippery access points were ok when I was in my 30s, but now in my 60's, I am constantly looking for launch points that have a cement ramp or other safe way to get onto the river. We want to encourage our older Hoosiers to stay active into their 70s or even 80swe just need to help them get on the river safely.	important to not over-develop it such that the wildlife leaves	coffee places, benches, picnic tables so kayakers can bring a lunch and picnic near their boats	Need more good access points for kayaks and canoes. And those points need to be well published. I spend a lot of time online trying to find and then decipher where we can launch from. And then sometimes the launch points are so muddy and overgrown that you don't want to ever go back to that spot. The river is so fun once you get on it, but man, it can be quite daunting getting on it.	46250	46
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), hiking	improve water quality and habitat/ecosystem quality & conservation	The peace and quiet that the river brings need to remain, but more people should be able to access it easily. Water quality and ecosystem health should take priority above everything else.	walking paths/trails, more spots for canoe/kayak put-ins, nature/interprative/ educational signage		46220	46220
Personal/individual fitness (running, etc)	Water quality and general knowledge of where to go to enjoy	Multiple known destinations other than just the canal, etc.	Playgrounds, cafes, possible location for November Project and other free exercise, walking pathes	We can make all the changes in the world, but if people don't know about it they won't utilize it- so please dont underestimate the importance of PR surrounding your efforts!	46202	46202
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	Small boats, shops/activities, link all trails	More playgrounds, shops		46202	46202

Enjoy nature					46226	46202
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	More development along the river downtown	It should be cleaned up, and more recreational boating activities should occur. There should be more development near downtown, so that the river becomes an asset and a way to further build the city.	Coffeeshops, playgrounds, lights		46220	46220
Enjoy nature, Personal/ individual fitness (running, etc)	Water Access	Adding walking and running trails along the river	walking and running trails		46033	46033
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Picnicking	Water quality.	It would be nice to catch a fish without fear of eating it from contaminated water.	Recreational classes would be fabulous!		46227	46037
Kayak, tube, or canoe, Fish or hunt	Access points	Cleaner water	Parks and access points		46240	46240
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining	WATER QUALITY! If the water was safer and cleaner I believe more people would be interested in developing greenspaces and conservation practices in the area.	It would be nice to develop a green space in Indy so people can experience nature without having to travel so far.	All of the above. Playgrounds/parks, benches, limited cafes, green space and art, rec. activities and trails.		46220	46202
Picnicking, Gathering with family or friends	Water quality	That it is a safe habitat for our natural environment and animals and I can enjoy that without seeing so many dead fish. Keep the same: the impetus drawing attention to this major Indiana asset hat should never again be forgotten and destroyed.	I would like to see activities like a Rising Tide, a floating amphitheater for so many to enjoy!! Thatbin a unique spot on the West Bank with the best cure in the city!		46222	46237
Enjoy nature	See it!!!	Visibility!!!	Public Art attracting people especially nearby residents to connect and appreciate this valuable and ONLY river passing thru our neighborhood and city!!!!	We finally build up our ONLY major waterway making this river a true ASSET to Indianapolis and all the neighborhoods in its path if WE really want to be a impressive/desirable/ destination city like so many other have done!!!	46202	46202

Enjoy nature	l would change its reputation.	Clean,, San Antonio like!	Shops, quick lunch places, boat rides or more tubing events.		46122	46204
Kayak, tube, or canoe, Fish or hunt, Town Run Trail MTB park	Play spaces and water access specifically in Marion County would be ideal. We are lucky to have a river going through the city and should use/abuse the beauty of it. This would be a great place to provide people a reason to stay in Marion county for entertainment.	Family friendly atmosphere with food trucks, water sports, fishing, etc. This could be a hotspot and greatly increase the interest in Marion county and the park system.	Play grounds, food truck courts, coffee/ drink shops, nature learning, etc.	Keep it clean and keep it nice! Make sure it is monitored by police 24/7 via foot/bike and also surveillance.	46260	46260
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	The cleanliness of the river so I felt better about kayaking	Cleanliness of the river, more gardens, more accessible, restaurants with patios down town	Gardens, benches, restaurants,	No	46112	46202
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Gathering with family or friends					46222	46241
Enjoy nature, Walk dogs	More access, activities	Offer things to do near. (Kayak rental, boat rental, picnic areas, festivals)	Yoga, dog beach, cafes/food trucks, picnic areas, festivals, boat rentals, beach area for volleyball, etc		46208	
Personal/individual fitness (running, etc)	The river is simply inaccessible in most places, and the concrete levee walls below 10th Street is terribly ugly, but the biggest issue must be river pollution and the combined sewer overflows.	First the CSO replacement must be completed or nothing else matters. Second, the river is physically inaccessible, there need to be ways for people to get physically closer to the river as we can with the canal.	I would settle for walking trails or bike/ walk trails. SOme cities like Richmond Va have done really interesting things with the river running through the city, which can be walked across via footbridges and in some places rocks depending on water levels. They have a lot of historic signage posted along the river as well.	The biggest problems with river aesthetics, pollution, and access are all below 30th Street in historically Black neighborhoods, and this cannot be a surprise. Do not spend a lot of taxpayer money beautifying the river in Broad Ripple and Warfleigh when both downtown and the Black community needs this work much more than the bourgeois in the northern reaches of the river.	46260	46202
	Water quality	It would be great to utilize it like other large cities do (think Cincinnati, Knoxville, Nashville, etc.) with multiple restaurants, parks, and recreation available.	Food, parks/playgrounds, seating, restrooms		46220	46254
Birdwatch, Enjoy nature	Water quality / trash in river	It should not be over developed or become a destination that brings too many people or too much traffic that drives away wildlife and vehicle traffic in nearby neighborhoods should not be impeded by poorly thought out bike lanes or walking trails which make it difficult for nearby residents to get to places or things required by everyday life.	Benches	I would love to see some bat houses put in for mosquito control, native vegetation to attract bees and butterflies and stabilize banks, places for ducks and other birds to nest, and of course cleaner water.	46220	46204

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	water quality	Specific places on the river have been engineered to provide optimal fish habitat with ample public access to each location; More public parks along the river that sustain and protect the riparian ecosystem, while also giving people the ability to experience and enjoy these areas; Nationally renowned for the water quality and the network of grassroots protectors who stand watch for industrial, agricultural, domestic pollution.	Playgrounds, walking paths (paved and unpaved), bike paths, ample undeveloped areas	I really hope this project takes off. Its such an under- appreciated/under-enjoyed resource.	46240	46204
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Quality of the cleanliness (always thinking about the bodies that have been found!)	More things to do alongside the river	Interactive outdoor activities	No	46202	46201
Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality	Cleaner water water way, Dam making electricity, swimming etc			46227	
Enjoy nature	Water quality, more green spaces	Have more activities along the river. Just clean up the shore lines	Beaches and recreation areas.	Being able to feel safe in the water knowing it is clean.	46060	46060
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends	Flooding!	Continue to be healthy for wildlife that we currently see: fish, deer, herons, eagles, hawks, etc.	Hiking, benches.	Keep it clean and healthy.	46038	46060
Personal/individual fitness (running, etc)	overgrowth along river	green spaces and recreational activities	all the above	i want the river to become a destination	46140	46202
Enjoy nature	Water quality	Good water, water activities like the canal, nature walk	Boating classes, raft rides, moonlit tours	Dont leave out the area near the old naval academy, the bridge there is gorgeous it just needs maintenance	46202	46202
Personal/individual fitness (running, etc)	Water quality	Restaurants and trail upgrades	Watercraft tie up spots to restaurants	No	46202	46220
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	improve water quality	It is important to keep the natural beauty, relative peace & quiet; NO bright lights & constant loud noise (so called "music".)	Very limited so that it does not become congested.	Please do not destroy the natural beauty of the river.	46033	46033
Personal/individual fitness (running, etc)	Add downtown restaurants/pubs with river view	Add downtown restaurants/pubs with river view	Add downtown restaurants/pubs with river view		46237	46185
Enjoy nature, Gathering with family or friends	Water is dirty	I feel that they should keep it family friendly!	Play grounds bathrooms coffee snacks		46222	46254

		A place to visit frequently all year long. Something similar to Newport KY	Lighted walkways, shops, restaurants, bars, coffeshops, places for festivals and events		46259	
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Shopping or dining, Picnicking, Recreational boating (sailing, motoring)	Dredging silt levels that are filling in the river and restricting access.	"River neighborhoods should primarily stay free of activities that draw large crowds. However, development of the state park and recreational areas are greatly needed Perhaps we can have another entertainment venue and/or theme park."	I think restaurants and shops are wonderful. There should also be areas for solitude and reflection.	In general, keeping the water clean, the river free of flood debris that has lodged in the silt and free of algae.	47240	N/A
Personal/individual fitness (running, etc)	Keep it clean and safe	To have people from all ages come to play in and along the river.	Kayaks, playgrounds, food/coffee carts or small food vendors, art fairs, bike lanes on the street so they aren't riding on the sidewalk, dog waste bag dispensers, community festivals	I love the White River near the zoo. The new pillars on the NY street bridge are great!	46222	46202
Enjoy nature, Personal/ individual fitness (running, etc), Bicycling	Water quality and trailways	I would love to see more things to do off white river parkway to make that portion more exciting and inviting. Also on the trailways better signs or maps to show how white river trailways can connect to monon trails. An extension and cross walk lights near the river side entrance off of 30th St. People cycle there and it's not obvious to vehicles when someone is crossing to continue on a not so obvious trail.	Skywheel would be a nice land mark for the city. Several cities Myrfle Beach and Atl have that as an attraction-along the portion between Michigan St and New York st. Ours could be lit different to set us a part. Also binocular stations near the river, and closer access to the water ie a walkway that was closer (but still safe). Also a mini nature center to give history about the river, different species of fish, birds, and etc in the area, as well as near facts about the city-less formal than eiteljorg or state museum.	It's one of my favorite places and would love for our city to embrace it and teach the youth the importance of keeping our river clean.	46222	46254
Personal/individual fitness (running, etc), Gathering with family or friends	Water quality	Clean, recreation such as tubing	Parks		46220	46220
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Shopping or dining, Gathering with family or friends	Play spaces	Riverwalk with dining and shops	All of the above :)	I feel like it's on the cusp of something amazing!! Such an asset.	46228	
Enjoy nature, Walking, photography	Access	Clean and accessible. Multiple public viewing spots	Benches, trails, boat access, overlooks	A vibrant asset to central Indiana	46237	46220
	Feel like a cleaner space/water	nice balance between nature and commercial space	Classes, playgrounds, green space, coffee shop, walking trail		46077	46077

Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	It's important to improve the quality of the river and improve human respect for the river.		It's important that we do not over commodify the river and lose sight of its flooding potential. Any added amenities or connections should be accompanied by plans and means for maintenance and protection against added trash and pollution.	46220	46220
Birdwatch, Enjoy nature, Shopping or dining, Gathering with family or friends	Store and restaurant in the river	Night life on the river	Benches, nature's paths to the river		46241	46203
Enjoy nature, River recovery	Improve water quality	Downtown access points	Mixed residence, retail, pubs	Fishable and swimmable .	46208	46208
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring)	Cleaning up some of the trash along it, and doing better at preventing severe erosion along it in some areas of southern Hamilton and northern Marion county, it muddies the water downriver at my house and fills it in slowly. No-till farming in the White River watershed would be nice, too; keeping fertilizers, pesticides and eroded topsoil out of the river-preventing alga blooms as well.	I would love for more people to discover just what an ecological and beautiful gem it is, but I want very selective and minimal development so as to not disturb the healthy ecosystem I've daily watched develop in the last 25 years. I'm concerned about parking lots that may be built at rec spots on the river because of car fluid runoff and contamination.	Please keep playgrounds, merchants, etc off direct riverfront (much like Holiday Park does) to preserve the TREES and natural environment, all that's needed to enjoy a riverfront is access and some benches and/or picnic tables	Every year more varieties of waterfowl and amphibians are showing up along the river, I really don't want anything that is going to interfere with this amazing regeneration.	46240	46240
Birdwatch, Enjoy nature, Walking my dog.	Water quality	"Maintain the river as a healthy, vibrant natural environment for animals and birds. "	Benches and observation platforms are always great.	I love the river and all it has to offer, just as it is. If it turns into a playground for people, it will be a much different place. I've been so fortunate to see bald eagles, foxes and pileated woodpeckers on my daily walks. The animals and birds don't have a say in any of this. I feel like it is 'their' river. It is their home.	46208	N/A
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking, Gathering with family or friends	Water quality, access, boat launches south of Indy, more canoe rental options,	Clean, open more accessible places to enjoy it at	All of the above		46158	46151

Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Group fitness (classes, group sports), Shopping or dining, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality	I would love to see shopping and dinning areas along the river with the canal type vibe I Wish the canal had more restaurants and bars it would be awesome to see something like a mas ave or brodripple type area along the river downtown like in the old gm plans place	Playground walking trails store front restaurants, bars, night clubs	I hope we can make this city better then we got it	46222	46143
Enjoy nature	Make the quality of water better, there is a conception that it's dirty and unsafe to get into.	The river should be a point if destination kind of how other cities use the river for tourist attractions. One city that comes to mind is Austin. They have a splash park for dogs connected to a pool, they also have the green belt and these are good uses of the Colorado River.	Benches, restaurants, more places for boat rides or paddle boats	What happened to the beach spot plans? Make that happen. It's a great idea.	46202	46226
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Riverside/river view walking paths	To offer both urban, developed spaces as well as more secluded, natural spaces both within Marion County	The urban areas should all have benches, bikeshare, water fountains, lighting, and open spaces for gatherings and events. The non urban should have fitness/ recreational options such as boat rentals		46205	46205

Shopping or dining, Picnicking	All the above. A shame indy hasn't done more by now	It should definitely be transformed as a destination spot and a tourist attraction as well	All thee above. I would love to see a beach of some sort and a theme park like pier 39 in the Bay Area. Shopping,bars with live entertainment and of course restaurants. A nice Ferris wheel and water activities. I like water bumper cars just fun activities. Local talent and magic shows on a stage ect Indy's own little board walk	I would love for planners to make a bold statement and really be creative and make this a true attraction. Indy needs to think BIG and stop being so simple with our ideas. There's a lot of competition from other cities so indy has to make sure whatever we do that it's grand and bold	46216	46206
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	water quality and safe play areas	be more like the canal in safety and features	all the above~!	This is a great idea and exciting! I can't wait to see how it grows!	46168	46202

Personal/individual fitness (running, etc), Gathering with family or friends	Improve water quality by addressing sewer input, allow access to river downtown	Clean river with access for water sports, maximize the water usage with downtown as background view. WR park downtown vibrant active part of the downtown scene.	walking paths good but with overgrowth in some areas concerned about safety if alone, love to have access for drinks (water/coffee/etc), light snack, space for events.	Spent time on river last weekend with a dragon boat race. The view to downtown was amazing, but access to the river was disappointing but fixable. That special spot is a post card for our city for sure.	46237	46202

Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining	Overall look and feel. Get rid of the neighborhoods that are too far in the flood plain and put in more protected public parks instead	Have multiple areas of Indianapolis (downtown and broad ripple for example) that are more centered around it. Restaurants, living, work, etc.	Trees, parks, restaurants, living, trails	A big push will be needed to get a change started	46220	46204
Birdwatch, Enjoy nature	Water quality FIRST	Water taxi from carmel to Indy. Dining & family activities	Dining. Music. Amusement park.		46260	
Birdwatch, Enjoy nature, Work	access to views and experiences along the river	able to see people recreating in and along the river, especially with development of trails along the river like Monds Greenway	trails, viewing spots,	glad to see some emphasis on the White River	46220	46250
Personal/individual fitness (running, etc)	Enforce the Clean Water Act, and work to eliminate the awful pollution in the River. When there's signs posted Downtown on the White, warning of "contact with the water", then the water is too polluted to actual come into contact with. So why would I actually want to paddle there if the water is too polluted? Don't bother with development until the pollution is mitigated.	Mitigate the pollution. Eliminate the Combined Sewer Overflows (CSO's), and industrial point-source pollution that makes the river so incredibly polluted. Development along, and programming in, a polluted river is STUPID!	Nothing whatsoever below the tops of the surrounding levees until the river is CLEAN. Water that carries a pollution warning does not need to be exploited, but DOES need to be mitigated.	Prioritize river pollution mitigation first and foremost, or all the funds spent are senseless, and a waste of time, funds, and effort. Who is silly enough to want to spend time next to a smelly, polluted, toxic river?	46204	46204
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Quiet, solitude	Access, consistent cleanliness	Public access, social activities near downtown, better access kayaking, info on terrain & safety	Fishing areas, seating, boardwalk & walking areas along longer portions of river		46202	46208
Enjoy nature, Personal/ individual fitness (running, etc), Group fitness (classes, group sports), Gathering with family or friends			recreation classes		46222	
	Water quality	It needs to be inviting with areas to sit and enjoy with family	Definitely benches and small nature walkways		46123	46202
Enjoy nature, Personal/ individual fitness (running, etc)	Trail/walk/bike access along full length of river	Easy bike/boat/kayak access with spots for fishing, swimming, tree swinging with intentional residential/commercial development at strategic points	Yes!	Glad this is on the table now	46278	46225

Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends, I like to sit out on the riverbank behind my dad's house undisturbed with a few buddies and catfish all night long. If there's a trail back there it will no longer be undisturbed and will take away from the natural beauty and tranquility of the people who bought property on the river to get away from it all.	I would try to fix the fact that your trying to put a trail in behind my dad's house.	It's important to keep it the same because the people in Northeastern Hamilton County moved out that way to get away from people. And I guarantee you that the majority of them don't want a bunch of City people walking through the back of the Yards. What happens if someone decides to step off the trail and then is now trespassing on private property and gets hurt whose insurance pays for that?	If you want to go to a playground go to the park and if you want to buy coffee go to Starbucks.	I think putting a trail along the river through people's private property is a bad idea all the way around. I'm all for keeping the river beautiful I support White River cleanup days and Prosecuting people who think that the river is a Dumping Ground. I just don't think that Northeastern Hamilton County is the place to put in a trail please reconsider this.	46901	46901

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Oh, there are many things I'd like to see fixed but first and foremost is removal of lowhead dams	The city is really missing out on prime waterfront experiences because our river is dirty and unsafe. I'd like to see it cleaned up so busioand parks can grow along the river	Yes! All of it it!		46203	46231
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Access	I hope it becomes a clean, sustainable cultural destination that retains some of its natural surroundings while offering more activities for visitors.	I'd like to see more access to canoes, kayaks and other small watercraft in Indianapolis. I'd like to see a long, safe, accessible trail featuring play and picnic spaces, an amphitheater, food and drink options, and public art.	This is an opportunity to enhance our city and I wholly support this effort!	46260	46202
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Enhanced ecology	Enhanced ecology	More human powered rental opportunities		46220	46040

Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Activities need to be open. Riverwalk along side it downtown along with a nightlife area and restaurants maybe a destination area development to attract all the convention people and downtown works/ those of us that live downtown	It should have added a riverwalk, have some place downtown to rent a boat, and have developed nightlife shopping and restaurants along the banks	Playground, boat rental places, nightlife, restaurants, ferries wheel to see the skyline, benches, public bathrooms	I envision it being dammed up at some point so we can have riverboat tours when it is deep enough!	46204	46278

Birdwatch, Enjoy nature, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality	Preservation/conservation of wildlife and nature ecosystems through responsible tourism ventures while also addressing the currently relevant safety and homelessness issues, city-wide.	I live downtown, so: lights/emergency call boxes/patrol for safety/curfew; dog park; nature trails; appealing adult-centric and unique character amenities that complement the existence of the river in that specific location (specialty shops, fine dining restaurants, art galleries and more public art, boutiques and boutique hotels, historic sites), not the generic commercial crap that you would find within a few miles of any suburban subdivision detention pond (= no playgrounds. no starbucks. no public beach. they have all of those things in the suburbs, don't need them downtown.)		46204	47906
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	Water access and water qualify	"Scenic River designation, restaurants near downtown, walking path along river but maintain ""wildness"" of river in Hamilton co where there is little development. I love seeing turtles, birds etc while kayaking and the ""get away"" feeling and sense of peace I get on the river, "	All of the above but more in Marion where development is more. Somewhat related, is my concern how Fishers will develop the waterfront park on Geist. My fear is increased visitors will disturb the swan, geese and heron nesting spots. I would hate to have same thing on White.	More canoe/kayak access points in Marion. Love how 116 bridge river access has been upgraded.	46037	46208

Kayak, tube, or canoe, Personal/individual fitness (running, etc), Fish or hunt, Shopping or dining, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring)	River Continuity> Get rid of the four low headed dams along the river throughout the city.	It needs to be crystal clear, have beaches on both sides throughout, have running, mountain biking, and river access trails, have lots of green seaweed in it, have pretty water falls, and have lots of forest acting as a barrier from the city pollution.	Benches, Kayaking rentals along with tubing rentals and canoeing rentals and paddle boarding rentals, Snack bars, and indoor shelters.	Why did we build this city in the first place? Water. We turned out back on the main reason indy was built, and now its time to restore and turn the white river into a "roller coaster" or something that can attract people like roller coasters do. Humans are naturally attracted to water, an investment in the white river improves quality of life throughout Indianapolis and tourism as well. in the long run indy will get profit from this. Make it amazing again!	46077	49706

Infrequent casual walk	Attract riverfront development. Complete the combined sewer overflow diversion project.	Entertainment and recreation attractions downtown.	Sailing, kayaking, rowing, fishing, a constructed white water course, a "beach" with spray pads, coffee shops, performance spaces, dog park/beach, trails, woodland preservation areas.	The low dams in the channel downtown create barriers to boating. How can this be addressed? Side channels for boats, kayaks?	46121	46202
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	Beautify the banks between Morris to 465 to be south	Beautification of the river banks that invite recreational use	Boat rental, small eateries	It is our one natural resource- we should take advantage of it.	46217	46222
Birdwatch, Enjoy nature, Gathering with family or friends	Water quality	A safe place for people to gather including walking trails. Attractions for family activities.	All of the above; also restaurants, possibly areas for family-friendly free music concerts in the summer.		46228	46228

Gathering with family or friends	Water quality would be # 1	I hope it becomes one of the cleanest rivers in the country. And the native wildlife (PLANTS AND ANIMALS) flurishes. The ecosystem will be healthy. I also want there to be a balance with the growing population. Its beautiful here and people everywhere should want to see it. Making it more accessible would be great as long as it done in a way that respects and protects the natural beauty	Nature sites that interact with visiters. Describing life before the city. I.E. indigenous people (we are Indianapolis Indiana) , native species of plants and animals and how its become the city it is now. You can see some of this in museums here, but it would be great to see this along the river in meaningful ways.	I hope this vision really has success and brings wonderful change and beauty to the city	46107	46208
Personal/individual fitness (running, etc), Gathering with family or friends	play spaces	like the river walk in San Antonio	playgrounds, coffee/restaurants, benches, classes		46202	46204
	Make it navigable downtown	The river and its shores should become a major part of downtown infrastructure like many major cities.	Trails, restaurants, shops, river cruises/ taxi's	Every river has bridges. Unlike most major cities, Indy's bridges are uninspiring. The major bridges should be unmistakable landmarks.	46240	46240
	Water quality	Should be viewed as Indy's greatness natural resrouce. Preserve viewsheds and forested buffers.	A large sand beach zone downtown. Could host sand volleyball sporting events, national sandcastle tournaments, etc. Too close to convention center not to utilize both for a conference geared towards it.		46203	46202
Enjoy nature, Personal/ individual fitness (running, etc)	Make it clean and safe	A go to spot with restaurants, walking trails and community show piece	Restaurants with water views, paved trails and areas for yoga	I'm skeptical the dreams are possible and will be implemented	46123	46285

Birdwatch, Enjoy nature	access to Lilly Rec Center, Safety along the river (it is unsafe to travel with too many people squatting and living in the space)	I would like to see the white river cleaned up and used for recreation, sports, sculptures, educations, fountains, and experiences along the river.	sports, boating spaces, the water as architectural experience	The river must be safe or its not worth the investment	46221	46221
	Water access both formal (e.g. beach/ green spaces) and basic walking/running trails	Non-navigable river = perfect for people. http://boiseriverraftandtube.com/ Boise, ID has a non-navigable river and they spent 10+ years cleaning it up so people can float down it in tubes, and now it is amazing. Indy can do this too. And you should be able to go for a run for miles alongside it.	miles of basic walking/running/biking trails, with regular green spaces with coffee shops, food trucks, boats and other activities for families		46204	47907

Gathering with family or friends	Water access	Clean it up, increase access, get rid of those dangerous lowhead dams.	Parks, cafes, put-ins or boat ramps		46032	46204
Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Clean it! Then have restaurants, festivals, and public events and music.	Don't overbuild. Keep trees and green. Don't turn it into a cement parking lot. Make it natural and beautiful.	Benches and tables, pretty lighting that doesn't look like ugly streeet lights, trees for shade on easily accessible grassy areas for lounging and picnics, accessible to wheelchairs, allow dogs and provide disposal areas and drinking fountains for people and pets. Bike paths would be huge! Please find ways to attach paths to the canal, Monon, towpath, etc.	Provide for Daddy please! Police on bikes and horses, video cameras, lighting, call boxes for help.	46033	46260
Kayak, tube, or canoe, Fish or hunt, Shopping or dining	pollution from upstream, 'non-point source' (CAFOs and Septic Tanks, CSOs)	ownership by the people, access for the people,	No low head dams!	Scary campground near the white river, noblesville; mean man owns, huge risk to community	46032	
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	Clean it up	Cleaner with more access points			46033	46033
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Water quality.	Leave the rural area rural and undeveloped. Develop the canal in Broad Ripple to Indianapolis.	If you have seen how trashed areas become when developed you wouldn't ask. I have been here 22 years. State Road 37 is a dump in most of the fence line areas. Pristine areas don't stay that way when you bring in people who have no respect for the area.	I would like to see a time when the White River clean- up crew is no longer needed to remove the dumpsters full of trash that people who have no respect for the area leave behind. Diapers, tires, mattresses. I've helped pull it out.	46060	46060
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	Cleaner water, improve water fronts while keeping natural, not have buildings turn their backs to the river	Keep natural, enhance views and use	Access by foot, bicycle along, refreshments		46032	46032
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Picnicking, Gathering with family or friends	Water quality: trash removal and water quality testing around industrial sites	More public events need to occur around the river to draw attention to the health of the water, wild life, and surrounding land.	Playground, recreation classes, concert venues, more activities that involve the river.		46060	46038
None but I want to canoe/ kayak	water quality	Be clean! An active area for recreation	public spaces & car rentals		46202	46224

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring)	Educate people on the importance of trespassing.	l would love to see it unchanged but clean. No reason for a river to grow or change in my area.	There may be places for these things south along the river but not north and east of Allisonville. Let the river be a river! No need to make the whole river an economic growth point.	I do not want to see land privately owned taken so as to make it a public space. Why would I want someone who chooses to live in a neighborhood come to my area and use my ground as their own (public). We have a plenty hard enough time with this already and no support from anyone to enforce these issues. Creating more public spaces will only add to this problem.	46060	46031
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quality	Debris cleaned up, more wildlife, more access	Nothing commercial!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!	I am not a frequent user of the river areas but it's an extraordinary public resource that should be accessible and kept free of commerce.	46240	46241
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Water quality	The river corridor should be developed on a limited basis. Natural areas need to remain to be a key part of the river system	Parking areas		46220	46204
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Development/ Business Experiences - Floodplain is a hurdle	Grow in more urban areas (downtown) remain natural in others (rural)	Playgrounds, restaurants, coffee shops, camping, boat launch, pedestrian bridges.	I love parks along the river with more "bringing the river in" to attractions, similar parks in bigger cities like Cincinnati.	46031	46060
Gathering with family or friends	Water quality, things to do around it, getting rid of the idea that this is where bodies are dumped	It'd be great to see different recreational activities that help connect the river and downtown life	Asheville had a fun lazy river that allowed you to get in and get out in different locations with things to do at each spot. (Breweries, bars, etc.)	Nope	46218	46205
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Cleaner, more public places on the river (bars/restaurants)	Trails along riverfront to fun public places			46220	46278
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quality	Keep the green spaces along the river.	More benches, water fountains		46220	46220
Enjoy nature, Gathering with family or friends	Water Quality	Clean Water, enjoy nature			46220	46204

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), hiking	Water Quality	Water Quality and reduction of topsoil sediment in River	Less of the above development and more trees and natural investment & cleanup. Dredging would be a good option also	Put it back to what is was 40 years ago as a river that was swimmable.	46220	46220
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	More trees and more natural settings	Keep all natural vistas and continue tree planting.	Just in city areas only, possible limited river dining at 1-2 restaurants	I want the issue of graffiti to be addressed on structures near holiday park. It creates an unsafe feeling	46220	46220
Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining, Gathering with family or friends, walking my dog	water quality, sewer smell/garbage	That there are oyster farms up and down the river. They filter a gallon of water per hour per oyster and provide a local food source. The oysters could be free farmed and the community could volunteer in return.	Educational classes could help with getting the water clean again.		46203	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Gathering with family or friends	water quality, wildlife areas, restored wetlands	I'd like to see more of the river returned to its natural state	responsible reclamation can involve facilities and amenities, but it should prioritize sustainability		46203	46202

Enjoy nature	Water access and view, especially in Broad Ripple Park	Make it more accessible to people, but maintain natural beauty. Keep it clean.	Paths for walking, paths for cycling, benches, nature informational panels		46208	46208
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quality	I think the white river should be a focal point of the city. It should be a place that has beautiful nature, but also has areas with larger parks and an entertainment scene, i.e. restaurants, cafes, shopping.	Playgrounds, cafes, restaurants, boutique shopping	I would love to see Indianapolis become an even more beautiful and vibrant city by using the White River to our advantage, like many other cities have started to do. For it to be a clean river with both entertainment attractions and quiet nature would be amazing.	46260	46260

IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
Enjoy nature	Water access	Should be the heart of all communities along it. We should turn it into an amenity with connected green space, places of activity with restaurants and cafes, places to play and gather	Playgrounds, parks, beach, lots of access for entering the river, boat launches, river walk, cafe, bars, restaurants.	Need to carefully balance development and public space. We need to dream big and look at what other communities are doing like Tulsa, St. Louis, and Columbus OH. Having a visionary firm like mvva landscape architecture or field operations landscape architecture would be a huge step in the right direction to create the vision and detailed plans for large scale projects along the river	46202	46204
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Recreational boating (sailing, motoring)	Water quality, sand bars, trash on banks.				46220	46220
Enjoy nature, Personal/ individual fitness (running, etc)	Access	More engagement opportunities along the river (fun, fitness, entertainment, food, housing); clean it up downtown	fitness spaces; food and drink; benches	As your plan moves forward, keep cost of living affordable. Don't make this exclusive for the well off.	46228	46204
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends					46208	46208
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Having safe access. Larger spaces dedicated to enjoying the river, cleaner water	This should be a focal point and draw for events, reunions, weddings, small get together, it should be where high end restaurants and night life seek to purchase property and be.	Playgrounds, breweries, fitness, small shops, restaurants	I remember when I moved here from the southeast coalstal region i was so excited to have a beautiful water area nearbyuntil I was told you don't go in it and that's where bodies are dumped, by everyone and anyone. We need to change this! It should be a draw not a setback	46202	46202
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality.	More recreational opportunities.	waterside trails for biking/walking	Just would love to see White River clean and habitable for wildlife. That would be a wonderful urban experience for everyone.	46225	46202
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water Access and overlooks	Park areas and tree lined areas should remain largely untouched but more access should be available in the cultural centers (i.e downtown, Broad Ripple)	Boat rental and play areas, restaurants with river views		46220	46203

I live along or within a half mile of the river.	Kayak, tube, or canoe	The river is dirty	Broad Ripple Park, Conner Prairie, Holliday Park, Indianapolis Zoo, Lucas Oil Stadium	I live just north of Broad Ripple Park and the river has been taken over by milfoil. I have lived at my house for 25 years and in the past 10 years it has gotten to the point where I can't use my waverunner any longer due to the milfoil clogging up my impeller. It's very sad because the river is what makes this area unique!	my backyard

WHAT TYPES OF ACTIVITIES DO YOU PARTICIPATE IN ALONG THE RIVER?	IF YOU COULD FIX ONE THING ABOUT THE RIVER TODAY, WHAT WOULD IT BE?	IN 5 TO 10 YEARS, WHAT IS YOUR DREAM FOR THE WHITE RIVER? Kayak, tube, or canoe, Birdwatch, Enjoy nature, Shopping or dining	Water qualitygetting rid of invasive plants that are taking over the river	The river should be cleaned up and restored to its best quality. There should be places to enjoy it with lots of people and also places to enjoy in solitude.	Benches, amphitheaters, a few restaurants but not many	Please, please, please restore it's quality to when it was clean and the reason it was named WHITE RIVER.	46220	46032
Birdwatch, Enjoy nature, Walk dog	Water access	We would see pavilion and easy trail access so we could walk along it starting at any point. Also, I would like to see it from more streets, just driving along	cafes, benches, trails!	Cleaner would be better, but a lower priority than physical access and visual access	46205	46205
Recreational boating (sailing, motoring)	Eradicate the milfoil and dredge low areas.	Stop development and limit access		For the stretch of river between Sandy Point and BR Damn, dredge low areas and treat for the milfoil. This area should not be developed any further than what it is.	46220	
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends, Biking, hiking	Improve water quality	Would love to have nicer, better opportunities to enjoy it. Also important to keep some quiet, undeveloped places.	Restrooms, benches, shade.		46205	46205
Enjoy nature	WATER QUALITY- would do more (i.e. kayak) but horror stories on quality keeps me out	attract more non-notarized boaters with easy access and clean water	more hiking trails educational information		46220	46220
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Improve access (getting down to the river's edge) along the White River Trail including removing invasive species so you can actually see the river!	It's cleaner. Similar to the Cultural Trail, there are businesses, parks and events held on or near the river where you can enjoy a meal, physical activity or cultural event along, in or on the river. Riverside trails are busy and frequently used. There are events that encourage engagement with the river and trails along it, e.g., 5K runs and walks, kayaking or canoe races/events, bicycling events. Right now there's not much I'd keep the same because so little is done with the river!	Restaurants, cafes, concessions for ice cream, coffee, etc. Benches, picnic tables, locations for outdoor yoga, group exercise. Concessions to rent kayaks or canoes, water skiing, water boarding, individual personal watercraft (Seadoos), in-line skates, bikes. Downloadable audio tours for walkers or bikers. Definitely playgroundsdare I say one with a beach?!	It needs to be cleaner, obviously. But as a non-Hoosier I've always wondered why the river hasn't been incorporated into the city's landscape and fabric much more. Even the White River park, on the zoo side, initially seemed to really have a barricade between the park and the river rather than integrating it into the park.	46228	46228
	Visitation from land	Should be an asset to the cities	Restaurant , bar and outdoor dining st the armory		47220	Retir
Enjoy nature, Gathering with family or friends	water access	That the river and riverfront is a destination and draw to the community and toursism.	Playgrounds, places to buy coffee, benches, recreation classes, cafes, restaurants, casual and fine dining, retail, concerts, music festivals		46220	46205

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Picnicking, Gathering with family or friends	Slow down motorboats	More human powered boats, less power boats	Public River access to Broad Ripple village, canoe/kayak rental at broad ripple park with easy launching sites.	Cleaner water	46220	46220
Personal/individual fitness (running, etc), Gathering with family or friends					46220	
Kayak, tube, or canoe, Birdwatch	water quality	more places to access	cafes, kayak launch, natural areas		46219	46202
	Water Quality	It should be a hub of activity, a place to connect with a nature, a clean and safe space	recreational hubs (places to rent kayaks, etc), parks, playgrounds, coffee shops, ice cream,		46106	46106
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quality	Keep the natural wilderness	benches		46220	46220
Personal/individual fitness (running, etc)	water access	My dream is for it to be safe, convenient, and full of life. Nature is important, but it feels like there are very few opportunities to enjoy the river. Having things like the Potomac- restaurants, boathouses, and biking and walking trails would be an amazing asset.	bike racks, benches, parks, little coffee stores, kayak/paddle board rentals (in multiple locations so you don't have to be picked up!), fitness trail amenities.		46202	46202
Kayak, tube, or canoe, Enjoy nature, Recreational boating (sailing, motoring)	Water quality	Easier access, cleaner, additional outside restaurants and live music venues.	Coffee houses, restaurants, outdoor music and movies.		46220	
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Water access- more visible to the public and publicized	Restaurants along the river, public beaches, places to rent kayaks and boats	Yoga/fitness classes, picnic area, beach	It feels like a hidden gem that very few people know about. Some are scared to enjoy because it's too dirty.	46220	46240
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring), paddle board	save the banks!!!! Clean up the water and trash, emphasize native trees and plants. Some access for boats to pull up to eat.	It is very important to me to save the banks, trees and wildlife and health of the water and aquatic life.	I hope that we don't overbuild without saving the bank. What has happened to Broadripple Park's bank is horrible. I don't have a problem with giving access to people as long as the river is taken care of. I have a problem with the amount of duckweed and destruction to the banks. I would love to be able to find a balance that allows us to park our boat somewhere other than our own dock to enjoy food/drink (coffee, beer and/or wine garden/music).	I have had access to the river for a long time and lived on the river for almost twenty years. I feel that it is important that we have a plan that takes care of it and doesn't overbuild or put people on it for recreation at the cost of property and the health of the river and wildlife/nature here. I hate that hunting is allowed within the city limits!	46220	46220
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Less pollution	Less pollution, better water quality, fewer or no motorized craft, removal of invasive species including honeysuckle	Parks, boardwalks, restaurants, cafes		46220	46278

Enjoy nature, Personal/ individual fitness (running, etc)	Park and recreation development along the river is sporadic and often boarders industrial or undesirable locations. Need to create a rather large natural buffer zone so to allow for trails and natural reclamation so that when you are going from point A to point B it doesn't feel like you are walking next to these sites.	A series of connected points of interest that are either natural features, art, or viable commercial zones. Would like to see an increase in the access points to the river. Increase the size of the natural buffer zones at these access points so that nature transitions in the adjacent surrounding area.	Art work, zones for athletic / recreational activities, and contemplation areas. Commercial areas need to be located in areas that could help to revitalize and / or enhance the surrounding commercial or high density residential areas. Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	i;d remove the numerous low head damns They are no longer serving any purpose. The one that creates Lake Indy might be an exception, but I think the use of Lake Indy needs to be reviewed. Other than the water ski group, how much other use is there that would be changed by removing the damn south of 16th street?	I;d like to see mixed use. The trails on the west side of the river are terrific but even a bathroom would be an improvement. I'd like to see mixed uses to draw a diverse range of folks to the river.	picnic areas would be good, there are some in Riverside Park, but that park seems underused, not sure why, i use the trails there but my neighbors seem to think it is "unsafe." Enjoy nature, Personal/ individual fitness (running, etc), Shopping or dining	Water quality	Main desire is bicycle and walking path/ trails along the river. Should connect far south and north sides to downtown.	As many types of public access as possible - pocket parks, benches, maybe parking pads for food trucks, refreshment stands, etc. any commercial development plans should include access points and amenities.	Clean-up of the river and banks is a priority.	46217	46217
Enjoy nature, Fish or hunt, Gathering with family or friends	Water quality, water access, beaches/ swimming places, fishing piers	(See Barton Springs in Austin, TX) A place to swim, enjoy nature, cool off in the summer, meet with friends, have public art events. I'd love to see a plan to help the fish and wildlife in the river, make it an angler's destination. Better accessibility.	Gardens, beaches/swimming spots, playgrounds, beer/food gardens. No luxury or residential development, keep it simple and for all people	I love that the city is making this a priority. I want to see the River become a place for everyone, not over- commercialized, or filled with a glut of ostentatious housing. Bring nature to Indianapolis residents.	46202	46208

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt	low head dam removal	I would love to see the river as a major recreational center. I will not kayak downtown due to the low head dams, water quality, river access and personal safety, but I would love to be able to kayak here after work since it is so close to my home. I think developing the western shore will help with the safety considerations.	Certainly small shops, playgrounds, benches, open recreational areas and developed launch ramps, public restrooms and a cance/kayak outfitter. Another concert venue west of the river would be excellent.	One thing we mustn't lose is excellent bank fishing access. The black west side community heavily fishes the areas between approximately 10th street and the south-most downtown dam (near truck and bus) for catfish and small mouth. I would hate to see the stringtown neighborhood pushed out as this area is developed. If no one has talked to them, I believe the Westside Bait and Tackle owners would be good advocates for this group's needs.	46222	46205
Birdwatch, Enjoy nature, Picnicking, Gathering with family or friends	Clean it and the banks along it up!	Have it clean enough that it could would have fish good and safe enough to eat, not stink. Paved walkways along the river with an occasional vendor selling food/drinks. Maybe a Plen Air event/ invitational where artists could have an opportunity to both paint and sell their works. Would make for a nice event for the public while promoting how great of an asset a clean and safe river is for the city its residents and tourists.	Coffee, painting classes actually classes of any kind that would be practical to be taught given the area/space. Beautiful/ unique Markers/signs along the river that folks might actually want to read noting particular wildlife or historical aspects. Perhaps a few ghost statutes like those in Union Station depicting people of previous generations who enjoyed the river when it was something to be proud of.	This initiative gives me hope that White River has a promising future and no longer a body of water known and avoided for housing God-knows what in or at the bottom of it. Twenty years ago I was in San Antonio and saw what they were able to do with its river and river walk. Indianapolis has an opportunity to blow how that city has capitalized on and beautified its riverout of the water	46202	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Picnicking	sediment/TSS, DO, e coli impairment	improve water quality, increase public access			46074	46902
Enjoy nature, Gathering with family or friends	Water quality, access, intentional recreation areas		Recreation, classes, dining, outdoor sports	We aren't technically a waterfront city, nor do we have mountains, etc. So now that we've finally successfully been promoting our food and music culture, we need a draw for healthy athletic people, similar to Austin, Denver, Seattle, Minneapolis. The White River should play into this.	46205	46205
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	Remove low head dams. Stop some of the ag. and city run-off.	less dams and cleaner water.	Enhance the natural areas.	More respect of the river by the general population.	47396	47396
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	More access points and emergency call stations	Trash cans to prevent litter		46239	46222

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Picnicking	Water Access	Improve water quality, public access with parks or open space along most of its banks.	More developed parks, restaurants, cafes, trails, and places to be near nature.	I am not a fisherman and do not know what is possible form that standpoint, but would hope that fishing could be a meaningful use of the river.	46033	N/A
Recreational boating (sailing, motoring), Water skiing	Remove the weeds.	Make the river usable as far North as possible.	Restaurants with docks. Gas pumps on the river for boats.	Improving and protecting the water way for recreation is crucial.	46240	46038
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	Improve water quality and water access for kayaking				46140	46140
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Mountain biking (Town Run)	Remove all low head dams (or provide clear signage and portage opportunities)	More kayaking opportunities	Kayak launch points, restrooms, picnic areas		46077	46278
Birdwatch, Enjoy nature	Play spaces, cafe's , nature programs	I would like to see it embraced and expanded in use and focus. Other cities make all kinds of events and focus of their waterfronts San Antonio for one and it makes me sad that only a small potion is highlighted here.	I think all of those examples would be good. Memorials would be a nice touch too getting the community together having schools in the area bring kids to help with gardens and planting trees to make them feel like it's their area to take care of in the future too.	I would love to see more efforts to clean up the water as many believe that it is unsafe. Community Conservation programs and community awareness of actions being taken can go a long way in terms of people's perception and participation in the nature around us.	46060	46037
Enjoy nature, Personal/ individual fitness (running, etc)	Removal or change of lowhead dams	Clean the water quality - I would love to kayak along the river, but never have due to low head dams and water quality.	Walking path that is actually maintained - I think it would be highly used, but in all honosty, the river is not aesthetically pleasing at all right now. There are multiple dams with large branches/trees/ debris. That same debris is piled along the sides too. Trash litters the side.		46220	46204
Enjoy nature, Shopping or dining	Play spaces	I would love to just see it be more usable - I know where I can go to look at it, but I don't know what I can do actually in the river.	Everything. I'd love to be able to tube down the river, or have a decent swimming spot (because the "beach" at Eagle Creek Park barely counts).		46254	46254
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking, Gathering with family or friends	Water quality, improved access/ observation areas, retail/dining along river	Easy access, cleaner, retail/dining on or overlooking the river, more parkland on river	Parks, retail/dining on or overlooking the river, more canoe/kayak rentals, boat tours		46062	46032

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	The most important thing to me is trails to walk/run/bike on.	To have extensive trail system.	I would say to complement the trail system places to buy ice cream and other snacks. Benches too are a must.		46204	46204
Enjoy nature	water quality	no longer be an afterthought (i.e., city doesn't turn its back)	there's a place for all of those, but also important to keep parts of it natural		46260	46204
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Access, activities, clean up the banks and create parks/public space like Cincy and Louisville	We're like Cincy, where it become a destination for activity, concerts, living.	Benches, parks, water access		46250	46226
Enjoy nature, Personal/ individual fitness (running, etc), Educational—lead class field experiences	Water Quality, Access	Large midwestern cities have their rivers as the focal point. In Indy, it's the "ew" point. We drive over it in passing and don't even want to touch the mud that gets left behind when it floods because we're unsure what's in it. Few industries are centered around it. For example, St. Louis, the floating McDonalds, the Arch, the casino, all are centered around the river. Chicago, tourism—boat excursions and HEAVILY used running trails—all depend on the water. In Indy, you really just have White River State Park & the canal where all you can do is walk around and eat at a select few places. Build it up, get people River-centered in their activities! Put restaurants along it, give people greater access outside paddle boats.	Coffee, restaurants, playgrounds.	Go big! Indy has so much potential with waterfront. Downtown has been revitalized since 2012 and it took the dream of a cold weather city hosting the super bowl to do it. What will be our catalyst for the river be and how will we make it big-from Hamilton County to Downtown Indy?	46220	46220

Enjoy nature, Personal/ individual fitness (running, etc)	Clean up and utilize the area close to the river (mow, create/ expand trails, etc.)	It would be cool to have more canoe/ kayak access. I could also envision more residential and retail areas downtown along the river.	Nature trails, playgrounds, cafes, etc.		46202	46202
Kayak, tube, or canoe, Recreational boating (sailing, motoring)	Clean it up	More access to it. Safety along the way.	hiking,		46256	46202
Kayak, tube, or canoe, Birdwatch, Personal/individual fitness (running, etc)	Water quality	More people using it and taking care of it	Benches and access points		46208	46208
Kayak, tube, or canoe, Shopping or dining, Picnicking	Water access	More kayaking and canoeing	Playgrounds and benches		46221	
Kayak, tube, or canoe, Birdwatch, Personal/individual fitness (running, etc)	Meaningful progress on ecological issues will go a long way- but that needs to be coupled with a PR push to change public perception. How can the river better engage with already existing groups and infrastructure- Ezkenazi, Broad Ripple Village, Monon Trail, the Levy Project.	I would like more waterfront residents and villages. More activities- including boating, fishing, and birding.	More activities- including boating, fishing, and birding.	Getting rid of low head dams would improve safety and ecology. Would also open the river up to more watercraft.	46220	46202
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	Water quality	More access, cleaner	Hiking trails		46250	46260
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	The fines for dumping must exceed the charges for legitimate disposal. This is the only way to slow down or stop dumping	Limited reasonable access for canoes/ kayaks and small HP motorized craft; step up fines and prosecution for dumping/pollution; serious prosecution for dumpers/polluters	small boat launches, extended hiking trails, DNR and/or IMPD police patrols	Encourage legislators to improve legislation for prosecution of polluters all along the White River	46260	46260
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Shopping or dining, Recreational boating (sailing, motoring)	WAter access	That the river is recognized as resource for the cities that border it. By giving it value, we can clean it up and improve access to the river. We as a community, want to be able to enjoy the river itself through different water sports, but we would also like to walk alongside, dine alongside etc	Restaurants and cafes along with places to fish and rent kayaks would be nice as well as places to sit and relax.		46220	46240

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Water cleanliness	Important to keep historic bridges and community interest/art installations	Paved walk/bicycle/stroller paths	Make it a highlight for future generations; not an eye-sore or a hazard.	46229	46220
Birdwatch, Enjoy nature	Water Access	Open parkland with buildings close enough for views, but not hogging the water	Benches, paths, areas to be close and access the water.		46168	
Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends	dining, hotels etc	be a area where you would like t visit			46259	46202
Enjoy nature, Personal/ individual fitness (running, etc), Skateboarding! The Cardinal Greenway/ White River Greenways are perfect networks for alternative transportation and unforgetabble memories with your friends and family	I don't personally mind the water quality, I think more programming, history, educational opportunities would be amazing. Highlight the significance of the River and celebrate its existence.	I would love it to be a recreational destination and safe area that encourages social interaction, mental wellbeing, physical fitness, cultural pride, and historic significance.	Other than a potential stormwater drainage issue I think a skatepark or similar destination would be perfect for the River. While I do think there could be appropriate commercial uses, I would hate for it to be a primarily retail destination. Small placemaking interventions at key intervals and interactive wayfinding/data collection could really help create a brand and consistency in design.	I am just now finding out about this project and may not be able to make the remaining public input meetings, but I would love to receive more information. I wish there was a more extensive outreach effort on that level, but I cannot place blame as I am new to the idea of the White River Vision Plan. Really looking forward to what comes out of this! Best of luck.	46205	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, I want to do trip camping, but there aren't enough campgrounds along it.	Add more campsites so families/scout groups can do overnight canoe trips. And more access points.	Cleaner and more natural.	Playgrounds and camp-sites. More trails would be nice too.		46038	46037
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Beautification	Tourist destination in Downtown Indy that put go on or in	All of the above things listed and Restaurants, swimming holes, and kayaks. Think Austin	We have missed out on leveraging our one major natural landscape attraction which many other non- coastal and/or mountainous cities have heavily leveraged to make their cities stand out to its citizens and outsides.	46040	46260
Birdwatch, Enjoy nature	Access		Boardwalk. Restaurants.		46201	46254
Enjoy nature, Personal/ individual fitness (running, etc)	More access and things to do. Once down by river it is muddy and hard to get down to water. Having access points that people can navigate would help	Please let's clean it up so the water is safe and healthy. Also, we need to use it more. Most people don't even know how beautiful it is	Playgrounds, restaurants, camping and kayaking (with easy to tent equipment) and biking and walking paths to access it. From the west side of the river it is very hard to access	It is an amazing asset with so much potential.	46260	46260

Birdwatch, Enjoy nature, Gathering with family or friends	water quality and access	various types of development along the downtown stretches (South of 16th st)	playgrounds, restaurants		46226	46225
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water quality! I'd love to take my kids to enjoy creek stomping, kayaking, etc. and not feel like I'm subjecting all of us to nasty bacteria	Improvement to watershed status, more public awareness of the issues that contribute to contaminants in the water	Well-maintained trails, playgrounds, otherl attractions to engage people with nature.		46208	46260
Enjoy nature, Personal/ individual fitness (running, etc), Group fitness (classes, group sports)	Water quality	A clean river that people can safely use for recreation	Nature reserves with wetlands; a better viewing point to view the merger of Fall Creek and the White River downtown.	I hope the river would not be impounded by the Anderson dam to allow better flow of the waters and not diminish the streams we get to use near it.	46038	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	water quality	Clean enough to safely swim	Area for dogs to play and swim, affordable kayak shuttle from Art Center to Riverside Park	Keep a good portion as wild and natural as possible. WHAT TYPES OF ACTIVITIES DO YOU PARTICIPATE IN ALONG THE RIVER?	IF YOU COULD FIX ONE THING ABOUT THE RIVER TODAY, WHAT WOULD IT BE?	IN 5 TO 10 YEARS, WHAT IS YOUR DREAM FOR THE WHITE RIVER? HOW SHOULD IT GROW AND CHANGE, OR WHAT IS IMPORTANT TO KEEP THE SAME?	WHAT KINDS OF ACTIVITIES OR AMENITIES SHOULD BE AVAILABLE ALONG THE RIVERFRONT?	IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Shopping or dining, Picnicking, Gathering with family or friends	Continued over development and over visioning	more dedicated and remediated natural areas, with a lack of over development	bait shops	Enhanced study and meaningful protection of archeological sites	46260	46260
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends	water quality and more kayak/boat access points	I hope it is more accessible to wider population who live in Indianapolis, but may not have a car or safe transportation to get there. I'd also hope it could be safe to swim in.	all of the above		46221	46250
Kayak, tube, or canoe, Enjoy nature, snowshoeing	more canoe and kayak friendly (portage around dams)		all of the above plus river boat dinning	the cleaner the better. maybe an adoption program similar to highways	46220	46220
	Play spaces. The river doesn't seem to be a priority or that there has been much effort put into it.	Let's have people kayaking and canoeing, walking trails, landscaping, etc. Let's invest in placemaking and draw people to the river!	All of the above. A canoe livery, swimming area, trail, etc., would also be nice.	I appreciate your effort to address this. The river could be a fantastic amenity to the city. It has unused potential right now - your project could be the start of something big.	46947	46204
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Water quality	Improve quality, less dams, more canoe launches			46220	46205
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Fish or hunt	Better access points to get on the river for kayaking	Better access points and parks along the river			46122	46122
Kayak, tube, or canoe, Fish or hunt, Recreational boating (sailing, motoring)	water quality	water quality and river access	restrooms	positive press	46037	46037
	Play spaces and access	I would love to see a more developed vision - right now, there are things close to the River but not necessarily a part of it	All of the above!		46208	46218
Personal/individual fitness (running, etc)	Cleaning up the river	World class bridges downtown, think St. Charles bridge in Prague.	Restaurants, coffee shops, bars, shops.		46220	4620
Personal/individual fitness (running, etc), Gathering with family or friends	Access, especially White River State Park. Remove the concrete on the west side.	Cleanliness is crucial. Need to improve the experience in White River State Park and IUPUI.	Playgrounds, Trails, interactive sculpture	Get rid of the cement wall downtown.	46032	46032
Enjoy nature		More people using it so it feels safer	All of the above		46077	46222

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	Perception	Improve perception	All of above	Love the river.	46060	46034
Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	More play access	More access and more activities for kids/ teens. Low cost or free fishing classes, boating classes, nature classes. Ways to introduce nature to city kids. Tech-free, old fashioned day of fishing and grilling out or camping skills, and more plant and animal identification. Keep Holliday Park mostly the way it is, except maybe update trails and boardwalks a little.	*Mentioned above: low cost nature classes for city kids. Work with schools to earn credits for river volunteer work/ classes.	More water related renting options, that are visible and accessible and affordable: boats, kayaks, lessons, paddleboards, classes, nature clubs (especially for teens where they learn skills AND volunteer.	46220	46220
Enjoy nature	clean up the water quality	I think if the water was cleaner I'd be more inclined to be in or on it	Restaurants, coffee would be good.		46260	46260
Birdwatch, Enjoy nature, Shopping or dining	Ability to see it. More pull-offs with picnic areas. More business having to do with the river along the river. The city has IndyBlue cars, bikes and now scooters. We need a good, active, responsible and safe canoe livery that can somehow bring a since of stewardship to the city.	Leaving as many trees and natural shoreline as possible. Perhaps accessing areas on alternate sides of the river to accomplish this.	Multi-use trails with coffee shops and picnic areas. Fishing access and programs (bait shops, DNR-type education).		46202	46219
Enjoy nature, Personal/ individual fitness (running, etc)	Play spaces, access, banks are too steep to access water. Walking trails along the river bank are needed. Opportunities for Riverside development of bars,cafes and restaurants is needed.	Nature takes priority over building developemnt	Walking and running trails. Cafes		46033	46033
Enjoy nature, Pray, meditate	water quality	clean water, wildlife, more access points to observation decks.	Places to sit that don't look in need of repair	Please don't develop too much! Maintain the nature and naturalness of the area	46220	
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Recreational boating (sailing, motoring), jet skiing	water quality. otherwise leave it alone!	That I can still ride my jet ski without someone putting idle zones around Broad ripple park	Don't care.	I'm afraid someone with a "great" idea is going to change the White River in favor of people who don't use it currently at the expense of those of us who have been happily using it for years. It's not broken. Clean it up. Leave it alone PLEASE	46140	46140
	Water quality and access, entertainment/ restaurants in the water	I would love to see our city utilize the river and have more recreational activities on the water. Nothing should be kept the same. The river is a natural asset that is not being utilized	Rowing, restaurants, walking paths, and parks	The river should be utilized as an asset not an eyesore	46225	46225

Birdwatch, Enjoy nature	cleaner water, edible fishing.	don't screw up nature.	Leave River Glen alone.	This "plan" has the stink of Agenda 21, do not do to the property owners that was done to the Indiana Railroad-	46038	
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	I would like to see much more public interest in keeping the river clean while also participating in more of its many and varied uses.	More accessibility which would include places to dine along the river front, more areas to enjoy the scenery, more classes offered by the various White River organizations to inform our community about the benefits of the river, more emphasis by all the organizations as to its importance to the region.	I'm pleased to see that there is now more interest by a number of groups in highlighting the health and well-being of the river and how that relates to the region through which it travels. I would, however, like to see the various organizations and groups come together - perhaps even join into a few larger groups - as they work toward common goals.	46260	N/A
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Clean up / provide better park access along the area by the downtown hospitals. (VA).	Needs to be cleaned up would like to see, parking locations with ramp access near downtown, and a way to navigate the dams safely to allow river navigation for small boats / canoes. (maybe safe ladders / ramps.) the 1B, spent on sewer relief hopefully helps.	float trips with a return to where they start. (If i start north indy, can i float to downtown and get back to my car?)	It would be nice to see safe fishing, and people on the river, doing things safely.	46222	46140

WHAT TYPES OF ACTIVITIES DO YOU PARTICIPATE IN ALONG THE RIVER?	IF YOU COULD FIX ONE THING ABOUT THE RIVER TODAY, WHAT WOULD IT BE?	IN 5 TO 10 YEARS, WHAT IS YOUR DREAM FOR THE WHITE RIVER? HOW SHOULD IT GROW AND CHANGE, OR WHAT IS IMPORTANT TO KEEP THE SAME?	WHAT KINDS OF ACTIVITIES OR AMENITIES SHOULD BE AVAILABLE ALONG THE RIVERFRONT?	IS THERE ANYTHING ELSE YOU WOULD LIKE TO SHARE ABOUT THE WHITE RIVER OR YOUR ASPIRATIONS FOR ITS FUTURE?	WHAT IS YOUR HOME ZIP CODE?	WHAT IS YOUR WORK/ SCHOOL ZIP CODE?
Kayak, tube, or canoe, Enjoy nature		Increase the length of the noblesville riverwalk	Playgrounds and trails		46060	
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Picnicking, Gathering with family or friends	Water quality, smell, trash removal, fish population	Restaurants on the river, shops on the river. More trees and landscaping	Food, drinks, fishing stores, coffee house, light entertainment		46239	46239
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	I would improve the riverbank habitat and create more floodplain.	I think the undeveloped areas along the river should stay that way and the previously developed areas can be redeveloped into new uses. However, sedimentation is an important problem so for every dollar spent on development, a dollar should be spent on river restoration. Otherwise, the river will be adversely affected.	Hiking trails, fishing spots, and canoe/ kayak access.	I would like to see the 16th Street low head dam removed in order to connect more in-stream habitat for aquatic organisms. Riparian zones need to be restored throughout the watershed. Sedimentation needs to be addressed in several places.	46240	46240
Enjoy nature, Personal/ individual fitness (running, etc)	Places to play should be more.	Perfectly clean considering the Deep Rock Tunnel Project and sewer clean up!	More trails and coffee shops/ businesses.		46220	46220
Personal/individual fitness (running, etc), Cycling.	Water access, lack of recreational outlets such as kayak rentals.	Improved water quality. Increased recreational possibilities, maybe a river promenade.	Recreational rentals, environmentally friendly development of restuarnts. Resting areas.Cycling access or trails nearby.	Would like it to be an asset to the community just like the monon. But dont over develop and risking the environment.	46220	46208
Kayak, tube, or canoe, Enjoy nature, Walk dog and let him swim	Better portages	Clean, and better access to sites along river.	Places to eat, trails along banks.	Better portages for canoes.	46220	46220
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking	Water quality and access locations		Playgrounds, benches, walking/running trails		46250	46240
Enjoy nature	water quality	clean water, easy access, trails and bike paths, security	relaxation and reflection, walking trails and benches, recreational access	no	46143	46204
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water access	More access to the water for non-boating activities — waking, observing birds, maybe swimming or wading	Benches and landings / flat areas to be next to river	Would like to kayak and canoe so maybe have those available for use as short- term rentals like the Pacers yellow bikes downtown	46220	46208

Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Definitely water quality is important. Access. Natural areas.	Keep much of it natural. Have access so people can learn to appreciate what a river really should be.	All of the above but in limited areas.	Rivers with wild lowland areas provide safety in times of flooding.	46260	
Hiking or bike path	Beautify	Don't over commercialize. Beautify, carefully add activities that complement the river.	Canoeing, kayaking, controlled retail development (restaurants/coffee shop/ bathrooms with tasteful, discreet, limited signage, run by an organization like Conner Prairie or the Indiana Historical Society or Museums.	Keep it beautiful, well-managed.	46033	46033
Kayak, tube, or canoe, Enjoy nature	a) remove dams, or at minimum provide safe portages around dams b)provide safe public access sites for canoeing/kayaking	having a local canoeing/kayaking resource is great for local residents (and also for visitors)	first thing is to provide access sites so people can use the river - other development will follow.		46322	
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Gathering with family or friends	Water quality	Not to be over developed. Maintain and respect primitive aspects of the river	All of the above	Save what we have for our children and for the current community	46208	
Kayak, tube, or canoe, Enjoy nature	Water quality	Retail (restaurants, etc) should be limited to urban areas. The other areas should remain a natural setting with trails and access points along the banks.	Parks with hiking and biking trails. More canoe livery options.		46033	
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), plein air painting	water access (both views and access)	I would see homes and businesses lining the clean White River while still retaining some green space.	Community center, businesses, restaurants, juice bars	The river is so underutilized and it is beautiful (esp around sundown).	46202

I live along or within a half mile of the river.	Bicycle, Car	Feels unsafe at night, Limited places to see the river, The river is dirty	Broad Ripple Park, Indianapolis Canal/Cultural Trail, Riverside Regional Park	Riverside Regional Park. My family and I grew up a few blocks from the park and never ventured out to river. When I think back and ask myself why, I remember hearing stories about it being dirty. It also is very secluded and dark which bring about safety concerns. Also, there's a ramp for boats. I don't have a boat. How many people in that neighborhood have a boat? If any, very few. There should be something there for people in the neighborhood who want to use that space and see the river. Since there is a boat ramp, what about offering boat rentals, kayaks, jet skis, something so that this space is not only limited to those who can afford to buy boats. If the people in the community aren't able to use it, how does this space serve its purpose?

Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Water Quality, Play spaces, Water Access. If this is what your going to take pride in, it needs to look like it with the signage and the way it is advertised.	I would like it to be an attraction for both tourist and residents. It should be something everyone looks forward to in the summer whether its because of the water activities, restaurants, or just the beauty of nature. This would be a communal space where people can get together and learn and have fun. Where I live, Coopers Park and Mypath	Less trash in the water, more parks/fishing areas, and more boat ramps	For it to be cleaner and more attractive to out of state visitors.	Playgrounds, walking/running trails, shops and stores	The white river has many things that can be done to make it better. Its a great place to interact with friends/family while watching and viewing different fish and wildlife, but would be better if the water was cleaner.	47460	47460
Birdwatch, Personal/individual fitness (running, etc)	Cleanliness. Ability to float the whole length without hitting trees or drop offs.	Paddle to work day that actually can be accomplished	i like the suggestions above. Connect with the trail system with access to bikes and bike parking	make it a destination that people want to go to, make it clean without invasive species, make it easy to navigate without mud. provide maps to show what you can connect to.	46236	46236
Kayak, tube, or canoe, Fish or hunt	More fishing access	More fishing opportunities, less trash in and along the river, more public spaces that allow fishing	All types of public places		46240	46220
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Water quality and access.	To be able to fish or kayak and not worry about what contaminates are in the water.	Public access ,boat ramps more open spaces along the river.		46227	46218
Birdwatch, Enjoy nature, Shopping or dining, Gathering with family or friends	Walking trails in park like setting	Go to destination fir nature & social activities	Mostly nature activities with small areas of cafes/coffee houses		46228	
Kayak, tube, or canoe	Water quality	Cleaner	Coffee shops/restaurants		317	317

Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Take out the unsafe dams	The dams are removed	Man made white water features would bring people from all over to use the river.	Remove the dams or build passage around then without having to portage around the dams	46135	
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	l would like see it used by more people for nature based activities.	Recreation class, pathways, nature preserves.		46220	46202
 Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends, Museums	Water quality come top of mind for me!	It is my hope that we are able to offer the river as a destination for people of all ages and abilities. A place to get away from the bustle of life and relax in the peacefulness that nature provides. Perhaps create a balance of development and natural restoration.	Eco-friendly playscapes and places to lounge		46202	46204

Enjoy nature	Water quality	More community notification of space	Commerce, buy coffee, see/buy art, local type shop	So they are working on water quality with storm run off that will calim those concerns, so my primary hope would be to notify and stream line communication within the districts served if for example the southwest had identified signs for access and what's was available the somewhat low income people in some of these areas may share more with there kids and others creating more visitors and awareness	46221	46221
Enjoy nature, Personal/ individual fitness (running, etc)	Water Quality / Access	More trails and access for Kayaking	More trails, access for boating	I'm excited about these plans and hopeful for future enjoyment	46060	46060
Personal/individual fitness (running, etc), Gathering with family or friends	Improve water quality, riverbank cleanliness, reduce CSO flow into the river (1 know about DigIndy, however other natural stormwater management methods should be implemented), more places to access/ view the water (most of the trail has dense vegetation blocking views, I know the vegetation is important but it would be great to have more access).	Convert some golf courses to public parks (not super feasible but we can dream), and improved water quality.	Lookout points along the trial, riverfront parks, additional retail and programming in existing parks.	Cincinnati's revitalization of the Ohio Riverfront is an amazing asset to their downtown. It would be amazing if Indianapolis could at least work towards something close.	46208	46204
Enjoy nature, Personal/ individual fitness (running, etc), Group fitness (classes, group sports)	Trail quality and lack of space to enjoy the river/ poor quality and maintenance of open spaces available	The River is an underutilized asset to Indianapolis. It should be a vibrant gathering spot along most of the river in the urban arena. A mix of parks, nature preservation, and shops/restaurants should be established to attract citizen use and tourism to the community. Access is extremely limited- even for viewing the river in most parts of the city. Parks do not showcase this asset and most areas are polluted or dirty that surround the river. Bike trails should connect the waterway to other areas of the city to create more walk able connections between neighborhoods and bring people together from diverse areas.	Bike trails, open green spaces, picnic tables, cafes, kayak/canoe rentals, rafting	Thank you so much for doing this! I think the River brings so much potential for the city in terms of economic opportunity and more importantly, nature and land preservation that all community members can enjoy. Please do not over-commercialize the area and keep in mind the value that green spaces and preserved areas bring to the community. Indy lacks great parks and dedicated urban nature areas- this could solve many of the issues that detract people from living or visiting here.	46205	46202
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Canoe only	Advertise that it's been a long time since the Anderson fish kill. Advertised that the Federal and Indiana EPA requires treatment to one part per trillion.	I'd like to know what your project includes. Recently saw a bald eagle. Would like to see more river otters, turtles and beaver. Those animals and more are found on the Indiana rivers with less human development along their banks. Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Water quality	I'd like to see the natural environment preserved so that there was a healthy ecosystem and clean water that supports wildlife. Dog free zones are an important part of protecting both water quality and wildlife.	Some areas should definitely be left wild, like the parts of the river that run through the various natural parks. I live along or within a half mile of the river., I visit the river.	Walk/Run	There are not enough inter- HOA walk paths. I live on the block between River Rd/Hazel Dell & Main/146th. There are a lot of HOAs in this major block but no interconnections. You have to walk way up and around the main roads of each snaking back and forth to get to the river path. Can the county or this group support more interconnections/ped bridges over the creeks. Most of these HOAs have various paths, but none are connected.	Conner Prairie, Hazel Landing Park, Holliday Park, Potter's Bridge Park, River Heritage Park, River Road Park, Strawtown Koteewi Park	Pretty much any location where I cannot see buildings and there are old growth trees like talk standing River Birch or Sycamores	The end of the path along River rd near the elementary school and Haverstick Association down to River Rd Park

Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering wi family or friends	There should be a walking path into the back of Conner Prairie. There are a large amount of dense homes going in near 146th and River rd and that whole block is easily walkable to CP if you didnt have to go all the way up and back down Allisonville rd in a car. Would prefer to walk if there was a short cut.	I would add some limited commerce like hotel and restaurant, but avoid residential construction that detracts from the views, and focus on building it mainly as curated green space and parks. This adds significant value to surrounding homes thus increasing tax base.	playgrounds, places to buy coffee, benches, recreation classes, yes	A long path on both banks N/S would be great similar to the Monon. Although the study area is focused primarily in Hamilton and Marion Counties, I would encourage the design team to explore the cultural, recreational, environmental, and economical connections the White River has to communities upstream and downstream of the study area. For example, explore how local efforts in Anderson and Muncie to create the Mounds Greenway can be linked to Hamilton County's trail network. Biking	Water access and more businesses/ houses/restaurant options along the river	Have a community around white river. Make it a more popular area, especially downtown for activities other than biking/running	Coffee, restaurants		46205	46202
	More Development i.e. restaurants, bars, food trucks, seating areas, etc.	I see more connectivity to downtown Indy. I see it being activated with commercial attractions.	Coffee Shoppes, kayaking, night life (bars), contemporary art, a lot of lights, benches, etc.	I really hope that we can activate our river! I see a remarkable growth opportunity to Indianapolis if we can sincerely clean up (and convince the public that it is indeed CLEAN) the river and bring critical mass all along the river from Downtown to Broad Ripple.	46202	46204
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Walking my dog	Aggressively collect debris	Whatever happens along the river banks, preservation of natural habitat and vegetation should be the top priority. Limit access to points along the river and the parking at those access points.	Nothing should be built directly along the riverfront.		46038	46032
Kayak, tube, or canoe, Enjoy nature, Picnicking, Gathering with family or friends	Clearer access options for self-launching Kayak/Canoes	It needs to remain a place off nature, where people can interact in a non-destructive way. More clean access points with proper refuse collection and educational materials about wildlife would be ideal.	I believe attractions should be in proximity to the river, yet separated enough that the foot-traffic from these establishments does not interfere with natural habitats.	I'd love to know more about some of the historical "ruins" in the Noblesville area. There is a concrete structure north of town, yet south of the dam in Straw Town. I have not been able to find out what that is. Also, the old metal train(?) bridge south of Noblesville seems like it could be utilized in some fashion.	46062	46060

Personal/individual fitness (running, etc)	easier access for kayaking		pulloffs for kayaks with food/drink		46126	46222
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Picnickin	Clean it up	Pedestrian spaces concurrent to river in broad ripple and downtown Indy. But also keep some spots wild for kayaking, fishing and exploring.	Coffee and food places with outdoor seating along river. Benches for picnics.		46205	
	there is nothing to do there	make it a fun place to go but don't kill the fish	things that you can do while canoeing ex: small rock wall, rope swing, picnic tables	I think it would be best if there are free things along the river	46038	46038
Personal/individual fitness (running, etc)					46203	
Kayak, tube, or canoe, Enjoy nature, Shopping or dining, Gathering with family or friends	I wish it was cleaner, followed closely by I wish there were more access points.	1 - keep pollutants out of the water, 2 - make the river more family-friendly	1 - canoe/kayak rental, 2 - walking/biking trails, 3 - coffeeshops/restaurants with outdoor seating,	I recommending keeping this plan simple and easy to understand as possible - 1) let's clean the river and 2) make it easier to use for recreational or family- friendly purposes.	46142	46222
Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Water access and "landing spots" while walking.	Well thought out and integrated neighborhood access points along with stretch's that are left to natural habitat in less populated areas. More community gathering and destination areas as you get closer to higher density areas.	All of the above and maybe small info boards with history, geographical and "factoid" type of info.		46220	46220
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	More public access	Cleaner/ Make it easier to access	family shelters		46034	46239
Enjoy nature, Shopping or dining, Gathering with family or friends	More parking for easier access, public restrooms, and easy link from downtown canal to the rest of the river.	Do not gentrify or remove the tent cities on the south end of the river. Those are homes for the homeless. Protect them.	Coffee, occasional bar, a park, swings for adults, walking bridge across it [similar to one in Louisville]	public Art, murals, sculptures - initiatives to get community involved in cleaning or contributing art.	46202	46202
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gatherin with family or friends		Keep it the same	Nothing but Nature	I don't want restaurants and shops along the river. That is more opportunity for pollution and trash going into the river.	46062	46033
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Gathering with family or friends	Trees that have fallen into the river need removed	The quietness of kayaking down the river is peaceful. Hope it stays that way			46030	46060

Enjoy nature, Gathering with family or friends, Hiking / exploring	Open up to the river instead of turning our back on it.	Integrate with development, trails, interaction, etc.	Anything and everything	n/a	46217	46203
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water access.	Water Taxi, with places to visit along the river. Common docs at good places to eat & socialize. Boat or kayak from one location to the next.	"Whatever brings people. The more we use the river the better it will become. A nice boat doc in Hamilton county would bring people up the river from Indy and etc If you can doc and walk into a brewery or nice restaurant. Or even a social nature area with corn hole and outdoor games. Think of an outdoor Dave & Busters type of feel. Tether Ball, large Jenga, washers, and those outdoor areas. "	Thank you for doing this - I look forward to how it turns out.	46034	46061
Enjoy nature, Personal/ individual fitness (running, etc)	Water access - more docks	"Make the river a source of travel. Would be cool to meet my friends at a doc in Noblesville and boat to broadripple. Or invite my Indy friends to boat up to Noblesville so we could hang out. "	Adult-like nature areas set up for social time along the river would be amazing! Large tables, lots of seating. Outdoor cantina. Outdoor games. But really just being able to dock & go to forest park, syds or Barley Island would be cool too.	The more use hopefully it will get cleaner.	46061	46061
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)					46060	46038

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends, Hiking or biking	"Keep the natural areas free of invasive plants which have scientifically have been proven to adversly affect the river and the wildlife that live in the river. No motor boats allowed. They leak oil and gas, are noisy and degrade the shoreline. This is our drinking water, I'd like to keep it clean not only for myself and my family but for all of our current and future generations.	It is important to keep the natural areas and add more! People love this and they get excited when they see the river Wildlife!!	Nature venues if any. Businesses tend bring trash and dirty runoff into the river, cut down native plants eliminating the wildlife dependent on them and peace and joy the the nature brings to us all. Businesses also require and use more of the already diminishing water supply in our area.	Keeping it clean. It's our drinking water and our canoe, tubing and kyaking water. Keep it clean and flowing for wildlife experiences for our current and future generations.	46074	46033

Birdwatch, Enjoy nature	Water Quality and boat-ability	Would like to be able to boat from Broad Ripple to White River State Park	Boat rides ,fishing	The dams pose a hazard to boating. Can they be eliminated?	46260	46225
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	water quality	My dream would be to have the river used for recreation and have people aware of the recreation available. Also to educate people about the environmental fragility of this riparian area. Get rid of dams and levies. The number of trees that have been destroyed by the levies is horrible. Flood control can be done in a much more environmentally friendly way. It is time for organizations surrounding the river to speak out and work seriously to save what we have left.	Boat launch sites, fishing areas (hopefully some day some catch and release waters and fly water), areas for nature study (like the Ecolab at Marion College). I am not interested in having places to buy coffee and snacks.	I think the time has come to get serious about the environmental implications of what we do to the river, what the river means to animals, birds and fish. It is time to get SERIOUS about educating children about the river both for recreation and for the environment.	46208	46204
Kayak, tube, or canoe, Enjoy nature	access	clean up parts of the river in Hamilton County, increase access via landings for kayaks, canoes, etc. that offer refreshments	refreshments	Don't over commercialize it.	46062	46222

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality	It is a valuable and nearly unknown asset. First, the water quality must be elevated to be safe for swimming. The public needs to know of this, because many see it as a toilet. Then I'd like to see float streams, like in Basel, Switzerland, kayak runs with possible rapids creation; in the film, "The Judge", which is SUPPOSED to take place in Indiana (HAH!), the principals often meet in a restaurant that sits by a very scenic waterfall. Something like that could be created yet not restrict boat traffic.	All of the above. Places like the shops at Clearwater should reorient themselves to look at the beautiful river out their back doors.	"I just have a funny but sad anecdote. It was a blustery day in early November. I had just visited a bookstore with my SO, He asked what I wanted to do next and I replied I wanted to go somewhere with my books to get food and drink and look at water. We happened into the now defunct Applebee's in Broad Ripple and were shown to a booth in the back of the establishment with a huge window onto the river. Perfect. The next booth was occupied by a group of women. A late comer arrived and when she saw the expanse of water through the window, she gasped, and said ""What lake is that?"""	46240	46240

People in this part of the country don't know how to be good stewards of natural resources and doesn't view White River as a critical natural resource. That we condemn properties vulnerable to flooding and restore the riparian environment and increase the riparian buffer all along the river by reforesting and encouraging the growth of native species to encourage wildlife habitat and improve nature experiences for human enjoyment. Additionally, restoring the riparian buffer and the floodplain will help mitigate increasing pressure on low lying homes and other properties due to over development north of Indianapolis flooding as well as improve water quality.	Many of these amenities are already available. Already developed land located out of the floodplain could be redeveloped to face and take advantage of the views and access for commercial endeavors and "hardscape" parks and recreation areas. I do not believe we need to add additional commercial development. The Vision area, especially to the north is rife with commercialization. This plan should encourage less development and more places of nature.	The White River is our areas' only pleasant natural amenity in central Indiana. It has been largely ignored, had tons of pollutants and road run off dumped into it for multiple decades. While it is a community asset, I'd like to see it made cleaner, less commercialized, more naturalized and a healthy ecosystem restored to it rather than it, through this plan, being used as a catalyst to propel development along MY White River.	46240	462

Enjoy nature, Gathering with family or friends	Safe, clear path/trail by the river downtown with easy access	The White River should be a feature of downtown. It's a unique area to downtown that's being wasted right now. I'd love to see the area by the old GM stamping plant and the depressing factory get reinvented for the city and people of Indianapolis. It's such a major eyesore and waste of natural resources.	Shopping, nature parks, dining, playgrounds, trails	More than anything else, I'd like the downtown area to be clean and safe. The downtown area would have the biggest benefit from improving the White River.	46202	46202

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	Leave it as it is.	It's important to have nature near you. To be able to get back to the basics and have a place to relax when you need to get away from the concrete.	Parks, fishing, nothing urban.	Please leave nature alone. If we keep trying to build on what Mother Nature gives us we will have nothing left. Plus why should we have to go further for nature when it's already right here.	46220	46060
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water quality	I guess what I do not want to see is a lot of commercialization. An occasional destination, quaint restaurant would be niceaccessible by boaters. An occasional shopping area like you see up in the Dunes area (ex Beverly Shores) Fort Ouiatenon on the Wabash River is a good example of a public historical/ educational park with a canoe/kayak ramp. Please do not destroy the beauty and power of the river.	"Benches Occasional commercialization like a coffee shop, possibly a beachbut with a healthy balancenot being too invasive "	I imagine many of the people who own property on the river do so because they enjoy nature and possible solitude? Keep that in mind	46219	46107

Birdwatch, Enjoy nature, Picnicking	more natural with out concrete and use mulch	wild flowers and with bee hives to share the importance	access cards for residents in the area and a 911 communication that allows for emergencies	keep it safe and be able to access it at night to watch the stars for star gazing.	46033	46060
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends, Recreational boating (sailing, motoring)	Cleanliness of the water	I wish it more connected to our city. The plan for our city does not give it enough weight. We need to push people to it through circulation and vistas. The natural character needs to stay the same	Boating-rentals, hiking-classes	It is the single most underutilized asset of our city	46208	46208
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Water quality - stop the sewage overflow running into it	Clean up the river and preserve the natural beauty	Benches and picnic areas		46060	46060
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Water quality	It be a clean, wildlife sanctuary	Hiking, biking trails, parks, water access. NO COMMERCIAL/INDUSTRIAL	The river is an invaluable resource that should be preserved for future generations	46060	46268

Farming	The islands that have formed around fallen trees need to be dredged to allow better flow of the water, especially the bridge on SR 37 at Strawtown. That will benefit the farming community and will make a canoe trip down the River much safer.	Better flow after fallen trees and islands building on the supports of bridges have been removed and less flooding over the bottom lands.	Nature	White River needs to be left as near as possible as it was when the Indians lived along its banks. White River has never been a navigable stream for commercial traffic. Indians used it to carry themselves and their goods downstream. Up stream was a different situation where the Indian was likely on the bank pulling his canoe back upstream. Today a trip down stream can be a relaxing, enjoyable trip through nature as it was. Keep the River clean and enjoy watching the wildlife along the stream. No commercialism.	46060	46060

Farming	I think it needs to be left alone.	It all needs to stay the same. I do not understand why it's important to bring more people to this area, where farmers are trying to grow their crops to help feed the world. I am sure that you have heard the saying, "if you ate today, thank a farmer". With all of the farm ground that keeps getting developed in this county, not sure why it is needed to keep trying to develop more rural areas. Let us do our job and feed the world. If you want to help the white river, dredge it. Man made obstacles have created un-natural islands. A walking path would not enhance its beauty, it would change it and make it un-natural.	Farming the existing farm ground. If anything, use the land that is already NOT being farmed at Kotewii and have a playground for kids so when families stop from canoeing or kayaking, there is an activity for them to do and run around.		46060	46060

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Group fitness (classes, group sports)	Water quality	I would love to see more mountain biking north of Town Run Trail park. I'd also like to see a bike park to engage the downtown community along the river.	Mountain bike trails, mountain bike park, nature trails, coffee shops, benches and community outdoor classes.	Better water quality, sewer line improvements and more accessibility for kayakers, cyclist and hikers.	46220	46268
 Birdwatch, Enjoy nature, MTB	Easier access	More MTB trails			46041	46041
Mountain biking and road biking.	More opportunities to recreate, including all types of cycling, hiking and running.	The dream is a connected trail system that becomes Indy's Urban Wilderness that connects greenways and natural surface trails with neighborhood access points. I would love to show more people that the River is a great place to recreate on and near!	47448	47448
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Picnicking, Biking is the most common. We love the trails that are along the river at town run and River Road.	I know it is a work in progress, but there is a stigma that the river is dirty - and it is at times when it floods, but I wish the general public understood that it is safe.	I would love to see the river utilized more for natural space and recreation. It would also be neat if there were a way to have it be interactive with play areas and the like. Something like Slide Rock in Sedona or the like. It would be amazing to be able to use the river as a viable way to experience Hamilton County down into Indy. It seems like a tremendous resource that is underutilized.	Not sure - more natural surface trails would always make me happy.	"I would really like parks like Town Run, Southwest Way and the others to offer extended hours and night riding. It is tough in winter months as the window of light is so short. It has worked for the Monon Also see above. More use, more natural surface trails, etc."	46038	46033
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends, Recreational boating (sailing, motoring), Cycling trails for exercise, transportation, and social get-togethers	Accessibility and Transportation	Paths along the river should grow and extend to connect neighborhoods, the river itself should be considered for more transportation uses (docks in cultural areas, kayak and canoe rentals, maybe even water taxi type options.	parks, playgrounds, paths to connect such areas to areas with businesses; i feel that businesses directly on the river should be limited to preserve our natural spaces.	We have an incredible resource with the White River and can balance the uses between natural preservation and education as well as business and housing. But we should not limit the river to one purpose or allow businesses (retail, condos, expensive apartments, etc.) to monopolize these areas that should be accessible to ALL demographics. Preserving natural spaces and returning areas to a natural state is super important for the health and vitality of the river system in our city and will only improve the productivity and value of any commercial development along its banks.	46220	46254
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking, Gathering with family or friends, Walk my dogs	Way to bike SAFELY from my home to Southwrstway park	Clean water, safe lighted trails on the Southside to bike to/from and through southwesteay park,	Recreation areas, playgrounds, places to rest, bike racks, dog watering stations	I would love to see Southwesteay Park become an outdoors activity destination. There's already baseball, soccor and golf. Now let's add paved trails for all the walkers, runners, dog lovers and parents to go for a leisurely stroll or run. A safe environment in an already scenic area would be awesome.	46217	46217
cycling	public access	more trails along river	public areas and restaurants		46236	46074
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Group fitness (classes, group sports), Fish or hunt	Water quality	Clean it up, add more trails and parks	More mountain bike and hiking trails.	lt'd be a great resource if it was clean and inviting.	46220	46204

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Shopping or dining, Gathering with family or friends	Water quality (and quantity)	It would be cleaner, with a wider & healthier riparian zone (more trees, native under story)	Boat launch areas, bike rental & bike trails, bike racks, picnic areas	The river is impacted by activities north of this area so we should work on a watershed scale to impact greatly. Need policy to protect the river!	46203	46203
 Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Water quality as well as remove excess debris to create a safer environment	Develop educational programs for all ages. Bring people backto learn about their community & beauty of the community.	Educational hidden gems. Show the hidden beauty. Provide benches so people can enjoy the outside.	It is essential to continue to connect residents to the vision plans of WR.	46222	46222
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)		Keep the riparian buffer			46069	46069
Enjoy nature	areas to visit along the river	It should be a community asset. Something that allows people to kayak, sit along, or even swim in, without concerns of water quality.	Places to sit, playgrounds, small shops, recreational areas	I want the river to be part of the city instead of an afterthought. More than something you just drive over to get to the West Side. I want an iconic bridge over it, a place where people can gather	46219	
Personal/individual fitness (running, etc)		Additional to events to get more folks outside to the river and surrounding parks	access to Town Run and Southwest Way park		47112	47112
Kayak, tube, or canoe, Mountain Biking	Clean up river and banks	More recreational use downtown Indy	Canoe/Kayak rentals in Indy	More natural surface trails for biking.	46151	46220
 Kayak, tube, or canoe, Enjoy nature, biking	more access	easy to paddle from north to south and more bike trails	Bike trails		46205	46201
Enjoy nature, Personal/ individual fitness (running, etc)	Be the highlight of the City. Any city that is "on the water" has a totally different vibe and appeal to anyone living and visiting.	More available than just walking down it.	All of the things you listed.	I think awareness of what is currently available should be presented to the general public more.	46205	46204

Kayak, tube, or canoe, Personal/individual fitness (running, etc), Biking	Clean, safe water access	Multi-use, multi-access with greenways connections across the city, county	"Sure, food and beverage vendors; outfitter / equipment rentals (appropriate locations); places for outdoor classes, access points for non-motorized water craft, and biking paths - off-trail for moutain-style biking similar to Town Run; but also flat, paved paths for connections throughout the city. A city rapids run would be pretty cool too."	It's great for the community - aesthetics, health, engagement; but for visitors and city promotion as well.	46216	46216
Enjoy nature, Personal/ individual fitness (running, etc), Fish or hunt	More amenities like Austin RD River walk area	See above but additionally needs cleaner environment too	Eateries, hotels, backlash etc		46202	46202
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Picnicking, Recreational boating (sailing, motoring)	Water access	I enjoy the relative quiet time I spend on and along the river, I hope it is not over developed.	Not much, it is nice & quiet, nice seeing the deer & blue herons along the shore, seeing fish jump on the waters surface.	Promote more clean up outings to collect debris from the river	46033	46033
Kayak, tube, or canoe, Enjoy nature	Water quality	Offer more recreational and tourism on river	Kayaking restaurant playground art places to gather events and sports		46256	46221
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends, Reading, sunsets	Safety/crime	Build so people come. This helps keep crime at bay by populating the area with restaurants, nature, residences, offices, activities,	Picnic areas, coffee shops, restaurants, benches, activities: kayak, classes, yoga. Gardens, reading areas, fire pits, places to buy wine/cheese for sunsets	It's full of potential and opportunity. Very excited to see it progress into the future.	46204	46204
Personal/individual fitness (running, etc)	water quality, more access along the river between neighborhoods	I would like to be able to run or ride bike (trails) from Broad Ripple North to Conner Prairie, etc, and South to Downtown	bike trails		46220	46240
Enjoy nature, Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	The silt filtering into Sandy Point due to erosion between the "big water" of Sandy Point and where the river bends going down stream.	Destruction of milfoil, silt issues at Sandy Point, cleanliness of river. We should keep the nature as upmost importance. We have eagles that fly, lots of other anitmals. Too much building will not help the river.	Would love to see a place where boats could dock on the river in Broad Ripple area.	Those of us who have chosen to live on or have access to the river from our homes may soon not be able to get to the river due to silt and milfoil. Would love to see help in that area.	46240	
	water quality	easy access	benches		46034	46060
Enjoy nature, Personal/ individual fitness (running, etc), Mountain Biking	Water quality	Better access and view in Broad Ripple Village, maintain Marott and Holliday and other parks and green spaces, highlight and improve riverfront downtown			46205	46204

To improve and then protect and maintain the biodiversity of the river corridor.	Passive, low-impact recreation opportunities without commercialization.	A part of the White River Plan should be the creation of a non-profit to work with area land owners, public entities and the public at large on the development of environmental best practices to use in the watershed. This organization could, in appropriate cases, acquire properties along the White River corridor or its riparian tributaries, the focus of which would be to implement and demonstrate these best practices and provide passive recreational opportunities. As the greatest threat to the environmental integrity of the corridor and its floodplain is continued development, such a non profit should be funded with impact fees from all development that occurs within the watershed.	46034	46034

If we learned anything at all from the kill in the early 2000's it is that the environment has to be the number 1 priority regardless of what kind of development is taking place.	I float the river in a kayak 25-30 times per year throughout hamilton county.

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc.), Fish or hunt, Gathering with family or friends	I would want to ensure we have strategies on how to educate people not to dump trash in the river, especially if there will be more development taking place.	The White River is becoming an amazing fishery. I would love to see more guided fishing in the area, so that people from all over have a chance to experience it. Perhaps a grant program for guides? Specifically non motorized guide boats like kayaks and canoes because they are environmentally friendly. It would also be great to see a limit on harvesting smallmouth bass similar to what Sugar Creek has.	Improved kayak and canoe access. The "stair step" accesses at places like Koteewi Park, Potters Bridge, and River Rd Park are extremely difficult to manage with a kayak or canoe.	I would like to see Town Run Trail park at 96th St improved so that there is viable river access. I would also like to see more access points between that area and Broad Ripple Park.	46034	46260
Enjoy nature	Water quality	Cleaner water; More activities and greater opportunities to utilize the river	Kayaking		46260	46260
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Fish or hunt, Shopping or dining, Picnicking, Gathering with family or friends	Water quality	I'd love to see more people enjoying the river. I'd like to see it more accessible for boating and swimming with less pollution issues post-rain events.	All of the above, including spaces for nature.	I'm hoping the more people can be a part of or participate in activities that include the river, the more people will get outside and care about the nature around us, including the health of the river.	46220	46202
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Shopping or dining	Access. Cleaner	More travel on the river. More kayak accessibility.	Yes		46074	46074
Fish or hunt	Kid friendly access and play areas on or as near the river as possible.	See St Joseph river in Mishawaka.	Playgrounds parks ball diamonds recreational rentals paths		46038	46202
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Picnicking, Gathering with family or friends	Clean it and allow people to use it	Lots of interaction with the community			46220	46220
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Better water quality and improve appearance	It should he inviting with easier pedestrian access. Better shoreline where people can walk up to it	More multi use parks	The general public thinks it is dirty. Change that perception	46038	46240
Enjoy nature, Frisbee golf	How clean the water is.	Trail through Carmel would be a great amenity and bring more people to the river. And if Conner Prairie Farm on the west side of the river could be engaged with programming.	Modern Eco Center, with tips about backyard farming, and ancient / archaic farming practices in the area. Cafe's would be great in places too	It should be cherished and honored like the gem it is.	46032	46032

More restaurants near it downtown, redevelopment of NIFS building that is taking away beauty of WRSP corridor, urban beach with volleyball nets and interactive family space, cleanliness	All above		46163	46012
B Po (r G	Sayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness running, etc), Fish or hunt, Gathering with family or riends	Restoring natural riparian habitat corridors.	A River with (1) more natural riparian habitat, (2) improved water quality & reduced plastics pollution/waste, and (3) greater recreational use.	I think that already-developed areas (e.g., Broad Ripple) should promote the River and do a better job of incorporating it into their neighborhoods, with benches, viewing areas/lookouts, piers, on-River boat and paddle board rentals, etc. However, so much of the River frontage, particularly in Marion County, has been developed for homes and businesses or modified/cleared for levee projects, so I would like to see more/larger natural areas and riparian corridors established which are accessible for recreational purposes but otherwise protected.		46220	46240
B Pi (r	Sayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness running, etc), Gathering with amily or friends	water quality	you can swim in it!			46208	46220

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends					46203	46151
Personal/individual fitness (running, etc)	Water quality and recreational and social activity.	That the river be relevant to the community.	All of the listed examples, plus educational areas	I hope this project happens and I hope all communities are included in the planning, construction and consideration throughout the process.	46205	46268
Shopping or dining, Gathering with family or friends, Recreational boating (sailing, motoring)		Should be clean enough to actually swim in	A nice Farris wheel at white river state park. More bars or venues with live entertainment and music. Carnival style activity all year around,something similar to peer 39 in San Francisco. Water bumper boats with huge inner tubes. A beach like feel to the white river state park downtown Indy. A really nice aquarium like in Atlanta. Indy needs a bold major attraction	Would be nice to see a major water park and larger slides ect somewhere close to downtown. A bold major attraction for all the tourist that come for conventions in Indy is desperately needed. The number one complaint I hear from visitors is although indy has a nice set up downtown there's just not enough family activities and major attractions. Maybe indy could get a major developer from Disney to develop a nice theme park downtown Indy by the river	46216	46216

Enjoy nature, Personal/ individual fitness (running, etc), Mountain bike	Connectivity				47043	
Personal/individual fitness (running, etc), Group fitness (classes, group sports)	Make walking along the river more accessible	More access points for kayaking and hiking/running along river	Hiking, walking, cycling. In some places mixed development with restrictions and shops on the ground floor, but try to keep as much of the waterfront "wild" and "natural"	I recently moved to Halifax, Canada and live near the harborfront. For a city that seems to be focused around the ocean, actually getting to the waterfront is harder than it should be and kind of out of the way. The same can be said for Indy, my home town. I often forget that we even have the river especially downtown. It's just something that's there. The canal is great, but I would love more access along the river itself. Trails similar to those at Eagle Creek Park along the reservoir would be incredible for recreation. Just having a connection to the river particularly downtown would be a massive improvement.	46237

Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality and access	That it's clean enough to swim in, can kayak and boat. Parks along the river to enjoy playing with family. Trails along for running, walking and biking. Restaurants overlooking the river with lots of outdoor seating. Live music venue along the river. Walking bridge to go across.	Restaurants, shops, running/walking/ biking trails, music stage, places to sit outside and work. Clean bathrooms. Playground.		46217	46219
None	To see activities or other uses of the river. Think "Waterfire" in Providence RI.	Development along sections of the river to have riverfront living and dining.	Retail, dining, and living options.	There may be dredging that is necessary.	46216	46202
Kayak, tube, or canoe, Birdwatch, Enjoy nature, hiking at Holliday Park	Access points lack	Riverbank restoration, better activity points, awareness and development facing the river.	All of the abovethis needs to be an active space, but not like the Canal.	The river is the backbone of Marion and Hamilton counties	46201	46204
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	A wider public corridor	A continuous trail that runs the length of the river, connecting all the parks and attractions.	Playgrounds, services for visitors(coffee, snacks, etc), serene nature areas,		46227	46227

Enjoy nature, Picnicking, Gathering with family or friends	Access to and development around it. I have always lamented that there were not more ways to enjoy it.	That it be a central district downtown with bars and restaurants enjoying the view, regular opportunities to access and enjoy the water, and a preservation of the wildlife in key areas.	Would love kayak/tube rentals, walking and bike paths, look out spots and benches.		46222	46204

Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Letting the stream return to a more natural state along its banks and in its channel. Commercializing specific areas in the city may be acceptable but other areas need to be left wild.	To be a source of recreational activities, and a beautiful treasure for the city to respect, appreciate, and enjoy. It should become something that people want to associate with and talk about favorably. Most things about the river already in place could actually be improved in some way or another.	Something for everybody should be available along the riverfront. Take the most popular things other riverfront areas of the country have in place and build on them. In this case, we can research and learn from the successes and failures of tried and true experiences.	My primary experience with the White River has been from float trips on it and becoming a part of it. If others have this experience they will likely come to respect and appreciate it too. That would be a win- win for us and the river.	46077	46077
Kayak, tube, or canoe, Enjoy nature	More public access points and clean up the look of it	For it to be as active with people on a regular basis as the Monon Trail	benches, riverwalks, restaurants		46032	46032
Enjoy nature, Personal/ individual fitness (running, etc)	l would fix up all parkland along River and create major park destinations.	You can view and access river from Riverside Park, which will function as a Central Park for the city.	Swings. Food. Drinks.	Thanks for doing this plan.	46219	46204
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Gathering with family or friends	Would love more restaurant or casual gathering place for food/drink	Emphasis on clean water, but also thinking a formal concert venue sounds awesome	More sophisticated viewing areas with benches / vantage points		46205	46202

Shopping or dining	Kayak launch points easier to park with vehicle and get kayak in/out of water.	Pollution cleaned up, more areas designated nature preserves.	Fishing, playgrounds, benches, bird watching.	Really just want the pollution to go down so fishing is possible again.	46278	46268
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Mountain Bike	Trail access along the river. More cohesion up and down the river.	More Connections. More access/more trail.	Trails / Mountain Bike Trails / playgrounds / Trail access		46062	46222
Enjoy nature	more parks/nature preserves	continuous stretch of nature/forest preserves with interlinking trails	trails, some small businesses (little restaurants, coffee shops, retail shops), nice homes (of various sizes/incomes), well maintained parks, landscaping	We need more nature, and more access to it. We need to preserve all existing forest along the river and connect these preserves for a continuous stretch from Downtown Indy up to Noblesville, with parks and trails as well. Environmental remediation including riprarian restoration, forest restoration, green stormwater management, etc. is essential as well.	46074	46074
Personal/individual fitness (running, etc)	Water quality and play spaces	Water quality and accessibility	Paddle boarding and tubing and parks		46040	
Birdwatch, Enjoy nature	Cleanliness of the water	I want to someday see the white sands it was named after.	Relaxation places with benches, bike racks		46038	46220
Enjoy nature					46240	46222
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Continuous miles of connected trails along the River from Marion all the way to Indy and further south.	Keep the wild nature of the river the same.		Canoe/kayak launch points every three to five mi,es.	46033	46033
Kayak, tube, or canoe, Enjoy nature, Shopping or dining, Picnicking	cleanliness	I would love to have it be even more accessible by kayak or canoe. It would also be cool to have businesses that are focused on serving the folks who are actually using the river for recreational purposes. ex: restaurants on the river where you can pull up your kayak and grab a bite/beverage.	All of the above! It would be great to make the river more of a destination, rather than the destinations that surround it.	It would also be fun to incorporate winter activities on the river when it's cold enough. I know we don't get cold like Minneapolis, but the way they utilize their water sources during the winter for recreational purposes is awesome.	46201	46227

Birdwatch, Enjoy nature, Gathering with family or friends, Recreational boating (sailing, motoring)	Water quality	The water quality needs to be improved - i.e. growth of algae, milfoil, etc More restaurants in appropriate areas. More quiet recreational areas in others	Any and all depending on the particular site	Improving water quality is #1.	46240	46240
Kayak, tube, or canoe, Enjoy nature	Water quality, signage like mile markers for reference.				46030	46033
Kayak, tube, or canoe, Enjoy nature, Gathering with family or friends	It would be nice if the river were cleaner. I would like more natural spaces that get you close to the river; I feel many areas restrict access to the river directly.	I'm just excited to see where new environmental thinking takes the river and public access.	I think there should be areas where you can walk along the river or have open public spaces. Indiana has such few lakes, it would be nice to have more spaces to access natural water.		46062	46062
Enjoy nature, Fish or hunt	Public access on the south side of Indy. I would love to have a public boat ramp where Southport road crosses the White River. It is one of the rare places in Indiana where you can catch smallmouth bass. The closest public assess point to this part of the river is in Martinsville which is 25 miles south.	Cleaner water. Less litter.	Events such as 5ks, concerts, etc.	Please consider adding public assess points to the white river on the south side of Indy.	46217	
Kayak, tube, or canoe, Picnicking	canoe / kayak park or course	whitewater park for tubing, canoe and kayaking.	education to help businesses not litter as the area expands	how do we know the river is healthy?	46220	46220
Enjoy nature, Personal/ individual fitness (running, etc)	I would like to see water quality and access improved.	I would love for the downtown riverfront to develop as both an economic (restaurants, housing, entertainment, etc) and recreational space.		I want to go sailing on the river!	46225	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	More simple, clean points of access	A clean river with balanced access to natural habitat and clean recreational opportunities.	After establishing numerous variable points of clean access for all user interests, let the market of interests decide amenities.	Clear, clean and maintain access points for every neighborhood and the immediate area users will fill the spaces with locally appropriate user activities. To accelerate user rates, promote users and user driven events in water spaces with high visibility.	46214	46222

Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)		More trails - more access points	Places to purchase snacks/coffee		46062	46060
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Shopping or dining, Picnicking, Gathering with family or friends	Water quality and accessibility/activities	I would love for the river to be a feature of the downtown in Indianapolis! Right now it is an afterthought and besides concerts at white River State Park there is nothing to "do".	All of the above.		46225	46204
Birdwatch, Enjoy nature, Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	Rid river of milfoil	Access to Noblesville	Better access to River		46240	46240
Birdwatch, Enjoy nature, Shopping or dining, Gathering with family or friends	Water quality	To be somewhat developed without destroying the beauty and wildness of the surroundings	Playgrounds, walking trails, coffee shops, meditation spots		46224	46204
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Picnicking	water access	That it would be easily accessible by public transportation	Places to buy coffee, lighting, places to sit and enjoy it		46219	46205
Enjoy nature, Personal/ individual fitness (running, etc), Picnicking, Gathering with family or friends	Water access. Trails specific along the river with docks for kayaks and emergency boxes.	Great cities offer much entertainment centered around their rivers! I would like to see most areas preserved for nature but then also a small front for shops/ restaurants to bring people to the river activity. Have the river be functional with recreational boating/canoeing etc.	Think Downtown Disney. A balance of shops, restaurants, coffee stops and opportunities for recreation (boats, boat rides). If there is parking, people could come. I cannot stress enough the opportunity of a nature boardwalk. I think Detroit (Ford Foundation) did this concept well. Fountains to play in and sculpture at main entrance and then a 1-2 mile nature boardwalk that loops.	I'm really glad this project is being considered! I have often thought how Indianapolis has a river but no riverfront presence. #underutilized	46204	46202
Birdwatch, Enjoy nature, Fish or hunt	"Access "	More on-water activities with vendors for kayaks, canoes, boats, paddle boats. Very important to maintain natural habitats. No buildings right on the water, but near. Small	Small kiosks for coffee or cold beverages, benches, gathering places, restroom facilities, places to rent watercraft, a marina.	Looking forward to the water being clean enough for recreation downtown.	46201	46221
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Group fitness (classes, group sports), Shopping or dining	more accessible places	greenways along the river to experience it more frequently	walking/bicycling trails, places to mountain bike along the river	natural surface trails from Southwestway park to Mounds Greenway	46220	46250
Enjoy nature, Personal/ individual fitness (running, etc)	Need more trails along the river, particularly in Indy.	Keep adding features to attract people, as long as they don't interfere with naturr.			46034	46204

Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water quality / pollution	I'd love to see it consistently clean without runoff, trash (especially plastics), dumping of hazardous chemicals, biodiversity restored, not much overdevelopment by people	I'm for recreation classes, benches, not development that changes too much of the natural surroundings or disturbs wildlife	I think that the river has been cleaned up a lot over the years. I'd like to see more of a conservation effort to maintain wildlife and its diversity. I'm not for overdevelopment that disrupts the homes of many native animal species. Our jobs as humans is to coexist with the river not drastically alter it to fit our needs. We've done this in the past and it has dire consequences on wildlife and plant life. If we can maintain the nature integrity of the river help it to flourish and still use it in fun, educational and environment friendly ways then I think it'll be a win -win!	46062	46062

Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water quality	I would like to see more accessibility along the river. It tends to be crowded in some sections and under-utilized in others. I would like to explore more of the river via kayak.	Any development along the river that makes it more accessible in places and increases appreciation without leading to overcrowding or lower water quality would be fine. Ultimately, I go to the river for peace and tranquility.	It now is a beautiful and peaceful place to commune with nature. That should be enhanced as part of any effort, but adding parks and other access points or cultural areas spaced appropriately would achieve multiple objectives.	46037

Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	I use the river 3-4 time a week all year long unless it is frozen, in my opinion the one thing that needs to change is the lack of respect for the river from others I see on it, countless times I have picked up trash and debris left behind from people. It's sad to see the river that I grew up on treated this way, I have noticed it most from the large groups of people kayaking, canoeing, and tubing down the river.	In my opinion it is important to not change anything about the river, reckless epansion and construction will ruin the natural beauty and wildlife along the river.	the most beautiful thing about the river is the natural landscape and untouched feeling when on the river, adding playgrounds, coffee shops, benches, Ext. Will really take away from what a lot of people love about the river	I have used the river in Hamilton and Marion county for over 15 years and would really love for it to stay the same, and others to share the same respect for it that I have.	46033	46033
Personal/individual fitness (running, etc)	Water quality	I wish there were more water allowed to flow.	Right on the riveronly trails	I hope we can keep sewage and garbage out all along the river.	46032	46032
Kayak, tube, or canoe, Enjoy nature	Access and play areas	Keep nature strong along the river	Benches for sure. Not everyone can make it to the first available seating	So thankful for the Kotewee development	46060	
Birdwatch, Enjoy nature, walking	entertainment and shopping	nature should be a priority, but a developed waterfront entertainment district would be nice for Indy I think	coffee, shops, karaoke maybe		46260	46268
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Water quietly and flood control for Rocky Ripple.	I like the way it feels somewhat wild between Broad Ripple and 30th street	It should remain natural. Don't overthink this	Help keep it clean, there is more activity along the river when it is clean.	46208	46208

Kayak, tube, or canoe		Clean it up make it more family friendly.	NA	Again clean it up it's alw full of garbage.	46062	46062
Mountain Biking	More trail riding opportunities for bikes	important that nature areas are made more accessible, water quality is improved , and there isn't too much man-made development			46074	46032
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Bicycling	More bike trail!	South side bike trails better and safer. Southport road and white river is a death trap.			46237	46168
l don't go in the water because Indianapolis dumps untreated wastewater into it	Water quality	Indianapolis must stop dumping untreated waste water into the river.	None at this time due to unsafe water	lt's an open sewer.	46142	46204
Personal/individual fitness (running, etc)	Make it more accessible and improve the quality of the shores	Clean it up, build nice business and houses along certain stretches that are currently poorly developed	Hiking, more places to ride bicycles and mountain bike on dirt trails	Make it enjoyable for everyone and stop hiding it!	46220	46220
Kayak, tube, or canoe, Personal/individual fitness (running, etc), Fish or hunt	Water quality and more wildlife	A less polluted environment with less encroachment from industry and housing, etc	Mountain bike trails		46230	
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	Some sort of netting system on our city drains to eliminate plastic waste from reaching our waterways.	That I can access restaurants and shopping centers via kayak or on the rivers edge.	All of the above and small boat ramps.	A cleaner and safer river for all.	46210	46210
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc), Mountain Biking	Water access	Minimize commercial and residential development along the River front. Maximize access to activities on and near the river.	Natural trails for hiking, running, and cycling.		46228	46241
Kayak, tube, or canoe, Enjoy nature, Personal/individual fitness (running, etc)	Water quality and debris removal	Paths and trails that provide views and access to the river but don't encroach on the path of the river. Trails that are built in the wrong locations are full of sand and debris or get washed away.	Trails that people want to use and then don't discourage businesses from deciding to open along the path. You know capitalism.	Get actual people involved in the process and development that are not politicians.	46011	46240

Enjoy nature, Mountain biking.	More single track biking trails!	I just think it's this incredible resource and something that could be a huge attraction to all walks of life. I'd love to see it continued to be cleaned up and also businesses pop up along it. I think of some of the super cool stuff along the river in downtown Chattanooga TN.	Brew pubs, Coffee shops, restaurants, bike shops, book stores, gyms	Please make this a priority. It's such a great resource. Thanks.	46074

Kayak, tube, or canoe, Enjoy nature	Remove trash, junk, and debris piles. Bio remediation. Many plant species may be used to absorb and sequester heavy metals and sewage found in the water shed. Blooming flowers and trees would add to the scenery.	I think in urban areas we should develop recreational as well as mixed purpose properties. I think adding a section for white water rafting and kayaking would be nice feature for outdoor enthusiasts.	Public gardens, handicap accessible kayak canoe launches would be great. I have used them on other rivers in other states to easily launch myself. I'm not handicap, but they are a big help.	Clean clear water. I have kayaked in the upper peninsula of Michigan, and the rivers are clean, I can see to the bottom, and I think people would enjoy the river more.	60538	60538

Kayak, tube, or canoe, Personal/individual fitness (running, etc), Fish or hunt, Mountain Biking	Add more multi use trails like Town Run to link together for longer north/south trail system. Mountain biking is fun and get kids in to exercise and nature. 16 miles of mountain bike trails is not enough for the entire city of Indianapolis. Multi use trails bring in tourism dollars and improve lives.	Long distance mountain bike and hike trail system along the river linking indianapolis to Strawtown Koteewi. It would be fantastic. It would get bikers and hikers out in nature where they can exercise. Mountain bikers have proven they are willing to maintain trails with volunteer work. Look at Brown County State park, Fort Ben, etc.	Mountain bike and hiking (multi-use) trails and better parking for canoe kayak access.	It is a great natural resource and a big reason I live in Noblesville. I grew up on a farm on the White river near Muncie and it is very important to me. Let's improve access for multiple groups! Fisherman, mountain bikers, hikers, kayakers. Do not make only hiking trails like the new plans at Eagle Creek. That just alienates certain user groups. If you have a group willing to put in the work to create something special please listen to them (HMBA!).	46062	46062

Clean up the water, remove invasive plants, promote wildlife, improve infrastructure around the river, add more trails (e.g., mountain bike trails). I love that the river is an escape to nature within downtown Indy so I would not want to change that aspect by massively developing it.	Mountain bike trails, canoeing/kayaking	It seems that the river has been an under-appreciated asset to Indy. I have enjoyed it as a rather private escape by running and biking the existing trails, although the isolation has sometimes made it feel unsafe. We need to clean it up and promote it but not dramatically change the character!	46075	46202

Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends, Dog walking	Water access	Increase access by developing trails & safe platforms and seating in key visitor- friendly spots. Ex: Develop walking paths along badly eroded West Bank of Marott Park and Fairbanks Art & Nature Park and in Riverside Park	Playgrounds and benches in key spots; places to buy coffee/snacks. But, location needs to be strategically planned to keep some areas very natural for wildlife and nature lovers/hikers. The river is so long all of these activities can be accommodated while large natural areas are preserved.			46038	45201
Enjoy nature, Personal/ individual fitness (running, etc)	Water quality	More FREE public acess	Playgrounds and benches	Make it clean, easy to access, family friendly, elderly friendly, and a place where ALL income levels feel welcome. Enjoy nature, Picnicking	Water quality	Clear water and more access	Playgrounds, benches, parks, boat rentals		46038	46032
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	Amount of water flow is poor due to water fluctuations and silting which means the act depth is getting less and less. Soon there won't be boating on certain areas due to the silting and constant depth changes due timber dams and floods. Additional ramps especially in areas south of downtown from Eli Lilly south to SR144. Boat ramps not kayak access points also allow waterways along the river to be fished instead of being ticketed and deemed unnavigable waters. Technically the entire river is legally unnavigable	Keep it natural. If you want restaurants on it do that downtown not in rural or natural areas sheltered by the way it was. You don't have to develop everything. How about additional stocking of sport fish and additional boat ramp access points or making the ramps you have better such as the ramp that used to be at 116th st it's now just sand and currently difficult to access at all	Depends on where you are downtown I would say you could have those amenities however unless you have a canoe, kayak or jet boat, what access points do you really need and based on it being a walking or path to travel I don't think you need to build that. What happens if you build it and businesses go under more empty buildings and we have enough of those around now	Keep it simple and natural	46037	46060
Enjoy nature, Fish or hunt, Picnicking	Eliminate ski and wake boarding	Improved fishery	Boat ramps		46062	46062
Fish or hunt	Cleaning up access points after mud/ flooding occur	Keep it the same outside of Indianapolis	In the city add storefronts etc, but north and south of the city keep it natural and navigable by boat.	Regulate the canoe/kayak businesses (white river in particular). Their customers need to understand they share the river with boaters and they need to not block the entire river. This has become a big problem for boaters that must stay on plane in order to navigate the shallow areas of the river north of indianapolis.	46037	46240

I don't because I'm not aware of places activities to go to and participate in, but I would LOVE to have more activity along and in the river	Water access and cleanliness, safety	I would like to see more opportunities to actually enjoy the water itself and perhaps have access to an urban beach somewhere along the river near downtown Indianapolis. It would also be nice to have access for kayaks/boats/ tubes near the downtown area in areas where it is safer to get into the water. It would be fun to see some sort of restaurant with a patio and deck access to enjoy the nature around the river while having a meal. I would also like to see someway of utilizing the white river to water any urban gardens or green houses that may be set up in the area (especially for the GM stamping plant spot) to help filter water for both the gardens and back into the river to clean it up naturally.	Playgrounds, restaurants (with patios), beaches, water parks, small retail shops, community vegetable gardens, playgrounds, observation decks in the areas where there is more wildlife to observe as well as areas for festivals!	The river holds so much potential for enjoyment and activities. Hoping the city is looking at other cities that have successfully implemented more accessible opportunities and activities on the water to enjoy.	46221	46221
Birdwatch	Stop all the dumping. When the river is running high and fast I see pickup trucks loaded with trash/junk go down the street then 20 minutes later they go north empty. Now after 8 years of watching this behavior there should be a mountain 100 feet high somewhere around 69th and Ralstonguess what nada. It looks to me like they are dumping off that so called boat ramp due west of 69th. There should be a ton of junk and trash on the riverbed east side especially into the turn to the west by old BR HS. When the water is clear take a drone over that area. It sickens me the mentality of people who do these things. I'm 67 now but I did water ski guite a lot in my 20's but there is no way I would think it marginally safe to ski White River below Ravenswood.	Stop all dumping so the river can heal. Flood control would be helpful. There is quite a bit of wonderful wildlife between 69th and 71st - that 'ditch' could be made into a nature preserve since it is attached to the river at 65. I photograph Great Blue Herron's, Osprey, Geese. I would like to see it become clean again like it was when I was a kid. I hope that happens some day.	Everything. Once it get's cleaned up and policed regularly (oversight all around) I think that the city should buy up all the land 100 to 200 yards from the river - scrub it and resell it to developers who will create river assets and raise the property values. Of course that takes huge financial infusion of cash but in the long run worth it. (in my opinion)	Honestly hum honestly. The houses on the river are up scale pretty much but the houses behind them (east) hardly nice at all. I live in one of these houses. Remolded but a dressed up dump nonetheless. It's a seedy neighborhood with some people so dug in that they are dragging down progress. I would suspect they are the 'dumpers' - dad did, his dad did it's a family tradition. This mentality will keep this area from being anything worthwhile. I apologize for my attitude but after watching this for 8 years I'm hoping to move this spring.	46220	46220

Enjoy nature, Personal/ individual fitness (running, etc)	Water quality by me is terrible because of the septic systems in the area, so I never go in the water. Even though a live so close to the river I'm unable to walk close to the river unless I drive somewhere else.	Clean up the river and build areas that can be accessed by everyone for enjoyment.	In general I would like to see the whole river accessible like the Thames. Those who live around the river can walk next to it like the monon train. Intermittently breaking from retail/gathering areas to parks and areas of nature.	Maybe we can build natural wetlands to naturally purify the water.	46220	46202

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Shopping or dining, Picnicking, Gathering with family or friends	Water quality! Water access! Public areas near water.				46064	46250
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends, Recreational boating (sailing, motoring), Wade in river and test chemical composition w/ RiverWatch	The water quality of the river needs to be better monitored and protected, including monitoring upstream agricultural, industrial, and municipal facilities.	A cleaner river would be seen and used by more residents walking along a beautiful naturally landscaped river and riding on the river in environmentally friendly boats.	Yes - all of these - walking paths, playgrounds, benches, boat rides, parks with native plants, snack/coffee shops with environmentally friendly processes.	Remove or revise low-head dams so safety is improved.	46240	46240
Kayak, tube, or canoe, Enjoy nature	Water access and quality.				46902	
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends	Canoe access		More camping for people canoeing		46011	46016
Fish or hunt, Recreational boating (sailing, motoring)	116th ramp not accessible for boats. Too many people. Littering.	Keep it the same.	None.	Keep people away from the river. Lots of hunters use the river. Jet boats use the river and can't go slow without bottoming out. It's taking away from the people who have been enjoying the river for what it is. Don't draw in people who don't care about my back yard. We chose to live here because it's our way of life, not a tourist park.	46038	46062
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	We need a big lake in Indiana. 30000 - 50000 acres would be sweet. Heard we are looking to build a 2000 acre lake north of Anderson. Not enough but better than nothing.	Add a few access points but we don't need powerboats up there, save those for lake Indy., Broadripple and down near the zoo. Water park would be cool, restaurants in that area for boats to drive up to.	Water park, restaurants, bars, with river access	We need a major lake or 3 in IND. Missouri, Alabama, Kentucky, Tennessee, Georgia, Carolinas, even Kansas all have us beat. They thought ahead for tourism.	46237	46226
Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	Nothing really	Important to keep it primarily nature, there are plenty of commercialized areas downtown	Don't feel like additional amenities are needed	Love how it is a close and convenient escape to nature	46033	46203
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Clean the river from trash that people leave.	I would like to see the river cleaned And protected With hunting and fishing allowed as well as canoeing kayaking or floating down the river.	I would like to see the existing campgrounds To be clean And maybe some areas where people that are taking canoeing or kayaking trips can have a pull off area to relax or to even camp for the night.		46034

Kayak, tube, or canoe, Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	walking trails along river from Anderson to Indianapolis	Keep it natural and a green space in the midst of the urban sprawl	There is already plenty of retail establishments and food places along the river we need more places to getaway from the commercialism where we can relax and enjoy the scenery	Develop the area along the river in Indianapolis as it is in San Antonio but leave plenty of green corridors between cities and for wildlife	46060	46060
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc), Gathering with family or friends	Restock with fish - clean up - need walking areas and wildlife areas	More trails, more greenways for wildlife, more quiet areas	No retail please-we have enough of that already - need to leave space for wildlife, walking, bird watching	So much of adjacent areas are already retail developed/ bars-restaurants, no more please we need to leave quiet space around the river for people and animals	46060	46060
Fish or hunt	Better ramp access for boats	It should remain natural. No development should occur. It's the one public place in Hamilton county where people can enjoy the outdoors and wildlife without paying to do so.	None. No development should occur.		46062	46062
Enjoy nature, Fish or hunt				Why do you think it is ok to steal people's property for your pet projects?	46038

Fish or hunt					46224	46224
Enjoy nature, Gathering with family or friends	Keep it clean.	Something like the San Antonio riverwalk would be great.	l'd love something similar to South Bend's East Race whitewater rafting.	I'd love a beautiful riverwalk that would stretch beyond White River State Park, or become part of it.	46237	46237
Personal/individual fitness (running, etc), Shopping or dining	Water quality and access	Clean and accessible	Restaurant		46202	46201
Enjoy view of river as I drive to and from church and various places aeound the city of Indianapolis.	"Overall aesthetic appeal. "	It should be a place that is lively and invites all ages and types of people to enjoy the beauty of the river.	Would love to see walkways, lighting, benches, sculptures, special places of interest/activities, sculpted gardens, etc.		46228	46222

Personal/individual fitness (running, etc), Gathering with family or friends	More to do around/ on it	Take advantage of it in broad ripple and downtown Indy. Waterfront dinning	All of those		46220	46217
Personal/individual fitness (running, etc), Walking, (wish there were pull-up bars & workout equipment)	Access & things to do	More investment on real transformation	Pull-up bars/workout equipment, basketball courts, rock-climbing, paddle boat	"Maybe an eco-friendly train/boat system to travel along/above the riverfor Access, additional amenities, & small transit "	46254	
Fish or hunt	Regulated water levels	Fishing continues to improve		No restrictions for boats during this developement	46034	46060
Kayak, tube, or canoe, Bike riding, hiking	Severely limit development along the river, north of 96TH Street.	Keep nature first and foremost. Development brings trash and ugly buildings.If you do HAVE to build buildings, make them match the flora and fauna. Nothing modern !	Any of these are fine south of 96th Street		46062	46062
Kayak, tube, or canoe, Enjoy nature, Fish or hunt, Gathering with family or friends, Recreational boating (sailing, motoring)	Better and more access sites for canoeing north of indy .	Better supervision to keep it clean and safe from people who litter.	Safety and respect for inexperienced boaters. Laws and regulations enforcement for polluters.	After 20 years of floating anywhere from daleville to noblesville I've never seen so much trash since the 2 new accesses were added. To improve it. Have to keep clean first.	46036	46036
Birdwatch, Enjoy nature, Personal/individual fitness (running, etc)	Making the waterway a central part of a shopping and dining area.	"It is important to keep so many nature areas available. Water is an important part of tourism in many cities. I would like to see a commerce area that would attract tourists."	A play area that includes a waterpark, a beach area, related swim classes and boating area.		46205	46208
Kayak, tube, or canoe, Enjoy nature	1. Water quality; 2. Removal/alteration of dams; 3. Access: views, walking along the river	I would hope people stop using it as a dump and the riparian corridor is improved through removal of invasive species and replacement with native tress, shrubs and plants.	more natural areas		46220	46240
Kayak, tube, or canoe	Water quality	Turn it into an area similar to the one in Cincinnati	Running paths, playgrounds, benches, art work, bike rental, public bathrooms	Make it a positive for the city versus an eye sore. Get rid of the homeless along the river banks	46259	46201

Enjoy nature	Water quality		Biking trail like the monon		46217	46255
	Water quality	The river should be cleaned to where its safe to swim in again	Riverside shoppes	I am excited to see where this project ends up a decade from now. The river is the pride of indy and it needs to look like it.	46229	46229
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Gathering with family or friends	Natural restoration to earthen levee - no concrete barriers - in Rocky Ripple and upgrade the town hall river outpost to a community gathering place; docks, decks and overlooks, "old school" bait shop, coffee, beer, pizza.	Make the natural world and recreation priorities. Honor residential lifestyles along the River. Every inch does not need to be "commercialized." Bring back the Raft Race!! BBBB	Recreation, coffee, beer, wine, boat docks, bait shops, gathering spaces ie decks, lookouts, nature paths, bird watching, recreation classes, boat tours, float trips, NO NOISE beyond nature and spontaneous human laughter and joy. Occasional live music in select locations.	Prioritize, optimize the natural world and the beauty she gives. We don't want to pave paradise and put up [another] parking lot. In your study be sure to investigate river towns around the WORLD, particularly residential areas that preserve natural habitats and enhance them. At Butler and other universities we refer to "peer and apirant" institutions. What and where are the White River's peer and aspirant rivers and towns? Perhaps we could have floating homes in some locations along the corridor for example. With the river the centerpiece, add and build in ways that honor her; not try to make her something she's not. Thanks for all your efforts. This seems like a really professional, creative,	46208	46208
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt	Keep it clean I don't fish any more because I don't think the fish are edible.	my dream is that is left alone where the is a lot of houses. Keep it clean.			46038	46038
Enjoy nature, Gathering with family or friends	l'm not aware of many activities	Safe secure places to shop local small businesses and larger anchor stores along with an industry hub (like Fishers Tech hub) along the river that will continue to attract visitors. I'd like to create a world-class pet friendly zone along the river. This pet-friendly zone could be an attraction that can be promoted all around the world. Possiblly creating a Midwest version of the Westminster Dog /Pet show here in Indianapolis.	A world-class pet-friendly zone would be a great way to garner attention for the project.	I would like to have a campaign like the "Don't mess with Texas" clean campaign be utilized in Indianapolis and the White River. This catchy campaign slogan will reinforce the love we have for The White River.	46226	46268
Kayak, tube, or canoe, Birdwatch, Enjoy nature, Fish or hunt, Recreational boating (sailing, motoring)	Water quality. Sewage, nutrients and sediments from upstream	Huge reduction of Ecoli, phosphates, nitrates and sediments from upstream.	Protect natural areas.	I love the river and am happy people are paying attention to it now but we need to dramatically improve water quality. It is getting dangerous to boat above Broad Ripple dam due to weed growth and sediments. Both are forcing kayaks and power boats into an increasingly confined area.	46240	46204

Personal/individual fitness (running, etc)	Water quality.	Water quality	Path to connect the south side to downtown. Think monon - to allow for commuters to get and from downtown safely. Also another options for walkers and runners.	"SothwestwAy - please do not open to camping and boat access unless you plan to have dedicated resources to police the area. The partying and illicit activities that occur at the north and south ends at dark are never addressed. During hunting season locals still use as their personal space. During the summer, trash (beer cans and liquor bottles are routinely found along with chip bags etc). I can't even imagine what that end of the park would like if opened to camping and boat traffic. To that, hikers, runners and cyclists use the area. How safe is it to have motorized traffic back there?! Connect the southwest side to downtown by way of a monon like trail system. "	46113	46285

Enjoy nature	I would go down stream a bit from the rock dam south of Washington Street and erect a new dam at the height of the dam by 16th street and then demolish the 16th Street dam to make a large downtown lake. Building such a dam would preclude having to dredge the river to gain depth.	While Indy will never be on a navigable waterway it is the largest US city not so situated	Dinner cruise boats, water skiing, swimming, more boat races, moire water skiing tournaments, public access docks, etc.	The only fly in the ointment I suggest with the new dam might be where Fall Creek unites with the river. It might raise the levelin the creek too high but that is easily determined.	46236	same
Enjoy nature, Personal/ individual fitness (running, etc), Mountain Biking!	water fountains & bathrooms	lf you're going to build trails make them multi use	Benches & overlooks	If you make access too easy via car things get trashed sooner. If you want to keep it nice make people hike out a ways to get to it and try to concentrate easy access where you have staff to patrol & maintain. Most true nature lovers will work for the solitude, sights, sounds, etc	46224	46224
Enjoy nature, Personal/ individual fitness (running, etc), Fish or hunt, Mtn biking	Water quality/sewage overflows	I'd love if combined sewer overflows where no more everywhere	Benches, bike repair stands, bike wash stations, water fountains	This area needs more mountain bike trails & there may be possibilities in wooded land / bluffs along the river	46224	46224

Birdwatch, Enjoy nature	Adjacent land use far too many people have lawns and use mowing/fertilizer. Not enough native plants/ prairie/grasslands. This is not only harming the water quality, but harming the overall flora/fauna.	To see it safe for canoes/recreation. Remove every single dam/human made barrier that is altering the native flow of the stream, improve water quality, improve biodiversity, make the river natural again.	NONE. Keep it natural. Walking paths & benches only. All surfaces should be constructed using permeable materials.	Just mainly would like to see adjacent lands be more native by restoring lawns back to native prairies.	46062	46204

Enjoy nature, Personal/ individual fitness (running, etc), Gathering with family or friends	Preservation of the woods and nature	Maintain the beauty of the river and surrounding parks	"I prefer to maintain the natural beauty, I don'r Believe any structures should be Added. Perhaps removal of fallen trees, and invasive species"	I appreciate the lovely parks that allow us to enjoy the natural beauty. Maintenance of walkways is important, encouraging others to responsibility for maintaining the trails and parks- stay on trails, pick up trash, don't feed wild animals, etc	46260	
Kayak, tube, or canoe, Birdwatch, Enjoy nature	Water access we need more public access sites with easy access (short portage to river) and suitable, ample, safe parking available	Restore and preserve natural habitat along river to support migratory bird corridor through central Indiana.	Natural Hiking paths	In general, Indy needs more progressive funding and public support for recycling and increased public education and commitment for improving water quality (reduced pesticides, herbicides, fertilizers) and prioritizing water conservation. It is still amazing that we can have long droughts during the summer with zero call for water rationing. UNBELIEVABLE!!	46220	46285
Kayak, tube, or canoe, Enjoy nature, Fish or hunt	Water quality	More people canoeing and kayaking. Easier access points, easier shuttling back to vehicles.	Places to eat/drink coffee Riverside would be amazing. Still want lots of untampered nature if possible.	Whatever is done must be maintained and kept clean/ safe ALL ALONG the river.	46219	46204

Phase One Takeaways

While great efforts were made to reach as much of the community as possible, the team was aware that multiple communities were still underrepresented in Phase One of the planning process and there is more work to do in further phases. To ensure the plan represents the aspirations of the populations most impacted by the river today and in the future, the team attended additional existing community events with a focus on learning from these groups underrepresented in the process thus far. For more information about those groups that were reached, see the table and outreach methods on the next three pages.

Phase Two Feedback

In the Envision Phase, surveys and meetings were organized to elicit feedback regarding the future of the river, ideas about improvements along the river and preferences for vision statement and principles. All feedback from meetings and surveys are compiled into the following section charts. key takeaways from the feedback received after the second phase include strong support for connectivity improvements of all varieties (water, trail, community, habitat) and improvements of public access to the riverfront. Participants also sought a balance of activation along the river with places that should be preserved as private property, places to enhance natural or historic function and previously developed areas that should return to a more park-like or natural state. Key priorities are summarized below.

Dam Infrastructure!

People want to see ideas to retrofit the dams to support a variety of needs - environmental, recreation, water quality, and safety.

Activate the Riverfront! But Not Everywhere.

There was consensus about the best places along the river for activating with programs or economic development.

Embrace Connectivity

There are ideas to connect across the river via pedestrian bridges to create identity and opportunities to embrace bike/ped connections to riverfront businesses.

Protect Properties from Flooding and Development

There is a lot of distrust among communities in North Hamilton County and in Rocky Ripple.

Hamilton County	6	Bring back more native species to the river and protect natural areas from development.	Carmel	The river to be a long natural, linear, park with access points that allows residets to engage with the river to learn, enjoy water sports and get away from the "busy-ness" of life.
Hamilton County	6	Bring back more native species to the river and protect natural areas from development.		Bring back more native species to the river. Less pollution, more learning opportunities year round interest in habitats. Pease and serenity kept intact. Less trash and pollution. Keeping a balance.
Hamilton County	6	Bring back more native species to the river and protect natural areas from development.		A fully protected and restored riparian corridor, which is respected and preserved, in perpituity, by public officials.
Near West - Edison School	6	Bring back more native species to the river and protect natural areas from development.		(1) Encourage promotion of native plants at local garden centers and BIG BOX stores. (2) Provide (free) seed for native gardens on private property (3) Encourage local replacement of grass/lawns with native gardens. (4) (Not lastly) Use all available resources to educate citizens about impacts of native planting.
Near West - Edison School	6	Bring back more native species to the river and protect natural areas from development.		Will work with ROW, KIB and Cummins to do more native plantings along our waterways
Near West - Edison School	6	Bring back more native species to the river and protect natural areas from development.	Indy and Rocky Ripple riverfront property owner	I wouldn't choose either however I'd rather have a public access trail that is carefully constructed to honor nature and sustains my 24/7 access than an engineered flood wall.
Near West - Edison School	6	Bring back more native species to the river and protect natural areas from development.	White River watershed	Public works projects using labor subsidizied by corrections funding.

Near West - Edison School	2	l am worried that public access will impact my property.	Broad Ripple	That those with private property a long the rivers won't lose their sense of privacy. Our attention would be focused on developing recreation on public lands and attracting people to public areas to deter those looking for recreation from trespassing.
Rhodius Park	2	l am worried that public access will impact my property.	White River	Property rights being taken away. We have no plans to take property away from owners. We hope to provide plenty of public access points and education about respecting the river to those that get on the water.

Rhodius Park	3	l do not want new projects to make my neighborhood unaffordable.	West Indy Rhodius area	That there will be no displacement of individuals living near the river and that individuals in homeless campes will be relocated into stable housing.
Hamilton County	5	l think the low-head dams are unsafe and impede recreation.	Broad Ripple	Removing low head dams to allow boaters to safely traverse the River across the metro area
Hamilton County	5	l think the low-head dams are unsafe and impede recreation.	Indy	The elimination of low head dams on the White River. This will allow native species to return.
Hamilton County	5	l think the low-head dams are unsafe and impede recreation.	Indianapolis	Eliminate or break up low head dams. If ownership is not apparent or known, break up dams which will allow safe river recreational use.
Hamilton County	5	l think the low-head dams are unsafe and impede recreation.		putting by passess around pre-existing dams on river
Near West - Edison School	5	l think the low-head dams are unsafe and impede recreation.	Indianapolis	Re-engineer the dams, like in Bend Oregon to still serve their purpose but allow recreation.
Near West - Edison School	5	l think the low-head dams are unsafe and impede recreation.		Loss of Lake Indy formed by the Emrichsville Dam ends a recreational area for water skiing kayaking and canoeing. The loss of twen(sp?) around space eventually causes desolation.
Rhodius Park	5	l think the low-head dams are unsafe and impede recreation.		Getting around half dams by installing lock (self operated)

Rhodius Park	5	l think the low-head dams are unsafe and impede recreation.	Lawrence	The priority is first safety and then how this will lead to a destination and increase community interaction
Rhodius Park	5	I think the low-head dams are unsafe and impede recreation.		Develop portages or safe way to traverse around the dams. Incorporate rapids if possible at a destination. In particular I think this would work at Williams Creek so we could connect the upper and lower parts around Broad Ripple
Rhodius Park	5	l think the low-head dams are unsafe and impede recreation.		Low head dams - develop Emrichsville, Broad Ripple and Chevy Dams for water recreation
Hamilton County	1	l want my family to be better and more safely connected to the river.	Carmel	Extension of walk/biek trail from Haverton Way north to 146th Street . Preserve as a natural area but with nice pathway.

Hamilton County	1	l want my family to be better and more safely connected to the river.		More public conversation about the benefits of having the White River swimming(sp?) through our region. I would want an intense public relations campaign to make issues around the riverfront and center.
Hamilton County	1	l want my family to be better and more safely connected to the river.	Carmel	Public access to waterways is vital to the quality of life in a community. Public access increases home values and encourages more development.
Hamilton County	1	l want my family to be better and more safely connected to the river.	Noblesville	Your property that borders the river will be cleaned up, beautified and become a nature habitat. No commercial development will be allowed. Just beautiful paths, trails, plants and flowers will enhance your property. Values will increase.
Rhodius Park	1	l want my family to be better and more safely connected to the river.		Offer free or economical swimming and boating lessons
Rhodius Park	1	l want my family to be better and more safely connected to the river.	Naptown	Access to WR including dam conversion for boating and kayaking
Rhodius Park	1	l want my family to be better and more safely connected to the river.	Meridian Hills	Very few places have ramps to the river that are accessible by wheelchairs and activities that are accessible to the disabled. Municipal Gardens has a ramp that allows wheelchair user to access the River as well as water skiing for the disabled and abled bodies alike.
Rhodius Park	1	l want my family to be better and more safely connected to the river.		More canoe access sites, trails along the river similar to Fall Creek on the North East side of Indianapolis
Rhodius Park	1	l want my family to be better and more safely connected to the river.		I would love to see more direct and visual connections to the water. Provide connections via the river to destinations along the river. Eliminate levees through down town Indy and address flood waters in a way that does not create such a physical and visual barrier to the river.
Hamilton County	9	l want the river to be clean and safe enough to fish and swim.	North Indy	A clean river for swimming, fishing hunting, and boating. We can do this by controlling chemical run off and identifying main polluters throughout Marion and Hamilton County
Hamilton County	9	l want the river to be clean and safe enough to fish and swim.	White River	l want to clean up the river, then it would be safe to be in the water
Hamilton County	9	l want the river to be clean and safe enough to fish and swim.	Carmel	An extensive effort to clean up the river - I have participated in White River clean ups and its is astounding how much food related (wrappers and cups) and construction trash (stryfoam board) lines the banks - especially downtown Indy. An extensive clean up is needed.
Hamilton County	9	l want the river to be clean and safe enough to fish and swim.	Indianapolis	That the city charges fines for dumping in an amount that it is no longer cheaper to pay fines than to Dump
Hamilton County	9	l want the river to be clean and safe enough to fish and swim.	Sandy Point	Cleaning up the honeysuckle and algae also make the river more navigable by doing someithgn about the silting.

Hamilton County	9	l want the river to be clean and safe enough to fish and swim.	Carmel	Keeping the River clean enough to fish and swim by holding corporate owners accountable and engaged in healthy practices. They also can contribute to the cleaning of river waters and shores. Children aslo can learn the healthy practices needed.
Near West - Edison School	9	l want the river to be clean and safe enough to fish and swim.	Indy	Pay more to expand the sewer system so that all septic tanks can be removed
Rhodius Park	9	l want the river to be clean and safe enough to fish and swim.	Northwest Indianapolis	2 problems (1) farm runoff from crops and or from confined animal feeding (2) unzoned housing development. I canoe from Anderson to Indy 30th Street. Crops are grown to the bank in Hamilton and Madison Counties. Boats are double parked by the "yacht club" in Marion County. A set back might be possible/a goal.
Rhodius Park	9	l want the river to be clean and safe enough to fish and swim.	Near West	I would like the river to be safe and clear for all activities but I want any development to be compatible with environmental sustainability. I don't want the development to be profit driven. I would like it to be well thought out and sustainable. Not a bunch of restaurants, etc that in 5-10 years go bust and look like crap.
Hamilton County	7	I want the White River to be a national destination!	Carmel	I don't particularly care if the White River is a natural destination but could be a regional and local. If the river could be restored to its "white" bottom, that would be spectacular! Purchase National Scenic River statues? Promote nature and quiet recreation on river.
Hamilton County	7	I want the White River to be a national destination!	Carmel	Improve White River so the water level stays higher than it is now. Create more trails in various counties for walking, biking, etc. Do not commercialize. Make it safe for all people to enjoy water.
Hamilton County	7	l want the White River to be a national destination!	White River	Make a national destination by making it physically and intellectually accessible. A person should not feel like they have to be part of a particular group (nature lovers, historians) to enjoy the river.
Near West - Edison School	7	l want the White River to be a national destination!	Haughville	By becoming a culturally diverse place along the banks of the White River displaying monuments that speak to that growth as a natural landmark for visitors to enjoy fun, food and culture downtown Indy.
Near West - Edison School	7	l want the White River to be a national destination!	Rocky Ripple	A new community based tax district to help defray expenses and reinvest in our exisitng communities
Near West - Edison School	7	I want the White River to be a national destination!	Bridges Art/ Community	Events, preservation, natural resources, parks/scientific museum. Fishing, wildlife, some mixed use, boardwalk, easy access to river.

Keep Indianapolis Beautiful	10	Tell us what you want the Vision Plan to accomplish. What solutions would you recommend?	Indianapolis	Make the river an experience of human connection with nature, instead of separation from nature.
Keep Indianapolis Beautiful	10	Tell us what you want the Vision Plan to accomplish. What solutions would you recommend?		Please listen and act on the input of the community. Preserve the culture and history of the river and develop it with vision to the future as a living, evolving process for future generations.
Keep Indianapolis Beautiful	10	Tell us what you want the Vision Plan to accomplish. What solutions would you recommend?		More connection to the White River as a destination that the residents of Indianapolis and visitors alike. A habitat that supports wildlife.
Keep Indianapolis Beautiful	10	Tell us what you want the Vision Plan to accomplish. What solutions would you recommend?		To make River a primary endeavor for Marion & Hamilton county citizens.
Keep Indianapolis Beautiful	10	Tell us what you want the Vision Plan to accomplish. What solutions would you recommend?		Better enforcement of wellfield and other commercial / industrial sites.
Keep Indianapolis Beautiful	9	l want the river to be clean and safe enough to fish and swim.	Indianapolis	Yes to clean and safe for swimming and fishing.
Keep Indianapolis Beautiful	9	l want the river to be clean and safe enough to fish and swim.		Yes, Clean up our rivers. Water will be come a precious commodity. Tranquil mother earth must be honored and preserved.
Keep Indianapolis Beautiful	9	l want the river to be clean and safe enough to fish and swim.		Would like the river to be clean and safe enough for aquatic life to flourish - with limited swimming, fishing and recreational features in particular spots for humanoids.
Keep Indianapolis Beautiful	9	l want the river to be clean and safe enough to fish and swim.	Keystone Monon	Cleaner water is always a healthy goal. I've been concerned about the lack of genuine information dispersed from the dry cleaning poison that affected us near the state fairgrounds.
Keep Indianapolis Beautiful	9	l want the river to be clean and safe enough to fish and swim.		I think there needs to be a trash component. i have canoed several rivers in Indiana and all you see is trash from the beer cans, plastic bags, trees and cars. If this is promoted (do not litter) as the plan develops it might be easier to control. There are many individuals who just don't get why littering is wrong.
Keep Indianapolis Beautiful	8	Protect my community from flooding.		l believe it is imperative to protect communities from flooding via re-development appropriate for a waterway community and perma culture - green infrastructure solutions.
Keep Indianapolis Beautiful	8	Protect my community from flooding.	Indianapolis	The river being allowed to meander rather than being walled in. Jaime Learner, a former mayor of Brazil, kept costs down by having sheep herded by the under employed and also using those flood plains for recreation including soccer. This include Broad Ripple.
Keep Indianapolis Beautiful	7	l want the White River to be a national destination!	Indianapolis	Make it a national and international destination for designers and engineers.ecologists to emulate in their home areas.

CATEGORY DESCRIPTION MAYOR OF CITY/ TOWN RESPONSE

Keep Indianapolis Beautiful	7	I want the White River to be a national destination!		Make the White River a destination makes perfect sense for so many reasons - ecology concerns are showcased, economic development and some Indy pride.
Keep Indianapolis Beautiful	7	l want the White River to be a national destination!	Indianapolis	The White River being a national destination by implementing activities that activate the public to interact more with the river, such as voyages or river tours.
Keep Indianapolis Beautiful	6	Bring back more native species to the river and protect natural areas from development.	My Town	Realize that every action has a reaction. We will be diligent in realizing that what we do up stream will affect those down stream. Less commercialization and more naturalization.
Keep Indianapolis Beautiful	6	Bring back more native species to the river and protect natural areas from development.	Indianapolis	Yes to native species and natural areas - designed with nature so minimal need for landscaping.
Keep Indianapolis Beautiful	6	Bring back more native species to the river and protect natural areas from development.	Keystone Monon	KIB is phenomenal with projects and I entrust them to this project vision.
Keep Indianapolis Beautiful	6	Bring back more native species to the river and protect natural areas from development.		Yes, important to bring back native. Education also important, signage, public symposiums, school presentations and clubs concentrating on natives/wildlife and river ecology.
Keep Indianapolis Beautiful	6	Bring back more native species to the river and protect natural areas from development.		Using planting projects to assist n cleaning / improving the quality of the water.
Keep Indianapolis Beautiful	5	l think the low-head dams are unsafe and impede recreation.	Indianapolis	Those dams are dangerous and do impede recreation. If must design for electrical generation, do much less harm. Remove the low head dams.
Keep Indianapolis Beautiful	5	l think the low-head dams are unsafe and impede recreation.		l know that for paddlers - low head dams are currently being removed - as deathtraps across the country.
Keep Indianapolis Beautiful	4	l want to fix the public spaces we have now before investing resources into new spaces.		Definitely want to fix the public spaces we have now before investing in new development. In our indy parkways, bridges, parks, greenways incorporating habitat restoration, green infrastructure and minimal non-dominating built structures.
Keep Indianapolis Beautiful	4	l want to fix the public spaces we have now before investing resources into new spaces.		There is only so many resources. Concentrate first on those in development. Then move on to the next project to be developed. Keeping in mind community input to keep it authentic and buy-in.
Keep Indianapolis Beautiful	3	l do not want new projects to make my neighborhood unaffordable.		New projects including those that are directly undertaken to restore, protect the basic natural resources should not make the neighborhoods unaffordable.
Keep Indianapolis Beautiful	1	l do not want new projects to make my neighborhood unaffordable.		Keeping affordable housing is a challenge in our Fountain Square/ Twin Aire neighborhood. Be aware - are we building for only those who are coming (gentrification). Balance it with those traditionally in place.

Keep Indianapolis Beautiful	1	l want my family to be better and more safely connected to the river.	Indianapolis	Connection for all, yes. Understanding of dangers, yes.
Keep Indianapolis Beautiful	1	I want my family to be better and more safely connected to the river.	Keystone Monon Neigh- borhood Assoc- iation	Warning signage, rangers, access, life savers hope White River has access points to/from the river, especially near White River Yacht Club. Rangers should be present more. Our beloved Max drowned 2 springs ago during his favorite gig - fetching his stick.
Keep Indianapolis Beautiful	1	I want my family to be better and more safely connected to the river.		The survey conducted by ROW showed the Barth St. was predominately male/ biking/ walking. Did this indicate that female / children did not feel safe? More lighting, call boxes and interactive for education for children as a destination.
Keep Indianapolis Beautiful	1	l want my family to be better and more safely connected to the river.		Be better and more safety connected to the river - via hands on, experiential and recreational activities that compliment and enhance our understanding of this life line.

TO FIND OUT MORE ABOUT WHAT WE RECOMMEND IN EACH OF THE FOLLOWING PLACES, SELECT A DESTINATION TO READ ABOUT THE PROJECT AND TELL US HOW YOU THINK THE PROJECT COULD BE MORE SUCCESSFUL.	HOW EXCITING IS THIS PROJECT TO YOU? (1 = NOT AT ALL; 5 = VERY EXCITING)	WHAT COULD MAKE THIS PROJECT STRONGER?
Southwestway Park	1	I love restoration of natural environment and improved access for public to enjoy. But buildings for concerts and other loud activities will ruin the environment and render and restoration pointless. Animals won't stay and the project will fail. Basically disagree with any loud concepts.
Southwestway Park	2	Enhance the mountain biking that is currently at Southwestway Park. Enhance greenway connections to park along Southport Road (entrance on Southport road not much benefit unless Southport Road is more accessible). Goal should be to make access to the park less dependent on automobiles.
Southwestway Park	4	Parking? Bike path/bike racks? Restrooms/water fountain? Connectivity by foot or bike to/ from main road access?
Southwestway Park	5	To allowing rowers from the Indianapolis Rowing Center to row here.

Riverside Park & Dam	1	Include Rocky Ripple
Riverside Park & Dam	3	How does this plan integrate with the Riverside Master Plan? How does this connect to B&O Trail in Marion County? Would like to see inclusion of natural surface trails for bicycles (i.e. mountain bike trails) incorporated where they can be added.
Riverside Park & Dam	4	
Riverside Park & Dam	4	Disappointed more is not being done in the Riverside Park area. I also want the revival of the cafe just north of 30th ast on the West Bank!
Riverside Park & Dam	5	Waterside redevelopment focus
Riverside Park & Dam	5	Actually USE and promote the waterfront. Paths is just not enough in as vibrant of an area as downtown. Try to include a promenade with shops and cafes, and maybe a floating bar. Have some in-water activities.
Riverside Park & Dam	5	Places for riverfront dining all along it. This is now one of the top foodie cities in the nation and it would be incredibly lacking in self-knowledge not to have that as part of this huge project or to only have it on the north side. It needs to be everywhere, especially downtown. Those of us who aren't on the Northside are tired of being ignored or given second best.
Riverside Park & Dam	5	Making provisions to allow Indianapolis Rowing Center rowing by youth and adults
Broad Ripple Village	1	I keep clicking on the section including Broad Ripple, and getting the crossing.
Broad Ripple Village	1	I'm trying to take the survey for Broad Ripple Village but it's connecting to The Crossing.
Broad Ripple Village	2	I really can't tell what the specifics are. From what I can see here, I like the tie in to the Nickel Plate trail to Noblesville.
The Crossing	2	Don't install so much hardscape, don't remove so much vegetation. The presentation board shows a pitiful tiny stretch of so-called "marsh" between large paved promenades. That is not a marsh. This project needs to be scaled back by about 50%.
Broad Ripple Village	3	
Broad Ripple Village	3	
The Crossing	3	
Broad Ripple Village	3	increase mountain biking at Town Run Trail Park on both sides of the river and connection north and south along the river.
Broad Ripple Village	3	the names do not correlate to the choices of areas

Broad Ripple Village	4	
The Crossing	4	Some in-water navigational assistance (signs?) in that Oliver Woods area of the river. We have to stop kayaking there and get out our phones to see which way to go. It's confusing in the water. Also, maybe a launch site there or a docking area so kayakers can "park" their kayaks and get out and walk around & eat lunch at a real restaurant! (Of course, there would ha E to be a way to secure the kayaks) but we can dock our boat at a restaurant in FL! We can figure this out!
Broad Ripple Village	4	
Broad Ripple Village	5	Being a comprehensive as possible and including as much interactive programming from white water parks and play areas to performance venues and interpretive areas. You probably already know this but people don't care about what they don't see and interact with on a regular basis.
The Crossing	5

Broad Ripple Village	5	Talk to river residents
Broad Ripple Village	5	Make the river accessible. Promenades and other options that encourage cycling and walking along the river front.
Broad Ripple Village	5	
Allisonville Stretch	1	Not removing the ability of current recreational activities on one of the few legal areas left near the suburbs (waterfowl Hunting).
Allisonville Stretch	1	Not doing it. You're manipulating the natural habitat.
Allisonville Stretch	1	Making it go away. You will never see any ROI with a project like this. People that want to use the river already do it. It will essentially ruin recreational opportunities that already exist.
Allisonville Stretch	1	The river is used by the people who want to use it. It is a waterway open to the public and should not be instructed nor profited from as it is already owned by the people
Allisonville Stretch	1	Dont do it. Good hunting
Allisonville Stretch	2	You can't remove wide swaths of vegetation all along the riverfront and then expect wildlife to flourish. You can't add rock climbers and ropes courses and busy trails and expect wildlife to increase. You are moving wildlife from an important corridor to supposed "restored" ecological areas outside your zone of tourism. I'm not buying it. Stick to natural trails, more access points, short areas of developed land - the river is not a theme park.
Allisonville Stretch	3	Concentrate on NOT impacting the current wildlife while enhancing the area. Leave some areas wild & undeveloped. There are plenty of parks for Ham. Co. residents to experience the outdoors.
Allisonville Stretch	3	General comment - it would be helpful if the map names for the sections corresponded to the drop-down menu to choose which area to comment on. They don't at all - you have to understand that this is the "Allisonville Stretch" is the same as "Meadow Reach" - on the map there is no mention of Allisonville.

Allisonville Stretch	3	I live in a "core marsh" area adjacent to 146th and across from the Conner Prairie expansion. The water from Dirt Works floods my property badly and regularly. Allisonville Stretch	5	"More questions than suggestions. I am very pleased that this resource will receive additional care, attention, and use. I just opened the survey. I didn't watch the presentation, so I apologize if my questions were answered.
		I expect there will be significant environmental education, for the public, regarding improving and protecting the river and adjoining land. Correct?
		Will there be a safe way to portage canoes and kayaks around dangerous or non- navigational waters (waterfalls)?
		Will there be educational signs along all parts of the river regarding area and it's ancient to current residents, plants, and animals. Artifacts (pictures) would be great. Conner Prairie I am sure already has some of this. A great partnership to grow!
		Will there be a place to fish safely off the shore? I know Schwartz's bait and tackle is a true friend to the river. Are they involved? I hope so.
		Thanks, I will go back and watch the video presentation and try to attend the next public meeting!
		Thanks much!

Downtown Noblesville	3	Not clear how trails/greenways, bikeways connect to the access points.
Downtown Noblesville	3	Showing more of what it would would look like in the end result. Some people may not understand all the diagrams made out and the way each faze was explained. There are a lot of people out there that need an easy to see and explain the simple Archetecture of the plans.
Downtown Noblesville	4	I would like to see areas near Noblesville along the river where there are outdoor restaurant options. I would prefer that a lot of there river be left quiet for kayaking, biking, hiking in peace. I definitely want Noblesville to be more progressive and extend the bike path from Noblesville down to Fishers and up to Koteewi

Phase Three Feedback

In the Action Phase, public meeting attendees and survey participants were invited to provide feedback prioritizing focus area investments and recommendations, and the future of public process as the plan moves towards implementation. The most popular priority was to improve river connections at Downtown Indianapolis between Riverside Park and the proposed investments to Belmont Beach and Mozel Sanders Park. In Hamilton County, the most popular priority was to expand Federal Hill Commons to the riverfront across from Noblesville City Hall.

Key priorities for focus area investments are summarized below.

MEETING	WHICH FOCUS AREA DO YOU WANT TO TALK ABOUT?	HOW EXCITING IS THE FUTURE OF THIS FOUCS AREA TO YOU?	PRIORITY #1	PRIORITY #2	PRIORITY #3	WHAT WOULD YOU IMPLEMENT FIRST	WHAT COULD MAKE THIS PROJECT STRONGER?
January 31, 2019	All	4	Connectivity	Increasing Greenspace	Dams and Intakes used for public.		
January 31, 2019	All	5	Protection of flora, fauna, fungi and land as natural space, including spaces in Fishers area, Oliver's Woods, Broad Ripple	Expansion of space for flora, fauna, fungi and land as natural space.	Establish area to flood, accounting for benefits to entire bioregion (Ohio, Wabash, Mississippi, etc.) to Gulf of Mexico.		Plan for and implement prevention and rememdies to pollution, including landfill leaching & spills, trash, etc. Integrate past and present indigenous people % public information about them.
January 31, 2019	All	4	Increased river access	Increased river health	Increased river programming		A framework for increasing water quality. Necessary for increased engagement & recreation
January 31, 2019	All	5	Dam removal	water quality improvements	ecological enhancements.	Invasive Species Removal	
January 31, 2019	All	5	Infrastructure Improvements	Art/Sculpture Strategy	Enagaging Greater Public Use		Not sure if there is backing by the state or not? If not, there should be. Stepped dam definitely a great idea. Stronger natural species and best defense against invasive species. Also I would like to see accelerated climate change issues taken into consideration. In my opinion the waether/seasons cycle will be outdated soon.
January 31, 2019	All	5	Interconnectivity				Seems strong already
January 31, 2019	All	5	Clean River Areas	Improve Access	Preserve & Create Habitats		Promote and spotlight the Native American history along the river project.
January 31, 2019	All	4	River Access	Clean Water	Trash Removal		Including the Native American history int he area
February 13, 2019	All	5	Inter-government				State law allows river authorities, flood control districts, conservation districts, etc. use existing statute to form overlay district for flooplain/water/ etc. conservation.

February 13, 2019	All	5	All landscape enhancement is w/ nature plants	Remove existing invasive plants	Prevent further invasive introduction through this project landscaping		I am hoping for a long term plan to remove invasive plant species, keep their populations minimized in perpetuity, and enhance with high quality nature plant species to benefit wildlife, pollinators, birds, insects, soil, and therefore the resident of Central Indiana!
February 13, 2019	All	4	Eliminate water pollution in our local communities	Connecting communities/ make the river accwesible to the public	Raise awareness on these issues		Spread awareness to the public and get more input for possible solutions
February 13, 2019	AII		Protection of flora, fungi, & land as natural space, including 56 acres in Fishers area & Olivers Woods & Broad Ripple	Expansion of space for flora, fauna, & fungi & land as a natural space.	Establish flood area to flood, accounting for benefits to entire bio-region (Ohio R., Wabash R., Mississippi River Basin, etc.) to Gulf of Mexico & account for increased flooding from climate crisis. Let flooding happen in farms and compensate farmers for losses.	Plan for & implement prevention & remedies to pollution, including landfill leaching & spills, trash, etc.	"Integrate past and present indigenous people & public information about them. Language used as learning tool about heritage. To make this project stronger, galvanize the leaders, members and associates of the following organizations: Central Indiana Land Trust Hoosier Environmental Council Indiana Forest Alliance American Indian Center of Indiana, Inc. IUPUI's Dept of Earth Sciences, esp. Gabriel Filipelli Indiana Native Plant Society Indiana Academy of Science Hoosier Mushroom Society The Nature Convervancy, esp. the North American Freshwater Program's "'America's Watershed Initiative"""

February 6, 2019	All	5	Entertainment opportunities around river, restaurants, concert halls, etc.	Cleanliness (it smells)	Fishing, boating, tubing, kayaks	More presentations to multiple communities. This presentation was very informative and I think it will benefit everyone in and around Indy to be aware. Please get this out to all media outlets.	
February 6, 2019	All	3	Boating	Beach	Parks	NA	
February 6, 2019	All	5	Safety of low head dams	getting information to the public	NA	These presentations! This speaker was awesome.	
February 6, 2019	All	4	Paths to the river	NA	NA	NA	
February 6, 2019	All	5	Clean up	Beautification	Recreational Areas	Community involvement at the neighborhood level. Sewer and sanitation funding to deter polluting the river.	
February 6, 2019	All	4	Minority opportunities for surrounding neighborhoods	Work opportunities for youth	NA	More neighborhood involvement. Neighborhood exposure. Neighborhood advertisement.	
February 13,2019	All	5	Increase access to the river, especially for canoes and kayaks	Add a trail along the length of the river even if some of it is on roads			Connect all parks on the river. Connect current bike trails to the river trail
February 13,2019	All	3	Preservation of the river's natural qualities	Not over developing	Not monetizing and activating so that the natural beauty & nature itself are destroyed. No more asphalt.		

MEETING	EETING WHICH HOW FOCUS EXCITING AREA IS THE DO YOU FUTURE WANT OF THIS TO TALK FOUCS ABOUT? AREA TO YOU?		PRIORITY #1	PRIORITY #2	PRIORITY #3	WHAT WOULD YOU IMPLEMENT FIRST	WHAT COULD MAKE THIS PROJECT STRONGER?
February 13,2019	All	5	Keystone	Broad Ripple	Conner Prairie		Making sure it is as inclusive as possible. Free public access and thinking about an all-ages approach to amenities.
February 13,2019	All	3	Eliminating or getting rid of the pollution	Use less water when working with it	Recycle and reuse plastics and other things		More participants that can and will take time to help clean the waters with you guys! (sadly me not included)
January 31, 2019	Broad Ripple	3	Kayak "play" area near old dam	Broad Ripple "facelift"			Careful development - no one wants an over-gentrified appoach. Leave lots of room for nature while also being minimally invasive to current river residents.
January 31, 2019	Broad Ripple	4	Watercraft Put-In	Canal Dining	Open Views		If there's safety for the glass for the views of the canal.
February 13,2019	Broad Ripple	5	Trails to allow continous biking to running along enter length of the river from south of downtown to north of Broad Ripple to beyond! Preferably adjacent to water.				
February 13,2019	Broad Ripple	5	Cultural destination	Connecting communities & celebrating diversity	Bridging history & present		Excited to see the river used recreationally; to improve areas/neighborhoods. Thank you!
February 13,2019	Broad Ripple	4	Research (scientific & historical)	Education efforts	Implementation		Extensive co-operation from stakeholders in the project; outreach efforts
February 13,2019	Broad Ripple	4	Portage trail installation & maintenance at Clare, Broad Ripple	Replacement of Emerichsville Dam with series of "steps" and possible "white water"			Perhaps designers could canoe from Anderson to Emerichsville dam (or at least 30th St.). I would be glad to furnish a seat in my canoe for the trip.
February 13,2019	Conner Prairie	3	Asian honeysuckle out	Dredge silt	Rec use/fishing boating		
February 13,2019	Conner Prairie	5	Safety	Clean water	Silt/Flood storage		Safety on the river, ski, pontoon, tubbing

February 13,2019	Conner Prairie	5	Protecting/ restoring riparian corridors	Monitoring adverse effects from overdevel- opment/over use	Developing a proactive information exchange regarding any development (i.e. ecological issues)		To continue to solicit public attention and input. All of the above, but most importantly developing a proactive/open information exchange for anything touching the WRY!
January 31, 2019	Downtown	5	Get youth involved - ASAP	Canoe trips/ Kayak trips - sponsored by businesses, developers. Especially Ambrose or 16 Tec.			More presentation to civic groups - Lions Clubs, Kiwanis, Rotary, Chambers of Commerce, School Groups, Neighborhoods near the river. Build an awareness to change the attitude of people toward the White River
January 31, 2019	Downtewn	5	Social event space throughout/near Riverside	retail / restaurants	Bike trails		Community knowledge. More facts disbursed publicly
January 31, 2019	Down- town	5	Riverside park- Recreational River Plan	Stengthen pedestrian spaces	Love the reclamation of nature, creating and connecting spaces for people and engaging each other		Continue working on strengthening the connection with the new opportunities to participate in the project: 16 Tec, Amrose, Near West, Riverside, Etc.
January 31, 2019	Down- town	5	River walks & increasing access	expanding green space	downtown area needs implementation first for regional economic development		Emphaize health impacts of access to nature (greenspace/river access) and reducing chronic disease through activity. Emphasize funding mechanisms.

STICKY NOTE COMMENT

What We Heard	Upgrade Portage by Clare Power Plant
River Reaches	Perry Plant doesn't need to supply steam to downtown anymore. Get rid of dam for colling
River Reaches	Clear channel needed - Dredge here
River Reaches	Chevy Dam improvements
River Reaches	Can the "Chevy Dam" be improved or changed?
Principle 1	Appreciate that environment & ecology are #1. The rest will follow if we restore natural habitats.
Principle 2	Citizen's River Watch? What is the underlying principle(s) of co-ordinating the strategies?
Southwestway Park	Landfill that takes waste from Covanta is a concern
Southwestway Park	Coal ash ponds can be an issue here (Harding St. IPL Plant) & else where
Southwestway Park	Remove Invasive species. Reintroduce and enhance exclusively w/ naties in landscaping. Long term plan needed to address invasive repopulation.
Southwestway Park	This is not SWW. Looks like north close to downtown
Southwestway Park	Consider that this are (3) floods. It is currently under water and unable to access. Camping and concerts do not seem like a good idea in this section.
Riverside Park & Dam	Might want to locate a beach where there are natural gravel/sand bars or the sand will always be erroding.
Riverside Park & Dam	White River trail crossing at 16th St can take many minutes to be able to cross the 4 lanes, especially with a bike (the inland is very narrow).
Riverside Park & Dam	Put a bridge to the Castle platform. West side is accessible for livery, gatherings.
Riverside Park & Dam	Look at concrete pads from old bridge alignment
Riverside Park & Dam	Severe ground water contamination due to industry 100 yrs ago to present
Broad Ripple Village	Build portage path into bike train so paddlers can get by dam
Broad Ripple Village	Bike/pedestrian bridge
Broad Ripple Village	Pedestrian bridge to acccess Warfleigh to Holliday Park w/ river access
Broad Ripple Village	This area (7) more about being on the river
Broad Ripple Village	Prevent bike path from going north of BR Park. Many homes along here you would cut off.
Broad Ripple Village	Need to protect the bank from erosion.
The Crossing	Are you planning to close access to this lake full of boats? Building a bridge?
The Crossing	Wetlands, etc. should be designed to absorb salt, oil, etc from asphalt surfaces.
The Crossing	Still having storm/water drainage in river
Allisonville Stretch	Cut sockets & hang ropes for rope?
Allisonville Stretch	Approach to river is the Autoshop just west of Allisonville Rd on north side. Buy right of way through Body Shop to bridge.
Downtown Noblesville	Very blocked channel through here. Please dredge to establish a well defined channel
Downtown Noblesville	Form a conservancy district or river authority with Hamilton Co.
Strawtown Koteewi Park	8th St road to Anderson is very winding and narrow. Constructing bike trail will be difficult.
Strawtown Koteewi Park	Wider riparian corridors please.
Strawtown Koteewi Park	Very nice concrete steps & access dock on left bank.

Preserving the existing character and uses along the river.	×															The White River Channel needs to be cleared of dead trees, especially the ones caught on the bridge structures all along this area. In addition, Strawtown Avenue through Koteewi Park needs walkways built under the roadway to allow people to walk from one side to the other without dealing with automobiles on Strawtown Avenue. I know there is a path under the present bridge on Strawtown Avenue but there needs to be others built all along the roadway.

I would like to see the public addressed and made aware of this aspect and to respect those that own the land. Maybe this falls under the "use signage strategy"?

Extending the walkability of the Square with a two plus mile long river walk would encourage ever more visitors and residents to down town Noblesville and would set it apart from Fishers and Carmel's downtowns evermore because they lack river access. The river walk in itself would be a unique destination. I'm thinking of Naperville, IL. Add places for small outdoor events, small local concerts, exhibits, a children's play space, opportunities to fish and engage with wildlife safely. Noblesville is a family community. The river walk could be the epicenter of community fun and engagement.	Choose another focus area!	Shovels are ready, let's dig into this now!

Broad Ripple Village should return to the artsy feel, chill on the bar scene, get rid of excess vaping stores, demolish and rebuild that awful empty mini strip west of Carrolton, and stop building huge towers. Fill up the empty restaurant spaces across from Bruge. Stop cutting trees. Revive the Village as a village with the charm it deserves. Don't turn it into Carmel look- alike. Beware of turning river into tacky fishing rec area with people destroying nature. Beware of installing parks for kids. NOISY and way destructive toward relaxing, soul healing nature. Beware of turning Broad Ripple into a noisy zoo. Respect the beauty of silence and the Monon's natural beauty. Don't turn Broad Ripple into a chaotic city. Where will we be able to commune with nature if you keep adding cement structures. We have parks for fishing in Indy. Broad Ripple's uniqueness lies into peaceful Monon healthy activities. Do not fall into the amusement park syndrome!

	46254	7/12/2018 4:59	I am a RN at IU Health Methodist. There could be many ways for Hoosiers to exercise and relax on the river! I have canoed on this river with the Boy Scouts and it is beautiful! A plan to improve would be great; makes me think of River Walk in San Antonio	
	46205	7/12/2018 5:36	I love Indy and take knowing and growing my community seriously. I love right off 38th Street in an area many might ask why live there and I say why not. We were very supportive and involved in the Mass transit referendum and I'd like to see, share and educate on the next big thing in Indy.

	46060	7/12/2018 8:04	"I've enjoyed living near the White River for the past 20 years. The trails, walkways, and bridges are appreciated but the potential is tremendous. I enjoy recreational use of the river and support	
			ecological efforts to sustain its viability. I'm an educator in Noblesville (Noblesville West Middle School). I teach history. I value the role that the river has played in my community and	
			excited about potential new roles it can play."	
	46220	7/12/2018 8:41	I live in the neighborhood and have served on a redevelopment commission in central IN.

	46240	7/12/2018 15:13	Have lived along the river for more than 20 years, kayak and boat on the river. Retired and have spare time and have been around water all my life. Lived on a sailboat in the Caribbean and sailed back several times.

	46205	7/12/2018 16:58	In my travels to other communities I'm always struck at the positive impact a well planned and cared for waterway has on the culture of the city. As a paddle board enthusiast, I love being on the White River and take the time to clean up trash while I'm paddling. I look forward to a day when we don't worry about raw sewage in our water and people see the river as a place to play and commune with each other and nature.

Lived in 4 different homes in my 42 years on this beautiful waterway. I know how it changes with all the floods and high water along with all the ever changing channel. Call me to lean more.

	46250	7/14/2018 10:37	I have lived here since 1981 and have seen how the changes have made Indy a great place to live. This could have as much impact as the downtown revival! I am familiar with the different areas of the city and I am not afraid to start a conversation with a total stranger about how they can benefit from and potentially help make this effort a success. I am also a retiree so I have a flexible schedule.

Zach	46202	7/18/2018 11:43		Hello, I am a current SPEA student at IUPUI. I am pursuing a major in sustainability and a minor in management. I was curious if there are internship opportunities through out any of these processes? I'm excited for the future of the white river and appreciate the positive impact you are looking to create for our city and its waterways. Thanks and good luck to you!

John	46228	7/21/2018 6:59		"I think making improvements to enhance the area near the riverfront is a great idea. I would most like to see a mix of minimally developed natural areas, and areas with some sort of attention getting feature. I would like to suggest adding disc golf courses at some of the parks. They are relatively inexpensive to build, low maintenance, and they promote physical activity. There are a few existing courses in Hamilton and Marion countys. Adding a few more would help more citizens get involved in a fun, inexpensive sport. Some other cities such as Cincinnati, and Minneapolis have several nice courses and I believe that it enhances the appeal of these cities. If offered the opportunity, I would be excited to assist in the layout/design of new courses. Thanks!"

We live is a rather close knit area and know our neighbors. We are very involved in our church and have a small group where there are other couples who also live off Eller Road.	We live off Eller Road and enjoy Heritage Park. However, there is no sidewalk on Eller Road that can get anyone North of 106th St safely to the park. It would make the entire area much more pedestrian and bike friendly if the sidewalk from the school went to the park or if there was a crosswalk and a sidewalk on the other side of the street. Are there any plans to make the access to Heritage Park more pedestrian friendly?
Jami	46074	7/28/2018 7:26		I would love to see Indianapolis become more beautiful. It seems it has declined tremendously in the past 2 decades. Trash everywhere, the smell downtown, etc. I hope this project can inspire the city to clean up other areas and I hope Indianapolis can turn the ship around overall.

John	46220	7/29/2018 6:50	Raised in INDY, I've lived in other cities where water ways are used and loved as I'm sure White River will once again become. Most recently I've seen the work Columbus Ohio has done downtown and the results have been great bringing more people outside. As a real estate agent I like to know changes within the region and happy to share progress and vision with others.	This is a wonderful project! I'm glad more people are using the river now and it will continue to grow in popularity.

Steve	46240	7/30/2018 17:19	Experience: ISBH/ISDH/IDEM for 41 years. My 12/11/1976 fishkill/water pollution water quality survey was part reason for the need for construction of the underground storage tunnel" presently underway. Additionally I collected dead fish in the massive fishkill that occurred from Anderson's Guide Corporation and water samples all the way downriver to Spencer. Interestingly, if not know, at one time the stretch below Southport MWTP was listed by InDNR as a best bass fishery in the State. There are still improvements needed for that stretch to return to that status. Below the Southport MWTP to the Hendersonville bridge (and perhaps farther) the river is quite beautiful. Except for the occasional smell of the river and oil sheen seen on the surface coming out of a big city. For the future I could see a reason for canoeing all the way from above Noblesville to Spencer. Could there be built artificial bypasses/ fish ladders of all the dams on the river such as the ones on St. Joseph River? I think there is great potential for the river to be attractive to all water sports. I have been in charge of multiple water quality studies conducted downstream of the Indianapolis Belmont wastewater treatment plant back when NPDES controls were being revised to meet upgraded water quality standards. I or m staff have gathered other water quality data for Noblesville, Fishers, Carmel, Belmont and Southport MWTPs. I have been inside the Pogus Run tunnel some distance before it drains into White River I or my staff have sampled effluents from all the MWTPs when compliance sampling investigations were conducted and data for wasteload allocations were needed. I have overseen the water quality of White River and it's tributaries of the White River and it's tributaries.

Kent	46017	9/11/2018 18:10	My paddling experience, 28 yrs of firefighter service , EMT , knowledge of water rescue. Love to paddle down the river. People ask me what drives you to paddle so much , I always say to see what's around the next bend .	"Recently traveled from Mounds State Park to Mt Carmel IL . approx 280 miles. Spent at least 5 nights on the river. My river trip was in honor of a direct decendent of Chief Anderson (Curt Anderson) and the Lenape Indians travel from Anderson In. to Oklahoma. I was honored to be the one who guided Curt Anderson (first) Trip in a canoe on the wapahani (white river) for a short trip. I on average paddle 300 to 500 miles a year on White River. (canoe) I canoe race on white river and other rivers in Indiana. I have guided several trip on white river , mostly Yorktown to Daleville. Girl scouts , nursing homes ,and a group amputees (who didn't need help). Things I think will help white river more access . Most people only travel approx. 7 miles a day in canoe or kayaks , tubes less . So a access at lease every 5 to 7 miles with regular pick up trash containers, and maybe a portalet. Remove all dams , or make easy access around them. Have more clean up White river is gift for this part of Indiana. Offer guided tours , paddle lessons. I will stop there for now . "

Pamela C	46034	9/14/2018 8:06		I grew up on White River in Riverwood. Riverwood used to be a lovely community until the slum lords (rich, professional people in Noblesville) started buying up homes and renting them out causing crime and neighborhood decline. But, many of the old families still live there, and it is a true community within that group and renters who care. My family owns our family home and my brother has a lovely home two blocks from the river. Throughout my childhood right until now, the mood and conversation has been and is tied to the river. I hope that the vision does not include any imminent domain. I would like to see the county take over the riverbank which would hopefully get peoples cars and junk off the river. A trail along the river would be nice although Rverwood is already and always has been a walkable community.
Keith	46208	9/17/2018 9:03		I am thankful that the river is finally the priority that it deserves to be. As we prepare a vision of how we want it to look, I hope that the vision is inclusive. Particularly, there are people of color and poor may not have access to the public events for various reasons, but still deserve to be a part of shaping the vision for what the river will one day become.

How do we get involved in the planning of the White River development.
Susan	46220	9/21/2018 6:33	"I'll be honest that I don't even know exactly what this means or entails, but I'm a huge fan of promoting and improving our green spaces in Indianapolis. My neighborhood (Arden) is bordered on its south side by the White River. I sit on the Board of the Arden Neighborhood Association and therefore am well positioned to keep neighbors informed and encourage them to be engaged.	I'd LOVE to see Holliday Park and Marott Park be connected by trail. There is already a trail along the river on Arden Drive that runs from Pennsylvania St nearly to the bridge over the river at College Ave. And there is already a trail from Holliday Park leading out to the small parking lot at Blickman Educational Trail (SE corner of Meridian St and Arden Dr). All we are missing is to connect those two sections of trail (easy!) and then add one more small section to get us safely over/under the College St bridge and into Marott Park property.

Tracy	46221	10/11/2018 9:19	I would be the best person for the river guide volunteer opportunity because my love for the outdoors, and the water. I'm a life long residence of Indianapolis, growing up in the West Indianapolis section of the city which is in close proximity to the White River. My love for this city, my neighborhood, and the people in them desires for a more inclusive, and fun place to live.	Will minorities, African Americans in particular, be given equal opportunities from a grass roots effort to invest smaller amounts of capitol in efforts to allow locals to invest in their communities?

Jennifer	46240	10/16/2018 6:50		If you must do something it should be kept a greenspace / greenway, perhaps similar to the Mounds Greenway plan https://www.hecweb.org/issues/ open-spaces/hec-releases-mounds- greenway-plan/ and then only if it will be adequately staffed so human trash (in cans) doesn't get neglected etc. Please do NOT develop. A lot of wild life such as coyotes follow the river and are already spreading into our neighborhoods due to habitat encroachment posing some risk to our pets, small children, and everyone when overzealous homeowners feel the need to shoot them with their fire arms (as has happened in my neighborhood). Furthermore, the river is such a complex ecosystem we often don't understand the ramifications of our development until afterwards and it creates a never ending cycle of repair, maintenance, and cost that could be spent otherwise such as in the schools or to our teachers. We must have balance in our ecosystem and we humans have enough development. We need more green preservation.
cheri	26220	10/16/2018 7:42	{:	Removing the trees along the south side of the white river just south of Arden removed the noise barrier of the traffic on College and Meridian!! What we could NOT hear, we now can hear, even in the summer while the trees are fully leaved! I believe this has and will depreciate home values! The beauty of Arden is its trees! James	462023315	10/19/2018 2:41	I believe the White River is an underutilized asset that has been ignored too long. I am an avid angler but I do not fish the river due to pollution concerns. I am a Crew Captain with the Fish and Wildlife Division of DNR. Our goal as Crew Captains is to engage with others on the art of fishing and understanding regulations for fishing. I am also a member of CERT - Community Emergency Response Team for Center township. I am involved in our neighborhood association.	I see the river has been drained above the 16th street dam. What repairs are being made and what was done to protect the fish?

I currently give back by working with various inner city organizations. I have been on the High Line in NYC, along the rivers in Cincinnati and Pittsburg. I would like to think the White River become a destination like these. I would like to be a part of helping it happen.	We used to live in Noblesville and enjoyed canoeing the river. We've never wanted to go past Broad Ripple. I hope it gets cleaned up so we can.

Heidi	46201	10/22/2018 10:29		I grew up playing in the White River downstream about 50 miles back in the 80's before everyone had access to the internet and pollution facts. My relatives still live in the area and my hope is that a part of your goals include cleaning up the polluted riverway so that it can be enjoyed by all communities along the stream. If this means more stringent regulations on businesses who discharge into the river, all the better.

Bill	46220	10/22/2018 16:32		Please contact me. I am a reporter for the Broad Ripple Gazette and am doing a story.
Peter	46220	10/22/2018 17:15	Hello- I'm a lifelong resident of Meridian- Kessler and Broad Ripple. I jog, fish, kayak, and birdwatch on the White River. The White River is an underutilized resource for the city of Indianapolis and the neighborhood I live in (Warfleigh). Fortunately, due to many ongoing projects (sewer drainage project, northside levy, construction in Broad Ripple, and GM plant redevelopment) and hard work by the community, there are a lot of friends on the river's side. The city has a unique opportunity to catch the momentum of all of those projects to develop the river into something truly special. My relations with the community (volunteer for the Broad Ripple Village Association) and background in marketing and PR would make me an asset to the White River plan.	I love the White River and have been trying to change its perception for years. I hope this project can help us use this beautiful resource!

I would like to see our area beautified and was actually interested in getting people together to plant perennials along the white between w 30 and 42nd where the trail is. My husband and I kayak the stretch between broad ripple and here as we live off 44th and I drive to work this way. The lights need to be fixed as well as the limestone is in disrepair and needs cleaning. There was a restaurant here now closed. It should be reopened or rented out for family functions. What is the possibility of me getting together some people to plant perennials this spring and cut down the over growth?

People should enjoy Canoeing, Kayaking or floating down the river without houses or buildings Littering the river banks. More development along the river banks will certainly bring more pollution and trash to the river. It's already bad enough and needs to be cleaned up we don't need make the situation worse.

Is the expansion of areas to park your car and have access to the river for fishing being considered? Thank you in advance for your response.

Steve	46220	2/21/2019 16:28		"Good Afternoon! I hope all is well! The Warfleigh Neighborhood Association is pleased to extend an invitation to you attend our upcoming annual meeting on Thursday, February 28th. This is our big meeting for the year, when we invite neighbors to recap what happened in 2018 and learn about the events planned for 2019. This is also a great opportunity to see and hear from their elected and local officials in an informal setting and find out what's going on outside of our neighborhood. Past meetings have turned out to be great forums for all involved and we expect this year to be no different. With the White River creating a natural northern boarder to our cozy neighborhood, we'd love to get a brief update the Envision White River Plan, and hope you're able to join us! The recent tree removal, while controversial, has created a great opportunity to reengage with the river in Warfleigh for both residents and visitors. The meeting will be at 6:30 p.m. February 28th at St. Paul's Church at 6050 N Meridian St. Please reply with your availability before February 25th, and we look forward to seeing you next week!

Stephen	46282	3/27/2019 10:53		My idea is using fuel cell vessels on the White River to move people through the city and maybe even the state. The hydrogen used to power the fuel cell is made on-demand using a patented technology by a local company. This technology is currently being used by city of Carmel, IN, for their municipal vehicles to reduce fuel use and lower vehicle emissions. Please let me know what you think and if you, or you know of anyone that may be interested in discussing.
